GOLD STANDARD OF SAFETY

WITH A 5-STAR SAFETY RATING FROM GLOBAL NCAP

INDIA'S SAFEST HATCHBACK

Dual Frontal Airbags

Dual front airbags help ensure complete and thorough protection for front passengers in case of a collision.

The Global New Car Assessment Programme is a globally recognized organization that carries out independent testing modules to assess and certify the safety of a car.

Height Adjustable Seatbelts

Adjustable seatbelts as per individual requirements to provide comprehensive safety.

ABS with EBD and CSC

Latest 9.3 Anti-lock Braking System (ABS) with Electronic Brake-force Distribution (EBD) along with Corner Stability Control (CSC) aids in efficient on-road control.

Child Safety door-locks

The rear doors are equipped with child safety door locks to prevent accidental unlocking

ALFA ARC

Agile Light Flexible Advanced (ALFA) Architecture, along with energy-absorbing body structure, accounts for the absolute safety of the passengers.

Ultra High Strength Steel Point

- 3X strength in comparison to regular steel
- Energy absorbing body structure to prevent the passenger cabin from deformation.

Crash Locking Tongue on Seat Belt

- Crash locking tongue prevents belt from slipping out of place
- A steady belt ensures restricted movement, hence reducing chest injuries in the event of a frontal crash

ISOFIX Anchorage for Child Seats

Keep your little ones safe with an easy installation system for child seats to make every drive blissful and relaxed.

A Crash Safety Rating is not dependent on the number of airbags

- Crash safety ratings cannot be achieved by simply adding more airbags. The basic car structure must be strong enough to ensure the safety of its passengers.
- A weak structure will get a low rating even with airbags.
- An intact passenger cabin ensures high degree of safety.

Interior Intact – 5 Star Safety

- Passenger cabin remains intact
- No major deformation on A-pillar, B-pillar or floor
- Humanoid dummy not thrown out of seats
- Doors could be opened after crash
