- Protective bumper mouldings

LOTUS DNA for **Spectacular Ride & Handling** and Reduced Noise, Vibration & Harshness

When it comes to techniques in suspension tuning, the legendary LOTUS Engineering in Norwich, England, is one of the world's foremost names in this field of automobile excellence.

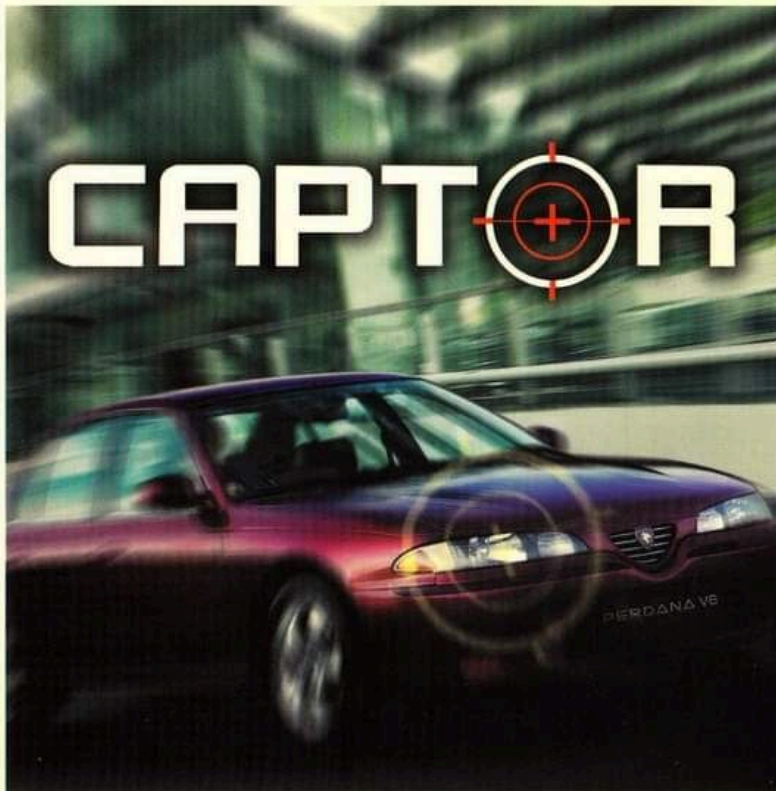

The fine tuning of the front and rear suspension system has bestowed the PERDANA V6 better body control with more definite roadholding and stability.

Thereby giving the driver more confidence, enabling more precise steering and cornering.

Assurance of incomparable security with **CAPTOR**

Till today, CAPTOR has a 100% success rate in the recovery of CAPTOR-equipped stolen cars.

A revolutionary innovation, CAPTOR works on the Netstar Automated Vehicle Tracking & Recovery System, which is proven to be more effective than GSM and GSP technology security systems.

It relays information through real-time coordinates to the Netstar Control Centre, 24 hours a day. So the location of a CAPTOR protected car, is always known.

Underground car parks, tunnels, heavy tree cover...there's simply no barrier to recovery of a stolen car, assuming if anyone is brave or silly enough to breach the security of a car that carries the CAPTOR insignia.

Hence, the owner of a PERDANA V6 can enjoy peace of mind, always.

An interior that's undoubtedly **An air of Luxury**

> Classy gear fascia

> Leather door trim

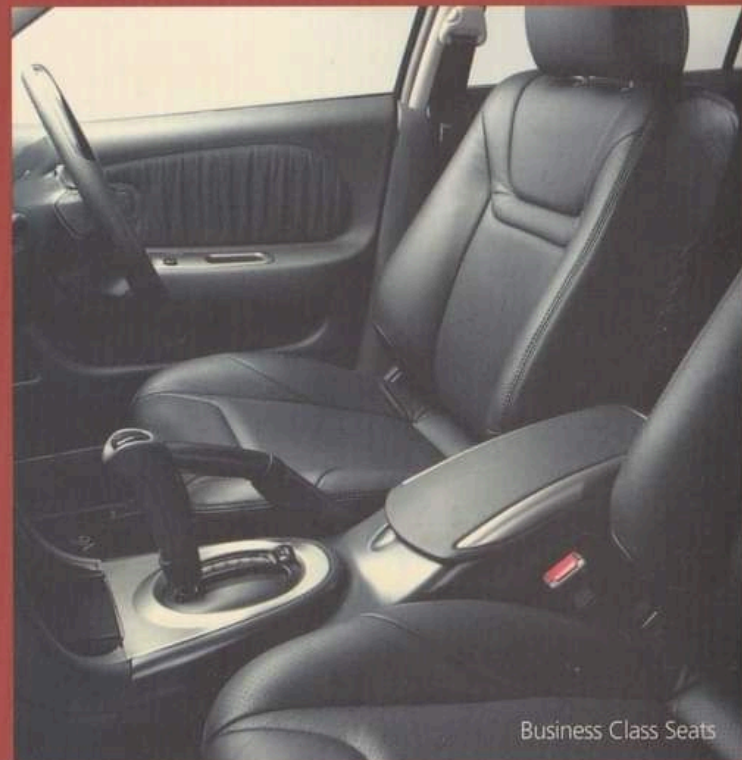

> Concealed cupholder armrest

- Classy centre fascia
- Stylish air-cond activator
