

NEW RENAULT LAGUNA COUPE

NEW LAGUNA COUPE. SLEEK AND CLASSY.

With its fluid, elegant design, matched by its high levels of performance and equipment, the New Laguna Coupé writes a new page in the history of exceptional coupés. The advanced technology of its 4Control chassis and wide choice of engines (including the exceptional V6 petrol and diesel), are the finest evidence of Renault innovation and promise a new level of driving enjoyment. With the New Laguna Coupé, the choice is yours, whether it's between types of engines or transmissions.

Apart from the V6 powerplants, petrol engines include the 2.0 Turbo delivering 205 horsepower, which translates to over one hundred horsepower per litre. When it comes to diesel, the 150, the 180 and the V6 235 horsepower dCi engines have an excellent performance to consumption ratio. Their high torque levels are ably demonstrated in a muscular pick-up from a standing start. And then, depending on your individual needs, you can also choose between a 6-Speed manual or an adaptive automatic gearbox.
