

RENAULT 9

Variations on intelligent automobile design

4 levels of equipment, 3 transmissions, 3 petrol engines plus a brand new diesel... 5 versions of the Renault 9; 5 variations on intelligent automobile design.

Beneath its handsome modern shape, the Renault 9 features state-of-the-art technology in comfort and driving pleasure, performance, economical maintenance, and safety...

This year, it is also expanded with a new Diesel version. Powered by a new 1595 cc O.H.C. engine and fitted in conjunction with a 5-speed transmission, the Renault 9 TD, combines the road qualities, ride and elegance of all the Renault 9's with the simplicity, robustness and incomparable economy of the Diesel.

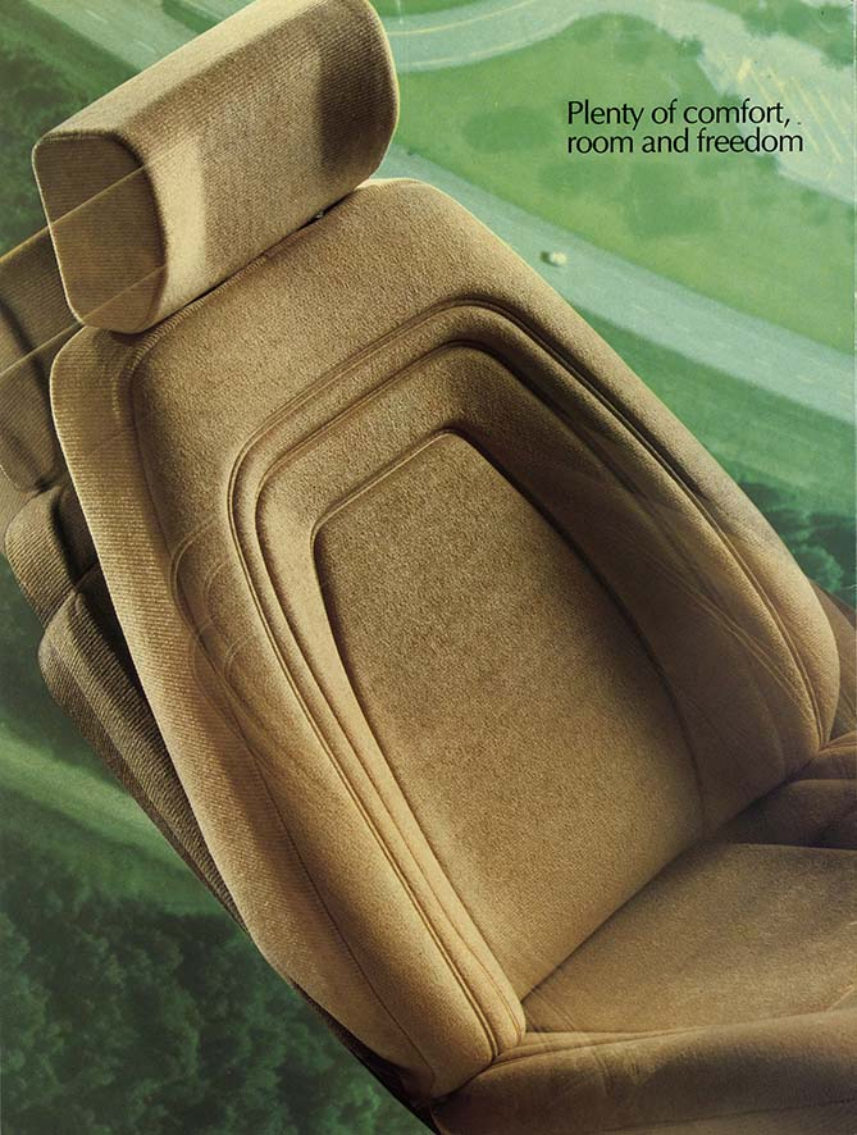

▼ Rev counter

▼ 5-speed transmission

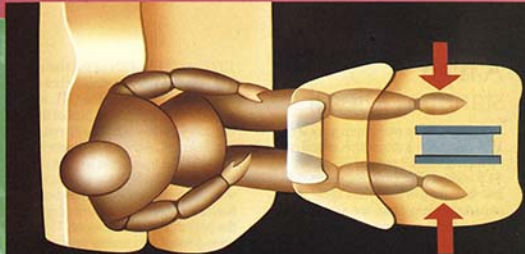

Plenty of comfort,
room and freedom

The Renault 9 was made for long journeys.

The "monotrace" front seats feature the usual adjustments but they can also be tilted on their curved runners somewhat along the lines of a rocking chair. These runners are placed very close together giving more floor space and therefore more leg room for the rear passengers.

5 spacious seating positions, plenty of freedom and plenty of room... This is the real comfort of the Renault 9.

Monotrace front seats allow more leg room for rear passengers

Front seat - Renault 9 GTL, Automatic and TSE

A high standard Diesel

55 bhp DIN, a maximum torque of 10.4 mkg DIN, a stopwatch speed of 90 mph and 64.2 mpg at 56 mph, 44.8 mpg at 75 mph constant speed and 40.9 mpg in the urban cycle. A remarkably frugal fuel consumption plus high performance and acceleration worthy of modern car design... The new 1595 cc transverse engine which powers the Renault 9 TD, benefits from the years of experience acquired by Renault in the field of diesel engineering:

The Ricardo pre-chambers provide a regular and hence more complete combustion of the diesel oil. There is less noise and a better performance.

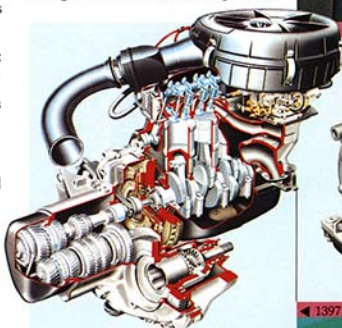

The overhead camshaft, driven by a toothed belt, directly actuates the valves without any intermediary.

There are fewer moving parts, original settings hardly ever require readjusting and the noise level is significantly reduced. Moreover, this arrangement permits a better valve diagram which improves gas flow and enhances performance.

... and a choice of engine power

From the 1108 cc of the Renault 9 TC, 48 bhp DIN, to the twin-choke

1397 cc, 72 bhp DIN of the Renault 9 TSE, via the 1397 cc single-choke carburettor, 60 bhp of the GTL and the twin-choke 1397 cc, 68 bhp of the Renault 9 Automatic. The Renault 9, is available with a choice of 4 petrol power outputs. The transverse lay-out of the engines, all of which are connected up with transmissions located end-on, leaves a maximum amount of space for the passenger compartment. This arrangement also makes servicing easier.

◀ 1397 cc engine

Integral electronic ignition
1 battery
2 magnetic pick-up
3 engine flywheel

Each item, each piece of ancillary equipment (fan, water pump, electrical equipment...) have been carefully designed to be lighter and more efficient

1595 cc Diesel engine

CX = 0.36

without impairing robustness.

The shape of the intake and exhaust manifolds, the cylinder head design and valve diagram are all designed to provide a smooth flow of gas whatever the engine speed.

Idling speed can be set very low, the choke is used little and fuel consumption remains very low in all traffic conditions: the most powerful engine in the range, the twin-choke 1397 cc engine of the Renault 9 TSE achieves 52.3 mpg at 56 mph and 39.2 mpg at 75 mph constant speed. This economical performance does not however prevent it from reaching a top speed of 101 mph.

If you choose the single-choke 1397 cc of the Renault 9 GTL you can cover up to 55.4 mpg at 56 mph and 38.2 mpg on the urban cycle.

The efficiency of the 5-speed transmission

The Renault 9 GTL and TSE as well as the Renault 9 TD Diesel, are fitted with a 5-speed transmission.

The well chosen ratios of this gearbox enable the driver to always select the right gear for the prevailing road conditions. Designed with motorway driving in mind, the 5th gear allows the engine speed to be lower at high road speed. Silence, durability and fuel consumption are therefore all improved.

The pleasure of driving an automatic

Relax, even in traffic jams. Smile while others are losing their composure, enjoy effortless driving and leave the rest to the automatic.

Fitted with a twin-choke 1397 cc engine developing 68 bhp DIN, the Renault 9 Automatic is rapid and responsive. It is smooth and efficient but with its electronic brain it also has a kickdown and will shift down quickly when necessary: essential for fast overtaking for example.

Integral electronic ignition

All the Renault 9's fitted with a single or twin-choke 1397 cc engine are equipped with integral electronic ignition.

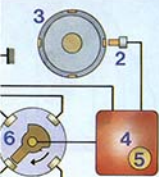

The ignition advance adjusts very accurately to suit engine speed and load, and no resetting is necessary. The spark supplied by the plugs is always perfectly calibrated; carburation and fuel consumption are therefore improved. The spark plugs do not wear out as fast and there is no problem in starting up, whatever the weather.

CX = 0.36 Elegance and efficiency combined

CX = 0.36; Classic elegant styling with the aerodynamic efficiency of a sports car...

Contoured front spoiler plus rear spoiler (not available on the TC model) the elegant curvature of the windscreen, a roof which tapers to the rear, faired wheel arches, carefully designed body trim, and no sharp angles...

The result is a remarkable aerodynamic drag coefficient which improves performance and reduces fuel consumption.

- 4 electronic control unit with coil
- 5 vacuum control unit
- 6 distributor
- 7 spark plugs

Front-wheel-drive and transverse engine... A design which stands to reason

Transverse engine, in-line transmission and front-wheel-drive... This is the arrangement adopted by Renault and is the one which combines all the advantages.

Front-wheel-drive; a guarantee of excellent road-holding and perfect cornering. Transverse engine; it gives a great deal more room in the passenger compartment, and as there is no drive-shaft tunnel it is possible to have a flat floor too. In-line transmission; it spells mechanical simplicity and easy maintenance.

All round independent suspension and a negative offset front steering geometry... Exceptional ride and handling.

Tight bends, bumpy roads, pot-holes, wet road surfaces, sudden braking... The car hugs the road. Driving the Renault 9 is enjoyable and the ride is also exceptional for the passengers.

The secret is the independent suspension on all 4 wheels and remarkable steering geometry. At the front, there is a negative offset suspension layout to improve directional stability especially when cornering out of a bend. Suspension is of the Mac-Pherson type with coil springs and an anti-roll bar which prevents the car from leaning too far over when cornering. At the rear, the suspension is composed of trailing arms, transverse torsion bars and is equipped with an anti-roll bar.

Power brakes, discs at the front, dual circuit...

"All weather" efficiency

Disc brakes at the front, a dual circuit... These are of course standard features.

Yet, on the Renault 9, the brakes are servo-assisted, the discs are oversized, pad wear is monitored by a warning light on the facia, the rear brakes feature a device for automatically taking up play, which eliminates the need for adjustment and in the event of a problem, a warning light warns of any

unusual drop in pressure or in the fluid level. Finally, the whole of the Renault 9 range, apart from the TC and TD models, is fitted with a brake pressure limiting valve.

Even when it rains, whatever the load or road surface, road grip and braking is at maximum efficiency.

A car made to last

Chemical degreasing, zinc phosphating, chrome passivation, cathodoresis, underbody coating, primer, enamel...

Each body component passes through 7 successive stages of metal preparation and painting. The Renault 9 is made to stand up to very bad weather conditions for many years.

The box sections receive extra protection against corrosion and precoated sheet metal panels are used in all corrosion-prone areas.

But that's not all: with the input from

robotics, each weld is rigorously calibrated, each body or trim part is accurately positioned to within extremely fine tolerances.

These very modern techniques guarantee a very high standard of quality.

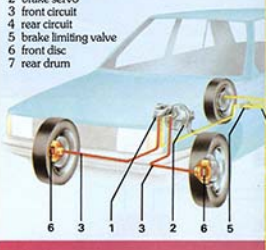

Computer aided design and structural safety

If it is the stylist's talent which created the lines of the Renault 9, it is with the assistance of a computer that a structure of such safety was able to be designed. Fore and aft, the progressive crumple zones incorporate collapsible points which distribute and absorb the kinetic energy from violent impact. The rigid passenger compartment is also protected by a wide cross-beam preventing engine or front wheel intrusion. The front doors

▼ Dual braking circuit (1397 cc engine)

- 1 master cylinder
- 2 brake servo
- 3 front circuit
- 4 rear circuit
- 5 brake limiting valve
- 6 front disc
- 7 rear drum

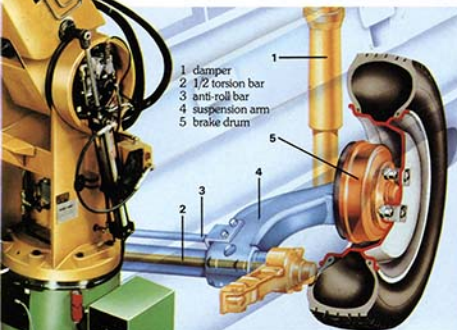

are reinforced and as for the fuel tank, it is protected and placed out of harm's way. Fortunately, most accidents are just knocks and to protect it from them, the Renault 9 has large-size bumpers with a

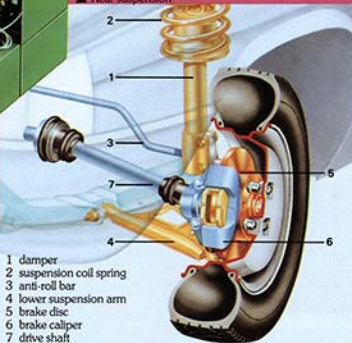

cellular structure which absorbs minor impacts without damage. There is also a protective bodyside moulding (except on the TC and TD models) which is fitted to doors to protect them from scratches.

The Renault after-sales service will provide the best maintenance for your Renault 9, thanks to tailor-made servicing

A programme developed to keep routine servicing costs to a minimum by providing a flexible maintenance package tailored to the individual requirements of your car.

Renault 9TD

The Renault 9 Completely equipped

Renault 9 TC - 1108 cc
Renault 9 TD - 1595 cc Diesel

Front and rear carpet, cloth upholstered seats with an adjustable squab on the driver's seat (TD).

The equipment on the Renault 9 TC and TD is comprehensive. The dashboard features side air vents and loudspeaker grilles. There are two-speed windscreen wipers with a flick wipe plus an electric washer. The central console with its illuminated switches and heater controls has a space reserved for the car radio. Equipment also includes a laminated windscreen and a locking fuel filler cap.

Driving pleasure

Renault 9 GTL - 1397 cc

Take a seat; with the Renault 9 GTL driving becomes a pleasure: cigar lighter and full pre-radio equipment with roof aerial. Halogen headlamps, reversing lights, intermittent wipe... There is even an oil level indicator and a buzzer which reminds you that you have left the lights on when you have switched off the ignition and opened one of the front doors.

Travel in style and comfort

Renault 9 Automatic
Renault 9 TSE - 1397 cc

With the Renault 9 Automatic and TSE you discover the pleasure of owning an exceptional product:

An exterior driver's door mirror adjustable from inside, dashboard lighting adjustable by rheostat... On the Renault 9 TSE the halogen headlamps can be adjusted from inside; the front windows are electrically powered and the doors are fitted with central door locking if you choose the option pack.

In addition, the Renault 9 TSE is equipped with front fog lamps and a rev counter. A glimpse of the ultimate in the world of automobiles.

Renault service: ready to meet all your needs

The Renault Dealer network

With over 800 Dealers, Satellites and Service Points, Renault is represented in every major town in Britain.

A Renault owner can rely on a high standard of service whenever and wherever it is needed.

Renault Loan and Renault Lease finance plans

Ask your Renault Dealer for details of Renault Loan and Renault Lease facilities available exclusively through Renault dealers.

Renault Loan

Renault Loan is Renault's own joint finance company which aims to offer the best all-round deal through its nationwide network of over 75 offices.

A loan is quick and easy to arrange in strict confidence and can include extras, accessories, car insurance and the Road Fund Licence for the first year.

Credit Care Insurance can also be included to protect your payments in the event of accident, sickness and death.

Finance for fleet operators and business and professional users

Renault Lease and Renault Loan schemes can be tailored to your requirements regardless of the size and type of your business. These include Hire Purchase, Leasing and Contract Hire, Service and Maintenance at any Renault dealer, bills being paid centrally by Renault Lease.

The Renault warranty

The Renault Warranty covers parts and labour charges for one year, with unlimited mileage. It includes the repair, overhaul or replacement of any parts found to be unserviceable due to defects in the original manufacture or assembly of the car. The work may be carried out by any Renault Dealer in the UK and the Warranty is transferable during the 12 month period.

Regular servicing programme

Periodic servicing is essential to keep your Renault in top condition. A full Diagnostic - Maintenance service is recommended every 10,000 miles or once a year, with an engine oil change every 5,000 miles.

Renault service points

In addition to the main Dealer Network, specialised Service Points provide a consistent, fast and accurate system of maintenance and inspection according to the high standards demanded by Renault.

Service and repairs

Every repair and maintenance job is given a standard time so that the total cost (including parts) can be calculated in advance. This way, we can ensure that your bill will never be an unpleasant surprise.

Bodywork

Body repair is a job best given to a Renault

specialist whose fully trained staff will use the most modern methods and equipment to ensure that your car is repaired quickly and accurately, with genuine Renault parts.

Parts

The Renault Parts system is organised to ensure that parts for Renault models are readily available anywhere in the country. Every dealer must carry a comprehensive range of parts sufficient to meet his normal requirements. This is closely backed up by an « urgent order » system operated from the Renault National Parts Distribution Centre.

Accessories, selected and tested by Renault

The Boutique at your Renault Dealer offers you a wide choice of accessories and fittings specially selected and tested by Renault for their quality and suitability for Renault cars. There is a wide range to choose from including radios, stereo radio/cassette players, fog lights, seat covers and so on.

Crestion Publicis Corroll

Renault produces the style Boutique adds the character.

There's no denying the Renault style which has been long admired by many. But Renault Boutique offers an extensive choice of accessories to satisfy your own personal style and add your own character.

With over 1,000 items to choose from it is possible to show only a few here but the range includes safety accessories like rear seat belts, leisure accessories like tow bars and roof racks, a range of car care and protective products and a superb range of in car entertainment.

And you can be sure that any Renault Boutique item is as reliable and stylish as the car it's made for.
