Welcome to a new era of motoring.

The new Proton Suprima S is living proof that an exhilarating motoring experience and value are not mutually exclusive. With its legendary Lotus ride and handling there's no doubt that the Suprima S is our most exciting Proton yet. And with a 1.6L turbo charged engine under the bonnet and all the features you'd expect in a car built to global standards we're sure you'll agree that compromise is definitely a thing of the past.

Features. Where do we begin?

If a 7" Android based touchscreen with reverse camera and GPS sat nav is important to you, yes we have that. Or maybe daytime LED running lights that come on automatically when you start the car is top of your list. We can oblige there too.

Perhaps flat folding 60/40 split rear seats to further extend your boot space, and steering wheel audio controls is what you're searching for. There's not much you won't find in the Proton Suprima S.

LED daytime running lights come on automatically when you start the car.

Electric adjustable side mirrors with indicators. The GXR model's mirrors automatically fold for extra safety and parking.

The engine push-start button increases convenience and enhances security. (GXR)

Reverse camera together with front and rear* sensors make parking in tight spaces easy (GXR).
*Rear sensor standard on GX variant.

Active hazard lights and automatic unlocking doors that trigger upon impact.

Rear spoiler reduces drag and maximises fuel economy.

Auto Headlights come on in dark areas or dusk when set to automatic. (GXR)

Remote tail gate release for improved security.

Touch-control WiFi enabled Android infotainment centre lets you stay connected and enjoy in-car entertainment. (GXR)

And so the list goes on. And on.

Our list doesn't stop there. In addition to the amazing features mentioned, there is Automatic Climate Control Air-conditioning (GXR) to suit your personal needs. It will work out the fastest way to achieve and maintain the desired cabin climate. And there is a generous 6 litre glove compartment, cubby holes on all four doors, utility box, armrest compartments, cup holders and strategically placed hooks that allow you to place small packages to stay upright and keep contents inside.

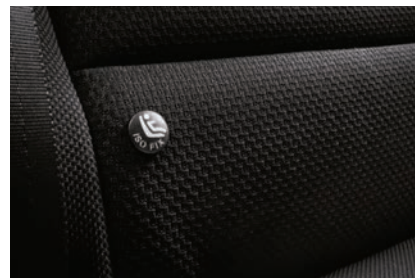

Vehicle Search will quickly locate your car in busy parking areas by simply pressing the key fob twice. This will trigger the lights of your car to flash a few times making it very simple to locate.

Double Stage unlocking adds a level of security which allows only the driver's door to unlock unless the key-fob is clicked twice which will unlock all 3 remaining doors.

The Panic Alarm can be activated via the key fob by simply pressing the panic button. This will activate the hazard lights plus sound the horn continuously.

The ISOFIX and 3 top tether mount points will further assist child seats from slipping, twisting and tipping forward.

The Anti-trap power window prevents the window from trapping things like a child's arm when it senses an obstruction providing additional safety.

SID Smart Info Display.

The SID (Smart Info Display) keeps you informed of all the car's functions and is one of the main features that make driving a Proton such a worry-free experience.

It tells you for instance if one of your bulbs is gone, or reminds you when your next service is due.

It lets you know about your fuel consumption or warns you when your car or key fob batteries need replacing. All you really have to do is enjoy the ride.

SERVICE REMINDER.

Displays the remaining distance and months until the next periodic inspection.

BATTERY LOW.

Displays a warning if either the key fob battery or the car battery is low.

JOURNEY TIME.

Displays duration in hours and minutes.

INTRUSION WARNING.

The alarm will be triggered if the boot, hood or any door is opened and the intrusion will be recorded on the display. It will also indicate if the boot, hood or any door is open if alarm is disarmed.

DISTANCE TO EMPTY.

Displays the approximate distance the car can go before running out of fuel.

INSTANTANEOUS FUEL CONSUMPTION.

Displays total fuel used and the distance travelled since the last reset.

BULB FAILURE WARNING.

Displays will indicate bulb failure for front and rear lights.

TRIP METER COUNTER.

Displays distances travelled between two points.

The Looks Department.

You have to admit that the new Suprima S is a stunner. With its ultra sleek body, it easily holds its own amongst its peers where road presence is a concern. And we didn't stop on the outside.

The interior is just as impressive.

With its Tempest Grey finishes and Piano Black detailing it compliments the exterior perfectly.

The Suprima S is definitely a lot of car for your money.

The seven double-spoke design is given a brilliant diamond-cut finish on the surface and titanium spray on the inside. The two-tone finish is impressive at standstill and dazzles when on the move. (GXR)

With its Tempest Grey finish and black accents the cabin is as impressive as the exterior.

Never compromise on safety.

In a world first we created the Reinforced Safety Structure (RESS). What this means is that parts of the passenger cell are formed at high temperatures more than doubling their tensile strength. In addition the Suprima S comes with 6 SRS airbags for both GX and GXR variants. This together with rigorous testing, ABS and our Electronic Stability Control (ESC) helps you take control of your car during emergency manoeuvres. Receiving the maximum 5 star ANCAP safety rating, the Suprima S helps keep you safe. Happy with that.

One of the many rigorous tests we put every Proton through.

The Suprima S comes with 6 SRS airbags for both variants.

Only the Maximum ANCAP Safety Rating will do.

That legendary Lotus ride and handling.

The name Lotus is synonymous with superb handling (the way the car responds to the driver). It was the formidable Colin Chapman who invented the monocoque which changed Formula 1 car design forever.

We're very fortunate that our partnership benefits from the 52 years that Lotus has been at the forefront of F1 innovation.

And although we don't suggest for a minute you treat the road like a racetrack, it's nice to know so much experience has gone into giving you one of the best rides money can buy.

Who's for 5-star service? Anyone?

The ride in the Suprima S is made even more enjoyable knowing that for 5 years you won't have a worry in the world when it comes to motoring.

It's definitely one of the better features of the Suprima S. Drive around in total peace of mind with our 5 years Factory Backed Warranty, 24 hours Roadside Assistance and Capped Price Scheduled Servicing.

If you're still not convinced there's only one thing for it: Get down to your dealer and take a test drive. Enjoy.

Offers are for private buyers at participating PROTON dealers. Refer to www.proton.com.au or your nearest authorised PROTON dealer for further details.

*5 years / 150,000km warranty and roadside assistance (whichever occurs first).
