

A New *SAGA* Begins

www.proton.com

Meet the Proton SAGA

It is made for your every journey. Elegant design, fuel-saving next-generation engine, and many more innovative features make it the best in its class. Like the very first edition, the SAGA is built for the people.

Reserved, simple and always accommodating

The new SAGA exercises careful design restraint for a sleek, minimalist look. Same goes to the interior with every dial and button on the all-new dashboard designed with simplicity in mind.

Spacious enough for family trips

With a longer and wider body plus extended overall length, the SAGA offers the best cabin space in its class, not to mention a grand 413-litre boot capacity.

Sit back and enjoy the performance

The CamPro 1.3 now has Integrated Air Fuel Module (IAFM) technology. A new air intake system, it helps the engine "breathe" better at any speed to provide greater fuel efficiency and performance.

Appreciate the quiet and drive

The SAGA's cabin is designed to be quieter and smoother. With legendary Lotus handling dynamics giving you greater road feel, superior vehicle control and improved stability, you'll be singing in the rain, too.

Balik kampung with peace of mind

Designed to fulfil international crash safety standards, the SAGA's reinforced chassis and body structure plus driver's airbag will always be there to protect.

A new era in teh tarik enjoyment

Enjoy your favourite drinks on-the-go with convenient cup / bottle holders at every seat. That's not all. Plenty of other practical features await your discovery.
