DRIVING PLEASURE: WITH RENAULT

ENERGY ENGINES

FLEXIBLE, EFFICIENT, ECONOMICAL: THE NEW MEGANE IS EQUIPPED WITH THE ENERGY ENGINE RANGE. WITH NO FEWER THAN THREE ENGINES DERIVED FROM FORMULA 1® TECHNOLOGY, THE NEW MEGANE COMBINES EXCITEMENT, ECONOMY AND A LIMITED ENVIRONMENTAL IMPACT. AND, GOING EVEN FURTHER IN THE QUEST TO BLEND PERFORMANCE, COMFORT AND ECONOMY, THE NEW MEGANE ALSO BOASTS A NEW TCE 130 EDC ENGINE.

ENERGY ENGINES: MORE TECHNOLOGY, MORE PLEASURE AND MORE FUEL ECONOMY.

Energy engines offer a number of innovations designed to make driving an enjoyable experience while keeping fuel consumption in check. Dynamic, powerful, economical in terms of both fuel and CO₂, these engines – some of which are taken directly from the world of Formula 1® racing – are highly responsive. In terms of driving pleasure nothing is left to chance, whilst their fuel consumption and emissions are on a par with the very best. Downsizing (capacity reduction), Stop & Start and a new energy recovery system on braking and deceleration (Energy Smart Management): innovations that allow the three engines to combine a reduced environmental impact with driving pleasure!

A RANGE OF FOUR WIDELY-PRAISED ENGINES:

- ENERGY TCe 115 S&S: fuel consumption of 53 mpg and 119 g / km of CO₂⁽¹⁾
- ENERGY dCi 110 S&S: 80 mpg and 90 g / km of CO₂⁽¹⁾
- ENERGY dCi 130 S&S: 70 mpg and 104 g / km of CO₂⁽¹⁾

(1) Official consumption according to applicable regulations for New Mégane Hatch.

WINNING DUO

ROB WHITE

Director
of Renaultsport F1®

GASPAR GASCON

Director
Renault Power Train Engineering

At Renault, technological innovation is driven by the passion of our employees. Rob White, Technical Director of Renaultsport F1®, works with his team to create the Renault engines that power a quarter of all Formula 1® teams. Winning engines for over 35 years! World champions 11 times. For production cars, Renault Power Train Engineering Director Gaspar Gascon and his staff develop the new ranges of Energy engines. Think the two are unrelated? Think again. On a day-to-day basis, Rob and Gaspar keep in touch, discussing and working together to develop new ideas, each benefiting from the other's know-how with the enthusiasm of natural-born pioneers. Their goal: to reduce fuel consumption and CO₂ emissions by 35%; test engine strength under extreme conditions and take the everyday pleasure of driving a Renault to ever greater heights. When two teams of engineers obsessed with innovation combine their efforts and share their expertise, the drive for creating some of the world's best engines is more than doubled.

SAFE AND SECURE

Actions for the safety of all

**DECADE OF ACTION FOR
ROAD SAFETY 2011-2020
SUPPORTED BY RENAULT**

Renault places people at the heart of its business and is involved in many social initiatives relating to road risk prevention and raising awareness in schools and universities and other international organisations. The company is also committed to improving the effectiveness of emergency services when dealing with accidents

RENAULT SAFETY AT A GLANCE

- More than 600 company employees who are solely responsible for vehicle safety.
- 100 million Euros are invested every year in safety research and development.
- We conduct 400 real crash tests and 4,000 simulations each year.

FIX4SURE

1. ESC (Electronic Stability Control): With an ASR traction control system and CSV understeer control, your Mégane's stability is a priority in difficult road conditions. **2. Front and Rear parking sensors:** To help with parking manoeuvres, these proximity sensors warn you of any obstacles behind you through a series of beeps that speed up the closer you get. **3. Visio system:** With its high resolution camera, this system detects lane markings and alerts you visually and audibly whenever you cross a continuous line or broken line without indicating. The automatic headlights feature also adjusts between main and dipped beam, depending on the conditions. **4. ABS:** Anti-lock braking system (ABS) with electronic brake force distribution (EBV) and emergency brake assistance (EBA) to keep you in a straight line under hard braking situations. **5. Rear parking camera:** The reversing camera helps with manoeuvres. It complements the audio and visual sensor aids at the back. **6. Protection of occupants:** The programmed safety system includes a full set of airbags and sensors for side impacts. The Fix4sure technology, a result of Renault's innovation, is designed to stop submarining (where, during a frontal impact, the passenger slides under the seatbelt). The Fix4sure system efficiently protects everybody and provides maximum safety thanks to a special boss in each seat base.

* Official Fuel consumption figures are produced for comparison purpose and are measured according to the European Directive 80/1268/EEC. These figures are specific for a vehicle type and not for a single car. Real world fuel (actual) consumption can vary as the fuel efficiency of a vehicle is influenced by driving behaviour, weather and road conditions. The use of technical equipment for example air conditioning, can also effect the fuel consumption. For further information, please visit the Vehicle Certification Agency web site www.vca.gov.uk. For more information on CO₂ banding and Company Car Tax Benefit In Kind go to www.renault.co.uk
