

New
Renault MEGANE R.S.

15 May 2018

Motorsports in its genes

New Renault MEGANE R.S. is an impressive car. A car built to arouse your driving instincts with wings extended by up to 60 mm, and special bumpers featuring a F1® style front blade at the front and a wide diffuser at the rear. Sitting squarely on its 18- or 19-inch wheels*, the front end features full LED lights with the additional multi-reflector R.S. Vision system. It includes a central exhaust exit, side extractor vents and a wide lip spoiler with exclusive Volcanic Orange* body colour.

* Optional

* 8.7" touchscreen is optional

A sports cockpit

As soon as you see the interior - Grey Alcantara with red stitching[†] - you want to get behind the wheel. New Renault MEGANE R.S. invites you to take to the road, with Alcantara sports seats[†] designed for support, a Alcantara steering wheel[†] and personalisable dashboard. At the same time, the short gear shift* and aluminium sports pedals take you into a new dimension, the world of R.S. sporting performance.

*Only available in manual transmission.. †Optional

1.

Efficiency and performance

New Renault MEGANE R.S. benefits from the know-how of Renault Sport in adapting motorsports technologies to production sports vehicles. It features a range of driving aids for any type of road and any situation.

1. Suspension with hydraulic compression stops: With the addition of hydraulic compression stops, the shock absorbers absorb impact better. This technology delivers spectacular results in terms of progressive control, comfort and performance.

2. New Torsen® limited slip differential*: associated with the Cup chassis, it has an asymmetrical transfer rate for acceleration and deceleration to improve acceleration power and cornering speed.

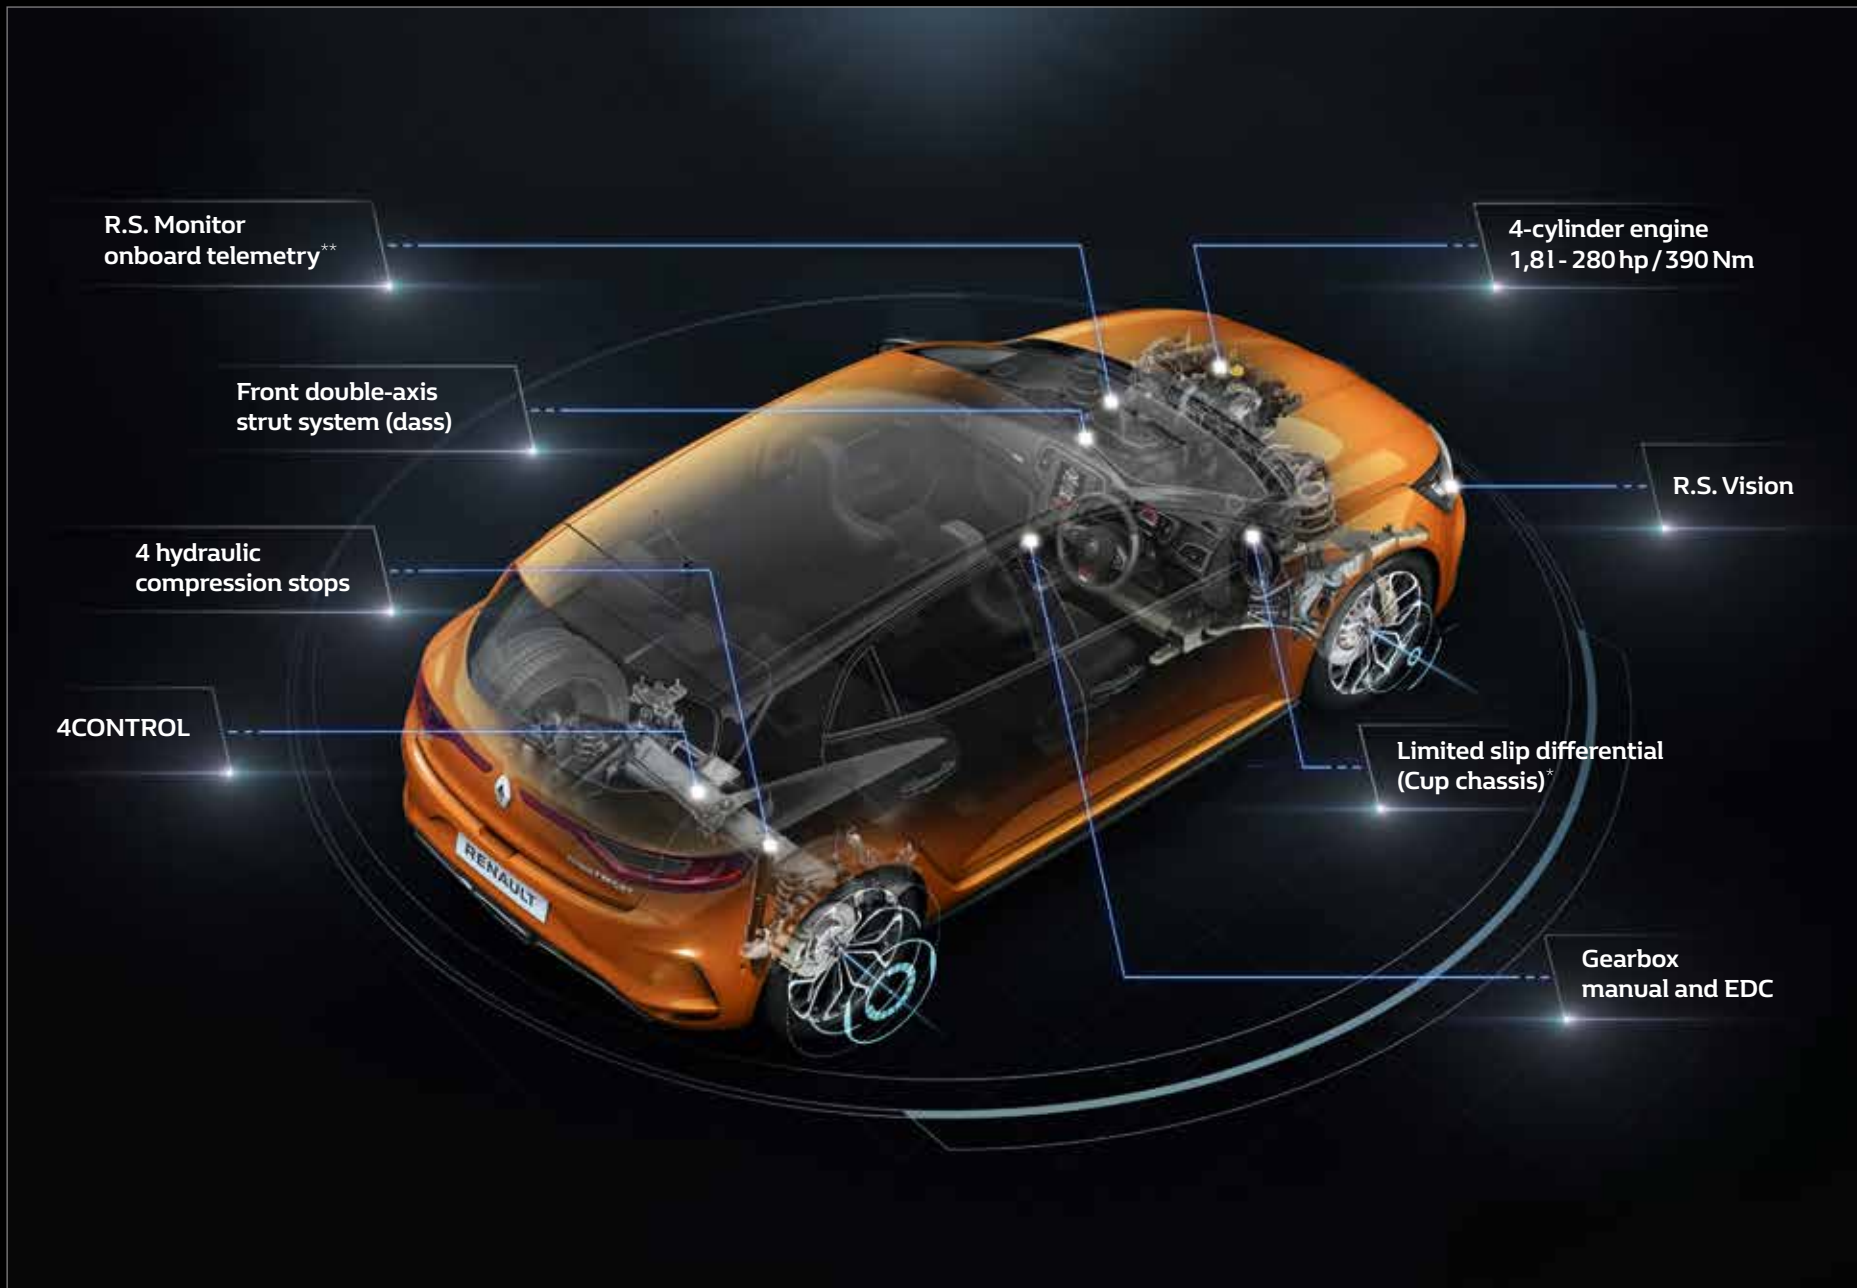

* Optional with Cup Chassis

Agility and Stability

4CONTROL 4-wheel steering system contributes to incisive steering and optimised roadholding for a precise, surefooted drive. At low speeds, the system turns the rear wheels in the opposite direction to the front wheels. At speeds of over 37 mph (62 mph in Race mode specially designed for the track), all four wheels turn in the same direction. You are in control of the road.

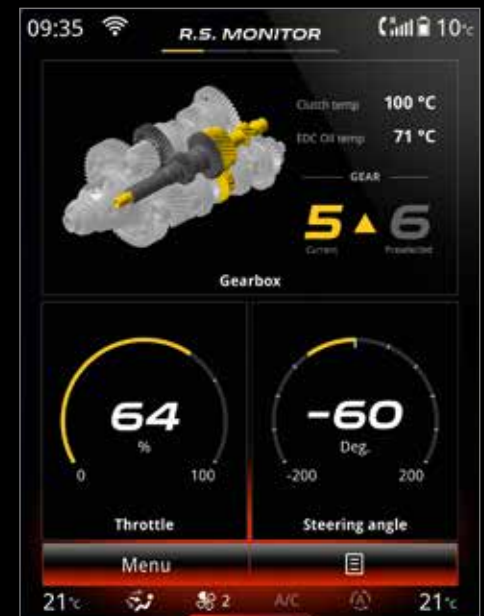

Display, analyse and share your performance

Your driving talents deserve to be recognised, stored and analysed! The onboard telemetry system R.S. Monitor* displays your driving settings in real time on the R-LINK2 screen.

In addition, the new R.S. Monitor Expert* mode allows you to use a camera to record your exploits on the track, associate them with the R.S. Monitor* telemetry and share them on social networks.

You can complete the analysis and compare all of your data, by visiting www.renaultsport.com/rsreplay

* Optional

Aim for pole position

When you hit the track use R.S. Drive to select your driving mode (Neutral, Sport and Race) and adapt the gearbox mapping*, ESP behaviour, steering weight and throttle pedal mapping. Play with the paddles to change gears at ultra-fast speed. Enjoy the excitement of a Grand Prix start with Launch Control*.

*Standard on EDC models

Increased safety

Drive with peace of mind! Renault Mégane R.S. is equipped with several driving assistance systems. Using intuitive and intelligent technologies, they support you on all your journeys, giving you day-to-day peace of mind. All of these safety aids are available as part of our option packs. You should not rely on driver convenience features. Some features may not work in all conditions and circumstances.

Traffic sign recognition

There are more and more road signs. It's not easy to catch every sign; let the camera handle it for you. If you exceed the authorised speed limit, a warning appears on the dashboard. All you have to do is adapt your driving.

Hands free parking

Parallel parking with a flick of the wrist! Hands free parking helps you to identify the parking space configuration (parallel, diagonal or perpendicular), measures the available space and handles the manoeuvre. All you have to do is control the accelerator, brakes and gears. A genuine co-pilot by your side!

Blind spot warning

Expand your vision! New Renault Mégane R.S. is equipped with a system which detects the presence of any vehicle in the zone that your wing mirrors do not allow you to see. Active between 19 mph and 87 mph, the system alerts you straight away with a warning light.

Adaptive cruise control

Easily maintain the appropriate safe following distance between you and the vehicle in front. In order to adapt your speed, the adaptive cruise control is activated at between 31 mph and 87 mph. The system acts on the brakes when the distance is too short and on the accelerator when the road is clear again.

Active emergency braking system:

This system alerts the driver if there is a risk of collision with the vehicle in front. If the driver reacts insufficiently or not at all, the brakes are activated to prevent or mitigate a collision.

Lane departure warning:

This system detects the lane in front of the vehicle with a camera and warns the driver audibly if they drift into another lane.

Auto high/low beam:

High beam automatically switches to low beam when the front camera detects other vehicles around and automatically switches back to high beam when nothing is detected around.

Safe distance warning:

This system warns the driver about potential collision with another vehicle in front, if the distance between the vehicles is not safe.
