

JUMBUCK

Engineered to deliver

Model shown is GLS with optional styling bars

Make way for the Jumbuck

The tough Proton Jumbuck blazes a trail in the half-tonne pick-up sector. Expertise from Lotus has given the Jumbuck's handling a new dimension rarely found in utility vehicles. Packed with useful features and a wide choice of extras, the Jumbuck offers unrivalled practicality and unbeatable value. The 1.5 litre petrol engine can be converted to LPG, which is now more widely available, making the Jumbuck even cheaper to

run. Every model gives you all the back-up you need from a commercial vehicle, with a comprehensive warranty consisting of three-year/ 60,000 mile total vehicle warranty, three-year/ unlimited mileage paintwork warranty and three- years free RAC cover.

Considering the Proton Jumbuck works this hard, is it any wonder the competition has to give way?

- 1. Main picture: The perfect partner
- 2. Payload of up to 645kg/ load capacity 800 litres
- 3. Drop-down and removable tailgate

Big on space and loaded in your favour

Whatever your trade or business, the sturdy Jumbuck delivers more for your money, with a payload of up to 645kg and a load capacity of 800 litres. The 1.63m flat bed, with a maximum load height of 650mm ensures a standard Euro pallet fits comfortably.

Designed for the rigours of the job, the Jumbuck's built-in practicality makes this vehicle a pleasure to work with. For ease of loading and unloading there's a drop-down and removable tailgate which is also useful when carrying long loads. Plus there's a back step for easier access. Tool boxes

can be fitted in the load area and you have the option of a load liner, with drainage holes, to protect cargo.

Towing capability is important in a utility vehicle. So, for maximum convenience, the Jumbuck is pre-drilled for a towbar, making it easier and quicker to install.

Built to work hard, the Jumbuck performs everyday tasks effortlessly, making it a vehicle you can rely on for years to come.

All the comfort of a family car

Comfortable, adjustable seats, power-assisted steering and the option of air conditioning are not usually associated with commercial vehicles, but the Jumbuck has them all. Just like a car, this pick-up also gives you a height-adjustable steering column, efficient heating and ventilation as well as finishing touches like cup holders and clear, easy-to-reach controls.

On a practical level, the Jumbuck offers ample storage, including a glove box, door pockets, central storage space and room for a toolkit or briefcase behind the seats. All models come with useful features such as an external power point socket, and warning devices which remind drivers to turn off lights and close doors properly. The windscreen is tinted and laminated, reducing glare and cutting the risk of it shattering if struck.

There are also plenty of variants within the Jumbuck range that make it even more welcoming. Opt for the GS version and you get a pop-up sunroof. Choose the GLS and get Clarion radio/ CD, electric windows and electrically-adjusted door mirrors as standard.

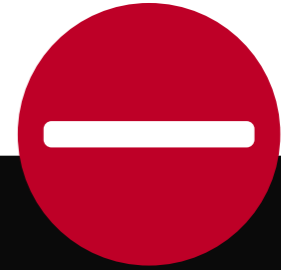

With all the comforts of a family car and durable finishing throughout, the Jumbuck is well equipped to make your working day a little easier.

3

1. Main picture: Safe on the streets
2. Remote central locking, alarm and immobiliser
3. Protective rear window grille

A wide range of safety features and security measures make the Jumbuck a safe bet to drive and to leave unattended.

Like all Proton vehicles, the Jumbuck has three-point seat belts, adjustable head rests and front crumple zone. The Jumbuck also has further safety features specifically designed to offer more protection when carrying loads. Ventilated front discs give increased braking efficiency and a load-sensing brake-proportioning valve ensures the optimum braking efficiency is maintained over a variety of loads.

A protective rear window grille also prevents cargo breaching the cab in the event of heavy braking or collision.

During the Jumbuck's development, much thought was given to improving side impact protection. Designers were faced with the problem of how to integrate the front of the chassis with the ladder-frame section that supports the cargo bay. The answer was to link them with a transverse torque box.

The Jumbuck's torque box is a valuable safety innovation,

helping to dissipate energy and shield occupants from the force of side impacts. It also means that, unlike many pick-ups, there's no gap between the load bay and the back of the cab – a big plus for safety.

When it comes to security, the Jumbuck is well protected against kerbside break-ins. Security features like hidden cables and an engine immobiliser are a real deterrent to would-be thieves. Add to this, remote central locking, internal fuel release and a perimeter alarm, and it's clear that the Jumbuck is a difficult target.

- 1. Main picture: A stylish addition to any business
- 2. Additional driving lamps (GLS/ GSX)
- 3. 14" alloy wheels (GS/ GLS/ GSX)

Look the business

When it comes to looking good, the Jumbuck stands out from the crowd with a choice of businesslike colours and range of stylish options.

The Jumbuck is smartly finished to give your business a professional appearance, with alloy wheels (except GL) and body-coloured door mirrors, door handles and bumpers on the GL, GS and GSX. Opt for the GLS and you also get a two-tone metallic paint finish to complement the design of this stylish pick-up.

Depending on the model you choose, there is a wide range of practical accessories that you can add to your Jumbuck, depending on the exact nature of your business. There are soft tonneau covers to keep loads dry, Truckman high canopy options to maximise covered space or sporty chrome styling bars for that classic finishing touch. This means you can style your Jumbuck to work hard and at the same time reflect the personality of you and your business.

- 1. Main picture: Maximum stability in all conditions
- 2. Dependability – whatever the load
- 3. Making a splash!
- 4. Confidence under heavy braking

Access all areas with Lotus handling

The influence of Lotus in the Jumbuck's superior ride and handling is unmistakable. Tasked with the uneven terrain of building sites, unsurfaced access roads as well as cornering whilst fully laden, the Jumbuck tackles all road conditions with confidence.

The 1.5 litre engine with 86bhp and 5-speed manual transmission has ample torque for fully-laden hill starts and overtaking. Generous ground clearance of 170mm means bumps aren't a problem for the Jumbuck. The durable ladder-frame chassis has good rigidity and

load-carrying strength for a consistent drive under all load conditions. The Lotus-developed suspension and the Jumbuck's responsive steering ensure maximum stability and dependable handling at all times, even under heavy braking.

Unlike the average pick-up, the Jumbuck drives like a car, giving you supreme driver control and a smooth ride. So, wherever your business takes you, the Jumbuck's ride and handling will make day-to-day driving a pleasure.

Vehicle options and accessories

1. Load liner 2. Plain Truckman high canopy 3. Tow bar 4. Tool box

Canary Yellow (solid – GL, GS & GSX)

Other options and accessories for your Jumbuck are also available, please see your local dealer for full details.

^These items can only be used if the Jumbuck is fitted with a hard top with longitudinal roof rails. Please contact your dealer for further information.

Metallic paint is an option at extra cost on all models excluding GLS, where it is a standard feature.

Air Conditioning

The air conditioning system controls the air temperature and its distribution around the cabin as well as helping to remove any airborne impurities such as pollen.

Anti-Roll Bar

An anti-roll bar is a metal bar attached between the suspension of the same axle and the car body, which prevents the car's wheels from 'lifting' when cornering. The Jumbuck has a front anti-roll bar.

Ladder Chassis

A ladder chassis is where the major structures of the chassis are supported by central rails connected by cross braces (forming a structure that looks like a ladder). It is generally used in large trucks and SUVs because it provides good isolation between the passenger cabin and road vibration and because of its ability to withstand large loads.

Load Sensing Brake Proportioning Valve

To reduce hydraulic pressure to the rear brakes so the rear brakes do not lock up when the brakes are applied, a 'proportioning valve' is required. This valve helps compensate for the differences in weight distribution front-to-rear as well as the forward weight shift that occurs when the brakes are applied.

Lotus Ride and Handling

Lotus-developed ride and handling and engineering expertise has been used to ensure that the Jumbuck suspension is fine-tuned, resulting in precision handling at all times. The straight-line handling, cornering and steering response are clear evidence of the Lotus involvement.

Precision handling also aids safety through the ability to manoeuvre safely whilst maintaining full control over the vehicle.

Noise, Vibration and Harshness (NVH)

Suppression Package

NVH is a package of key improvements that improve the general driving experience. It is associated with reducing discomfort to the driver through transmitted noise and vibration.

Perimeter Alarm

An alarm system that detects intrusion through the doors and bonnet.

RDS

Radio Data System. This helps keep the radio tuned to the radio station of your choice regardless of any frequency changes.

Torque Box

Torque boxes are the main components in pick-up vehicles. It is a curved box extrusion that dissipates the energy of an impact so that a majority of the impact energy resulting from a crash is dissipated before reaching the occupants.

Ventilated Front Discs

To improve the overall efficiency of the system, two brake discs are mounted back to back with a small air gap between. This results in air entering this gap to allow the discs to be cooled, and therefore braking performance can be increased. This is ideal for any vehicles that may tow or carry heavy loads.

Customer service

THE PROTON PEACE OF MIND WARRANTY PACKAGE

3-year total vehicle warranty

This is a 3-year/ 60,000 mile manufacturer's warranty available for all new Jumbuck vehicles first registered in the UK and purchased from a UK Proton dealer. This warranty is given subject to the vehicle being maintained and serviced in accordance with the manufacturer's schedules and in line with any terms and conditions. Please see your Proton dealer for full details. This three years of warranty is transferable on the sale of the vehicle.

3-year unlimited mileage paintwork warranty

This warranty applies to all Jumbuck models and offers a paintwork warranty in line with the terms and conditions of the 3-year total vehicle warranty but for an unlimited mileage period. This warranty is also subject to terms and conditions and is transferable on the sale of the vehicle.

Proton RAC Assistance

For the first three years of ownership you will automatically receive full RAC cover providing complete peace of mind motoring. The cover includes roadside assistance, vehicle recovery and "at home" assistance. As a Proton owner you are also entitled to take advantage of other services including free legal advice and other discounts and special offers. Additional cover can be purchased. Please ask your dealer for details or contact **Proton Insurance & Financial Services** on 01953 713924.

Proton also operates, in conjunction with the RAC, a 24-hour Proton Accident Care line. This line gives Proton owners essential advice on what to do in the event of an accident. Your accident specialist will provide reassurance and advice including arranging

recovery of your vehicle (if necessary) and reporting your accident to your insurance company. They can also give further help after the event, including arranging a temporary vehicle. Your Accident Pack will be in your new vehicle when you collect it.

PROTON INSURANCE

Proton Insurance has been specifically arranged for Proton owners. Offering favourable premiums and a fast and efficient claims service, it is yet another benefit of owning a Proton. Your dealer can provide a proposal form for a free no obligation quotation or you can call Proton Insurance direct on 0870 606 0706 for an immediate quotation.

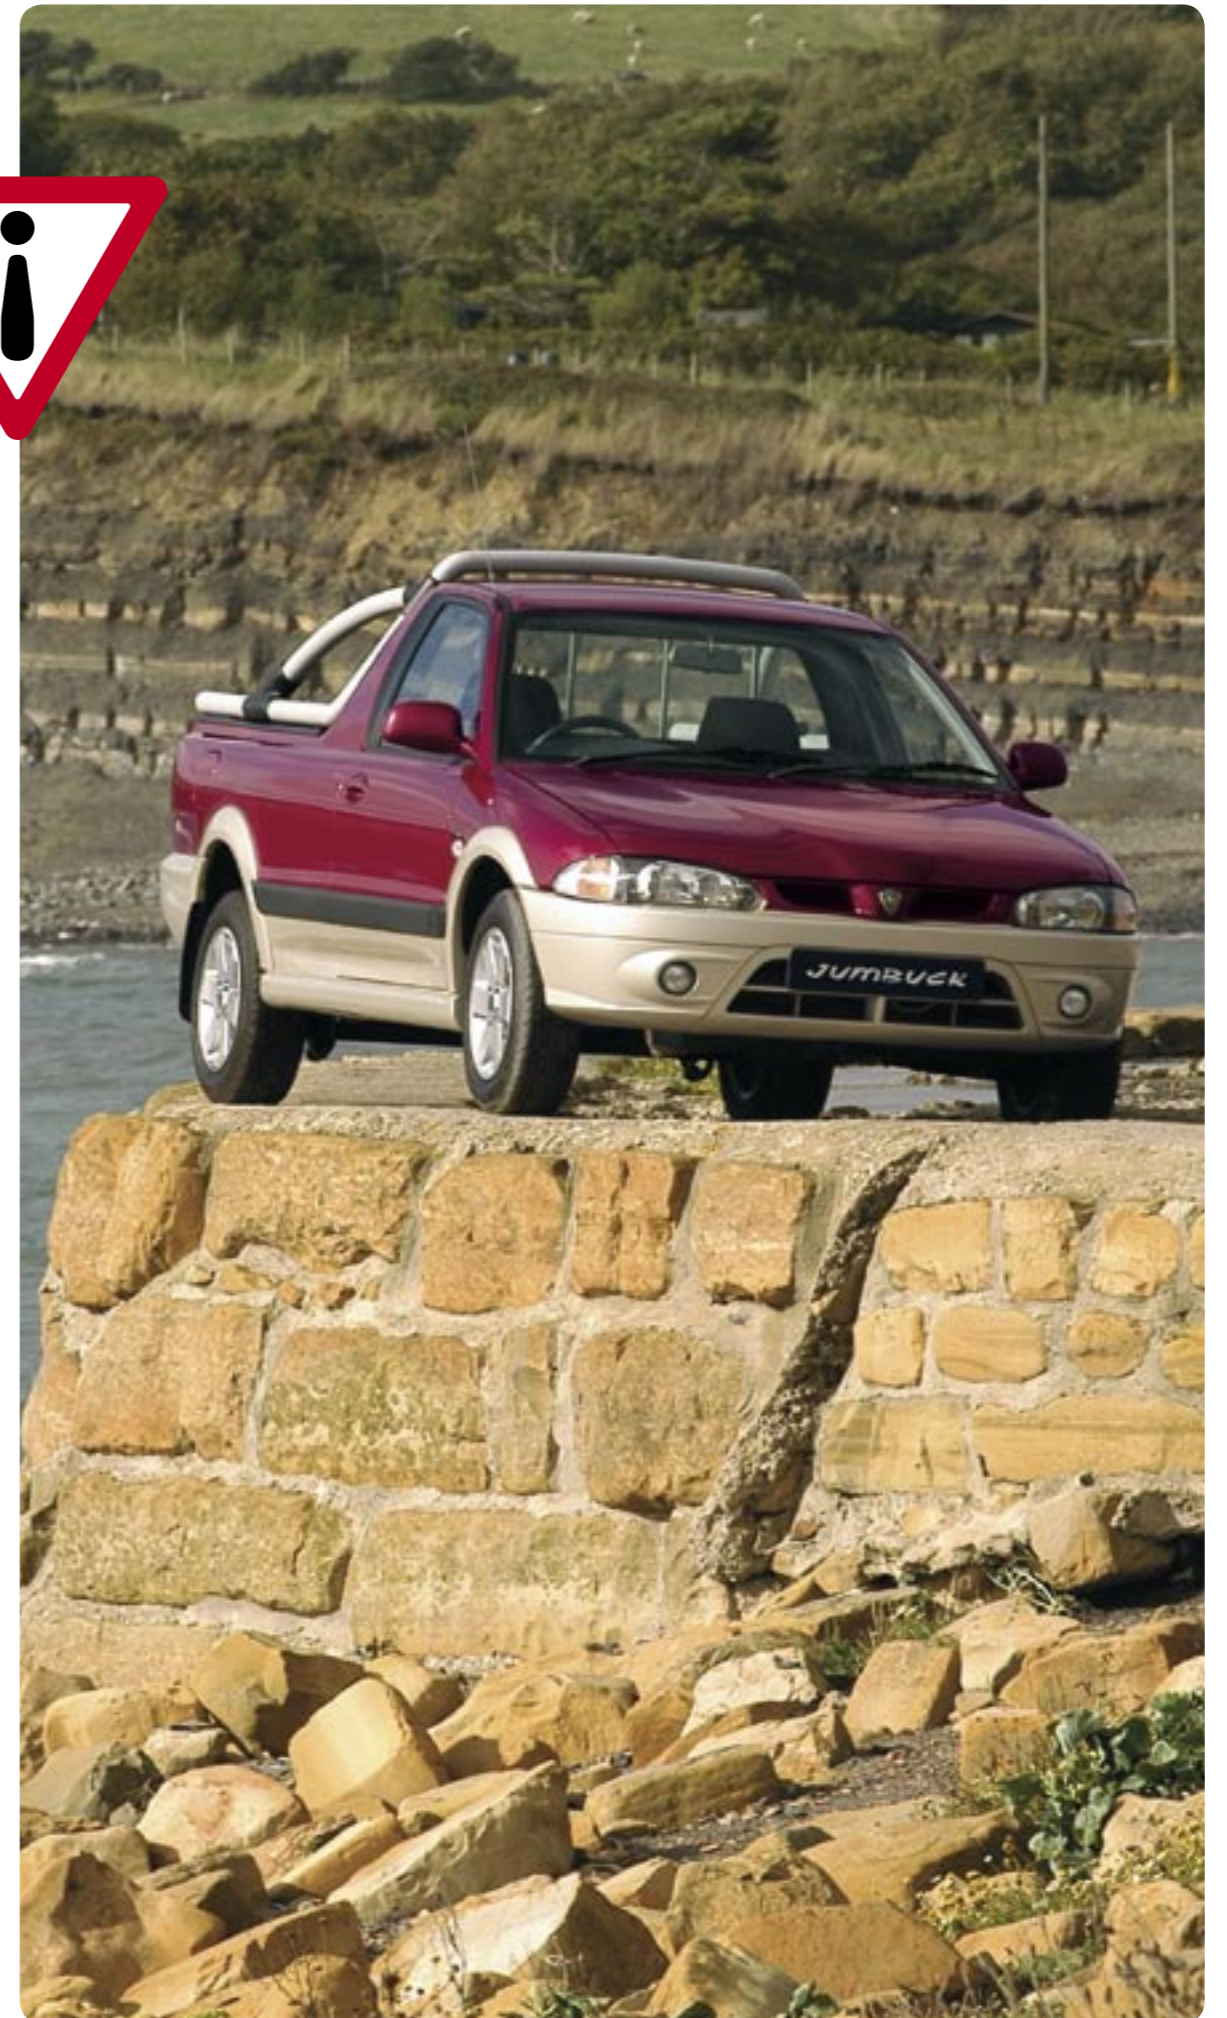

As a valued Proton owner we will ensure that you get the very best quotation from Proton Insurance, whichever Proton you drive.

PROTON FINANCE

Proton Finance Ltd provides a suite of financial products specially tailored to your needs. Available through your local Proton dealer, these include hire purchase and personal contract plans for private individuals. Business users can also take advantage of leasing, lease purchase and contract hire. In addition, customers can protect their payments in the event of loss of life, accident or sickness and unemployment.

PROTON CUSTOMER INFORMATION SERVICES
