The equipment for the vehicle illustrated in the Fascination section can be found on page 62.
 The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

Less weight.

More

driving pleasure.

There's a lot to the Audi RS 6 Avant: inspiring power, impressive attractiveness and intelligent Audi ultra lightweight engineering. Because a lighter car is a more agile car. And the extent to which this increases your driving pleasure cannot be expressed in figures. But it can in emotions. Experience the Audi RS 6 Avant.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

RS 6

Audi RS6 Avant

Lower power-to-weight ratio.

Higher

torque.

■ In the Audi RS 6 Avant, less is more. The reduced vehicle mass improves its power-to-weight ratio, making your driving even more dynamic. The enormous maximum torque of 700 Nm makes sure of that. The 4.0 litre V8 TFSI 412 kW engine accelerates powerfully from 0 to 100 km/h in only 3.9 seconds.

The RS 6 is not only irresistibly dynamic, it is efficient as well. Audi cylinder on demand switches four of the eight cylinders off if they are not needed – without you noticing. The engine still runs smoothly and powerfully, but needs less energy – thus reducing emissions.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

Less ratio.

More
feeling.

Go on, give in to your enthusiasm – the Audi RS 6 Avant deserves it. Clear, precise lines define its muscular stature, the characteristic bumper design underlines the sporty exterior. Large air inlets and the optional LED headlights are additional highlights at the front. At the rear, special details indicate that the RS 6 is a high-performance model: the large oval-shaped tailpipe trims, for example, the striking diffuser insert and the RS 6 logo on the luggage compartment lid.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

■ The optional ceramic brake is visible through the optional 21-inch wheels in 5-twin-spoke design. Accentuated wheel arches and sill extensions define the vehicle's powerful side line; an enlarged roof edge spoiler underlines the athletic rear. The Audi Singleframe, exterior mirror housing, roof rails and the trim strips are designed in a discreet matt aluminium look.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

More exclusivity.

Fewer
effects.

■ Illuminated door sill trims welcome you into the Audi RS6 Avant, and exclusive inlays in carbon emphasise the sporty atmosphere of the interior. A honeycomb pattern decorates the RS sport seats, available in Valcona leather on request, the contoured shape of which provides excellent lateral support even during challenging drives. The RS multifunction sport leather steering wheel in 3-spoke design with shift paddles in aluminium look is pleasant to grip when steering and changing gear. And you have intuitive control over many vehicle functions via the MMI® navigation plus with MMI touch.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

■ Enjoy the dynamism and take full control. The standard RS adaptive air suspension provides superb road handling. On request, the RS sport suspension plus with Dynamic Ride Control (DRC) further reduces the nodding and pitching movements of the vehicle. The quattro permanent all-wheel drive with self-locking centre differential and wheel-selective torque distribution also gives you superb traction, dynamic handling and excellent directional stability. The result is uncompromisingly spirited driving.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

More gears.

Less

time lost.

■ The 8-speed tiptronic supports you with quick, precise gear changes – all to suit your personal style. With the Dynamic Shift Program (DSP) the transmission adapts to your driving style and changes gear at just the right moment. In addition to the Drive mode (D), the Sport mode (S) is also available, which you can use to make your driving even more dynamic. But at the same time the tiptronic also increases efficiency with its large transmission ratio spread.

In addition, Audi drive select gives you further individuality. It enables you to influence a range of vehicle components at the press of a button, for example the accelerator characteristics, the steering system and the suspension, to experience an even sportier and more balanced drive.

▀ Dynamics, power and versatility. Uniquely interpreted. It's hard to express all that's in the Audi RS 6 Avant in just a few words. It has to be experienced – with lots of excitement. Climb in.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

Audi ultra:

Every gram less extends the lead.

Audi ultra, the pioneering lightweight technology from Audi, is more than just the sum of its individual components. It combines innovative materials, intelligent design principles and production processes that use resources sparingly into an overall concept. Many Audi ultra lightweight measures have already been implemented in the Audi RS 6 Avant.

That starts with the body itself. The aluminium hybrid body combines low weight with high rigidity. The body is produced in a hybrid steel-aluminium design. This provides a high level of safety with an agile driving sensation – and

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

reduced fuel consumption. The aluminium components on the front and rear axles as well as the lightweight forged aluminium wheels consistently implement this lightweight theme. Innovative wave brake discs with a wave-shaped contour and aluminium brake disc chambers specifically reduce the weight on the wheels. The resulting reduction in unsprung masses leads to improved rolling characteristics.

Technologies such as FSI® direct fuel injection and turbo charging have made Audi engines more and more powerful. The modern 4.0 litre V8 TFSI engine in the RS 6 Avant produces more power

with less displacement and is therefore significantly lighter than similar engines in previous series.

Each lightweight component has an effect on other components, allowing their dimensions to be reduced as well. The result is a continuous development process towards less and less weight and more and more efficiency. In figures: a vehicle that weighs 100 kg less can save up to 0.3 litres of fuel per 100 km.

- Aluminium sheet
- Cast aluminium
- Aluminium profile
- Hot-formed steel
- Cold-formed steel

About weight reduction

The demands placed on modern vehicles are contradictory. On the one hand, they must offer enhanced performance and comfort, on the other they need to be more economical and efficient. Audi ultra resolves this conflict by examining each and every component. We demand the highest functionality combined with the lowest possible weight. The result is an intelligent mix of materials that even allows a reduction in engine size: lighter vehicles no longer need a large engine to be agile. In 2013 and the two preceding years, it was a significantly more compact and lightweight V6 TDI engine that powered multiple Audi R18 podium finishes at the 24 Hours of Le Mans. Their victorious predecessor in 2010, the R15 TDI, had featured a larger V10 TDI engine.

V8 engine with 3,993 cc of displacement

- maximum power output 412 kW at 5,700–6,600 rpm
- maximum torque 700 Nm at 1,750–5,500 rpm
- specific power output 103.2 kW/l of displacement
- turbocharging with up to 1.2 bar
- FSI direct fuel injection with up to 140 bar

Intelligent power.

Audi cylinder on demand in the TFSI® engine.

The Audi RS 6 Avant has a V8 4.0 TFSI engine that features the innovative Audi cylinder on demand. This ensures that during partial load operation, only four of the eight cylinders are used – without you noticing the difference. The engine always runs smoothly and powerfully, but it uses less fuel and emits less CO₂.

We describe its mode of operation as “intelligent performance”. Audi cylinder on demand selectively closes certain cylinders, two per cylinder bank. As a result, the engine runs impressively smoothly even during partial load operation.

The deactivation depends on several factors: the revs are between 960 and 3,500, the engine temperature must be at least 30 °C and you must be in at least third gear. If you then do not need the full power of eight cylinders, the Audi valvelift system closes the intake and outlet valves and switches off the injection and ignition of the corresponding cylinders. This means that neither is air taken in and fuel injected, nor is exhaust gas emitted. In other words: the consumption and emission values are noticeably improved.

In addition, the V8 4.0 TFSI engine features a start-stop system and recuperation, and it goes without saying that it complies with the EU5 emission standard.

Thanks to its very spontaneous responsiveness and exceptional power delivery across the entire engine speed range, the 8-cylinder engine promotes an impressive driving style. Its 412 kW accelerate the RS 6 Avant at a torque of 700 Nm from 0 to 100 km/h in 3.9 seconds. The engine is electronically regulated at 250 km/h, but by request also at 280 or 305 km/h.

When does the tiptronic change to the next gear?

At just the right time.

A high-performance vehicle needs an appropriate transmission. Which is why the Audi RS 6 Avant has an automatic transmission that stands out due to fast gear changes and a high degree of efficiency.

The 8-speed tiptronic transmission enables spontaneous, highly flexible gear changes. Its wheel set concept with four wheel sets requires only five gear change elements, of which two are opened in each gear. Three multi-plate clutches and two brakes work with a high degree of efficiency – or, put another way: with particularly short gear change times.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

The gear changes occur within the optimal speed range – this reduces power flow losses and allows you to move with agility. The Dynamic Shift Program (DSP) determines the suitable gear changing point itself, and adapts to your individual driving style. The DSP accesses route data in the standard MMI navigation plus with MMI touch. This way it can include corners in its shifting strategy and avoid unnecessary gear changing. Along with the Drive mode (D), the additional Sport program (S) offers a sportier driving style using gear change points that are set later.

You can influence manual gear changes at any time with the shift paddles on the steering wheel or by briefly touching the gear lever, for example for more dynamic performance or to drop gears for enhanced engine braking on winding, hilly roads.

With its cleverly designed gear changing mechanism and the large transmission-ratio spread, the tiptronic helps to reduce consumption and emission values and combines comfort while changing gear and driving off with impressive driving dynamics.

Why only use two wheels when a car has four?

The quattro® permanent all-wheel drive.

Those who know Audi know quattro. And once you have driven with the permanent all-wheel drive from Audi, you won't want to drive with anything else. Why? Because there is almost no other drive system around that transfers engine power to the road so directly.

The central component of the quattro drivetrain on the Audi RS 6 Avant is the self-locking centre differential. With its consistent lightweight construction, a weight advantage has been achieved over the previous version. The purely

mechanical planetary transmission distributes the drive torques asymmetrically between the front and rear axle in a 40:60 ratio for better driving dynamics in the basic design. But if necessary up to 70 % can be distributed to the front or up to 85 % to the rear to offset any occurring wheel slip.

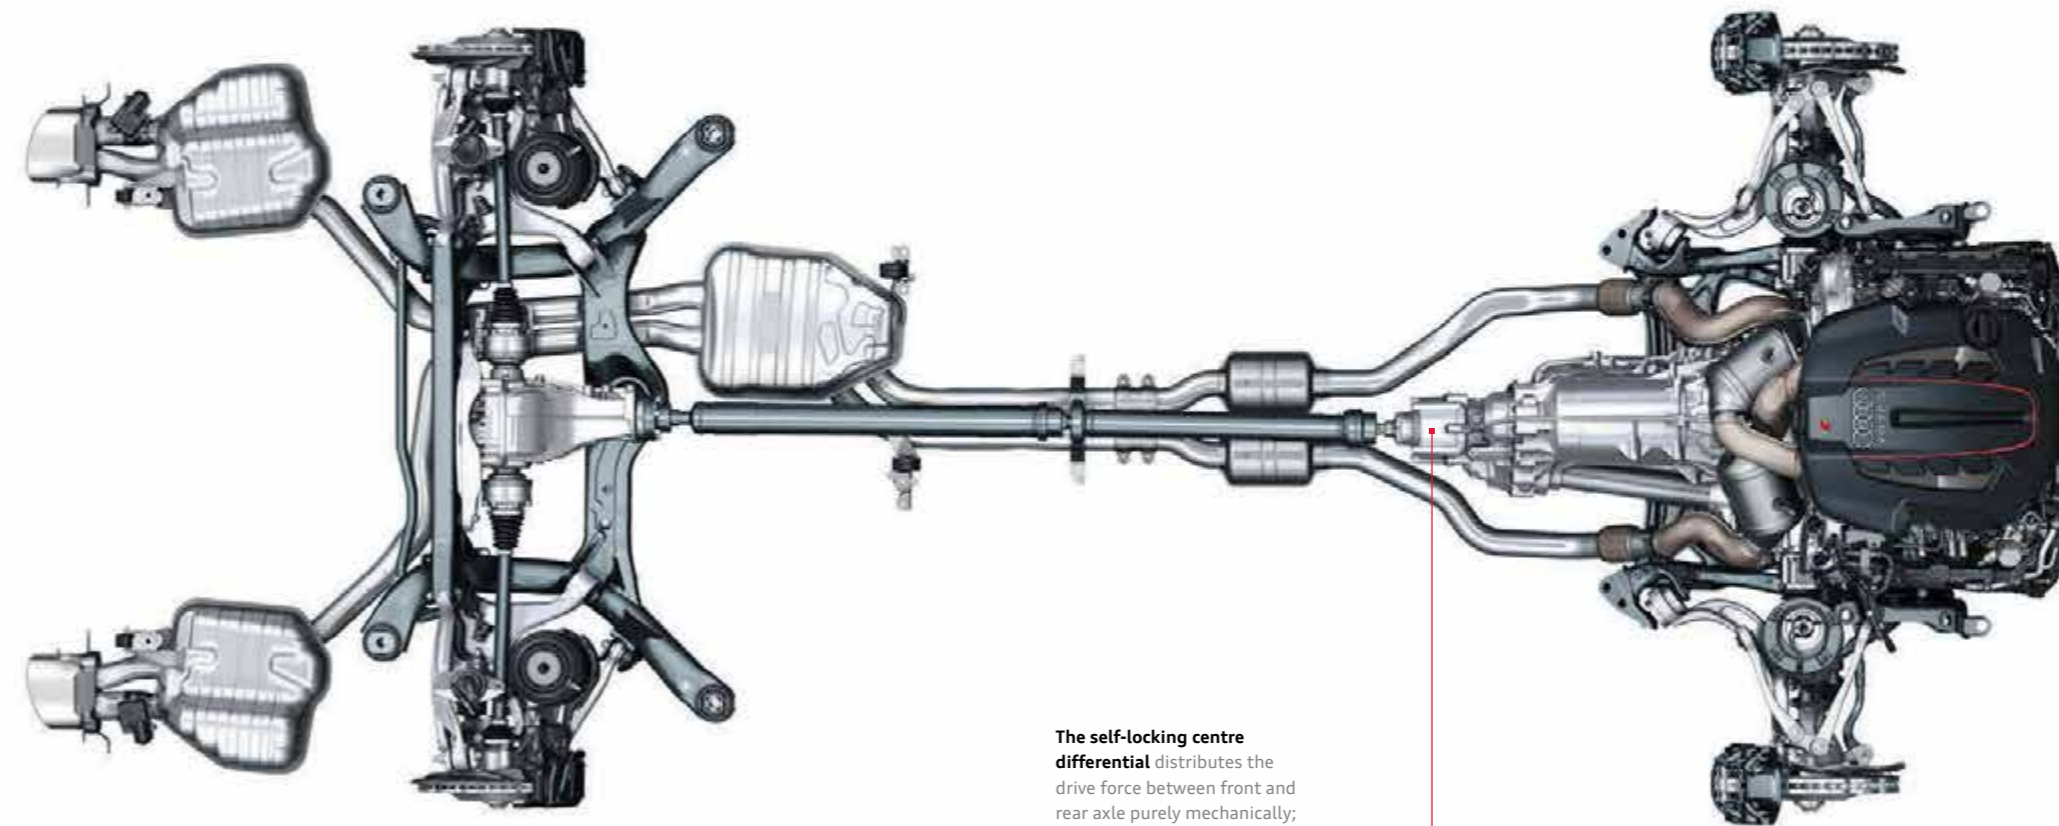

In conjunction with the wheel-selective torque control, the drive force is distributed to each individual wheel according to the driving situation. What is special here is the way the effects of the torque distribution are felt before

undesirable wheel slip occurs. This allows a yaw moment to be produced, which supports cornering.

The result is precisely controlled and sporty handling with increased agility and superb traction at the same time.

On request the quattro drivetrain can be fitted with sport differential on the rear axle, in order to further enhance driving dynamics.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

The self-locking centre differential distributes the drive force between front and rear axle purely mechanically; up to 70 % to the front axle or up to 85 % to the rear axle, as required

Superb performance can be learnt.

From one's suspension, for instance.

Whether on long journeys or quick trips, the RS adaptive air suspension gives the Audi RS 6 Avant excellent road handling while giving you poise. It combines precise steering characteristics, outstanding grip and high agility.

The front axle is a 5-link construction, while the rear axle follows the self-tracking trapezoidal-link principle. Many vehicle components are made of aluminium to reduce weight and keep the unsprung masses low.

The RS adaptive air suspension combines an air suspension with a variably adaptive damper system. Sensors on the body and on the axles monitor the current driving situation and send information to the system during the journey.

This suspension also allows for various trims on the vehicle and simultaneously acts as a level regulator so that driving features are not compromised even with a heavy load.

The RS sport suspension plus with Dynamic Ride Control (DRC) is available as an option. With this suspension variant with steel springs and shock absorbers with variable characteristics, the nodding and pitching movements of the vehicle around the lateral and longitudinal axes are reduced purely by hydraulic means. The diagonal dampers are connected to one another via oil pipes and one central valve each. If the dampers are immersed differently, for example during fast cornering, the valves affect the oil flow on the cushioned wheel. They increase

support there, thus reducing side tilt and enhancing driving dynamics.

With Audi drive select, you can select different modes to adjust the damper properties of the suspension and, in the case of RS adaptive air suspension, the trim of your vehicle. The damper recognition can be varied in three stages: comfort, auto and dynamic. Depending on the setting selected, both suspensions offer a wide scope for any route and for your driving style.

In order to do justice to the dynamic demands made of a high-performance vehicle, the characteristic curves of the springs and dampers, as well as the rigidity of the tubular stabilisers, have been developed and put through their paces

in an extensive series of tests, including some conducted on racing tracks.

Equally, the electromechanical power steering was given a specific characteristic curve as part of its adaptation to the Audi RS 6 Avant. It works with variable steering support, depending on the speed. Thanks to the low-position configuration, the steering forces are conducted just a short distance to the wheels, which provides a spontaneous steering response and gives you precise feedback from the road. Since the steering requires almost no energy when driving in a straight line, it also helps to reduce fuel consumption.

RS sport suspension plus with Dynamic Ride Control (DRC)

Thanks to the hydraulic links between the diagonal shock absorbers, the nodding and pitching movements of the vehicle are reduced, leading to enhanced drive dynamics. The damper recognition can be varied in 3 stages via Audi drive select: comfort, auto, dynamic.

Nothing can stop a top athlete.

Except for a top brake system.

The standard 19-inch RS brake system takes a powerful hold with its 6-piston fixed callipers on the front axle. The wave brake discs comprise a cast friction ring with a wave-shaped outer contour which is connected to the brake disc chamber by means of aluminium pins. This so-called floating mounting ensures that the friction ring remains tension-free to a major extent, improving stability under high temperature loads. In addition, the axial perforation and cooling channels for internal ventilation improve the performance of the brake discs. The use of aluminium and the characteristic geometry of the friction rings reduce the weight of the brake discs, thus improving the balance of unsprung masses.

The optional 20-inch ceramic brake* is available for even more demanding loads. With this brake system, the brake discs are made of a carbon-fibre reinforced ceramic material. This is based on hard and abrasion-proof silicon carbide with high-strength carbon fibres embedded. This combination results in an enormous abrasion resistance which allows extremely high mileages to be achieved and at the same time reduces sensitivity to high thermal loads. In addition, the material is lighter than steel discs.

20-inch ceramic brake*

19-inch RS braking system

The brake discs on the front axle have a diameter of 390 mm and a wave-shaped outer contour. The high-gloss black painted brake callipers bear the RS logo.

The brake discs on the front axle have a diameter of 420 mm. The high-gloss anthracite painted brake callipers bear the "Audi ceramic" logo.

*Please consult your Audi partner or national Audi website to find out more about the special features of the ceramic brake.

Why does the Audi RS 6 Avant suit you so well? Because it adapts itself to you so well.

Audi drive select.

comfort

dynamic

auto

individual

With the standard Audi drive select you can influence individual vehicle components at the push of a button and so change the character of your Audi RS 6 Avant. Generally speaking, the accelerator pedal characteristic curve, exhaust flap control, gear mode, damper regulation of the RS adaptive air suspension and steering torque of the electromechanical power steering can be configured.

You have four modes available to adapt these components to the individual driving situation.

The fuel consumption and CO₂ emission figures as well as the efficiency class can be found on page 56.

- variable damper regulation
- variable gear change characteristics
- variable accelerator pedal characteristic curve
- variable steering torque

- quattro with sport differential
- reversible seat belt tensioner
- dynamic steering
- RS sport suspension plus with Dynamic Ride Control (DRC)
- cornering light
- adaptive cruise control

Auto mode is the setting that defines the superior sporty quality of the Audi RS 6 Avant. Comfort mode is particularly suitable for longer distances, whereas the dynamic mode is designed for more ambitious driving. In individual mode you can configure the individual components yourself.

In addition, various optional systems can be influenced. For example, the characteristic curves of the shock absorbers of the RS sport suspension plus with Dynamic Ride Control (DRC)

can be varied in three levels: from balanced rolling in comfort mode through to sporty, direct responsiveness in the dynamic setting.

The optional dynamic steering allows the steering ratio and support to be changed depending on driving speed and the Audi drive select mode selected.

In conjunction with the equipment version quattro with sport differential, an additional infinitely variable distribution of the drive force

between the rear wheels takes place. This torque manipulation specifically influences the vehicle's steering behaviour and increases agility even further, in line with the Audi drive select setting.

The cornering light function of the adaptive light or the reactions of the adaptive cruise control can also be set to be either more gradual or more spontaneous. In dynamic mode the trigger thresholds of the reversible seat belt tensioners (with Audi pre sense basic series onward) can also be adjusted.

It is the equipment that turns an Audi into your Audi.

Style guides: many combination possibilities. Here are two of them.

Audi RS 6 Avant in Misano red, pearl effect

cast aluminium wheels in 5-twin-spoke design in gloss black, gloss turned finish

Comfort seats, front, with memory function
with electric adjustment of seat height, fore/aft position, backrest angle, seat angle and thigh support; pneumatic adjustment of seat and backrest bolsters, as well as lumbar support; manual adjustment of head restraint height and clearance, as well as belt height; includes memory function for driver and front-passenger seat, electric steering wheel adjustment as well as exterior mirrors; optional front-seat ventilation.
(The image shows comfort seat, front, with memory function, and seat ventilation at the front in perforated Valcona leather, black.)

Leather upholstery and trim

Milano leather, black

Audi exclusive leather upholstery and trim

Perforated Valcona leather, black

Leather upholstery and trim**Alcantara/leather combination**

available for RS sport seats, front; seat centre sections and door trim inserts in Alcantara; seat side bolsters, head restraints, centre armrest, front as well as lower part of centre console in leather; seat centre panels on the front and outer rear seats with diamond pattern; RS 6 embossing on the front-seat backrests

Milano leather upholstery and trim

available for comfort seats, front, with memory function, and without seat ventilation, front; seat upholstery, head restraints, door trim inserts, centre armrest, front as well as lower part of centre console in leather

Valcona leather upholstery and trim with honeycomb pattern

available for RS sport seats, front: seat upholstery, head restraints, door trim inserts, centre armrest, front, and lower part of centre console in leather; seat centre panels on the front and outer rear seats with honeycomb pattern; RS 6 embossing on the front-seat backrests

Perforated Valcona leather upholstery and trim

available for comfort seats, front, with memory function and seat ventilation, front: seat upholstery, head restraints, door trim inserts, centre armrest, front, and lower part of centre console in leather; seat centre panels on the front and both outer rear seats perforated

Leather-covered armrests in the door trims

with contrasting stitching in rock grey on Valcona leather upholstery and trim with honeycomb pattern in rock grey

Leather-covered steering wheel airbag cover

available for RS multifunction sport leather steering wheel and RS multifunction sport leather steering wheel, heated*: in black leather

Audi exclusive leather package including airbag cover

armrests in the door trims, lower part of centre console and airbag cover on the steering wheel leather-covered; individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours; in conjunction with RS multifunction sport leather steering wheel; flattened at the bottom without leather-covered airbag cover

Extended Audi exclusive leather package

dashboard underside including glove compartment and storage on the driver's side, armrests in the door trims, centre console, as well as lower part of centre console in leather; individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours; steering wheel airbag cover leather-covered, black; in conjunction with RS multifunction sport leather steering wheel, flattened at the bottom, without leather-covered airbag cover

Audi exclusive leather upholstery and trim in Alcantara/Valcona leather (package 1)

available for RS sport seats, front: seat side bolsters, head restraints, centre armrest, front, and lower part of centre console in leather; seat centre panels on the front and outer rear seats in Alcantara with diamond pattern as well as door trim inserts in Alcantara; RS 6 embossing on the front-seat backrests. Choice of colour for leather, Alcantara and decorative stitching from the Audi exclusive range of colours.

Audi exclusive leather upholstery and trim in Valcona leather (package 1)

available for comfort seats, front, with memory function; seat upholstery, head restraints, door trim inserts, centre armrest, front, as well as lower part of centre console in leather. Individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours.

Leather upholstery and trim in Valcona leather Audi exclusive (package 2)

available for comfort seats, front, with memory function, in addition to package 1: armrests in the door trims and seat backrest covers leather-covered, seat attachments matched to the leather colour. Individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours.

Audi exclusive piping for comfort seats

Individual choice of colour for the piping from the range of Audi exclusive colours.

Leather upholstery and trim in Valcona leather with Audi exclusive honeycomb pattern (package 1)

available for RS sport seats, front: seat side bolsters, head restraints, door trim inserts, centre armrest, front and lower part of centre console in leather; seat centre panels on the front and outer rear seats with honeycomb pattern; RS 6 embossing on the front-seat backrests. Individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours.

Leather upholstery and trim in Valcona leather with Audi exclusive honeycomb pattern (package 2)

available for RS sport seats, front, in addition to package 1: armrests in the door trims and seat backrest covers leather-covered, seat attachments matched to the leather colour. Individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours.

Design package in Valcona leather with Audi exclusive honeycomb pattern

available for RS sport seats, front: seat upholstery, head restraints, door trim inserts, centre armrest, front, armrests in the door trims as well as lower part of centre console in black leather with crimson red stitching; seat centre panels on the front and outer rear seats with honeycomb pattern in crimson red; RS 6 embossing on the front-seat backrests; includes floor mats in black with leather piping in crimson red, controls with crimson red stitching and seat belts in crimson red

Audi exclusive leather-covered seat trims

available for comfort seats, front, with memory function, and RS sport seats, front, electrically adjustable: seat side trims and front trims (comfort seats, front) and the trims of the extendable thigh support (RS sport seats, front) are leather-covered in fine Nappa leather; seat side trims with decorative stitching; switches and handles for seat adjustment in black (not leather-covered). Individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours.

Inlays

full-surface for the dashboard, door trims and centre console; all-round inlay, surrounds for door trims and centre console in aluminium look; when fitted with inlays in aluminium race and matt brushed aluminium without surround for centre console in aluminium look

Audi exclusive inlays

available in fine grain ash, nougat, oak, sepia, fine grain myrtle, nutmeg, vavona, bronze, modrone, gold, tamo ash, natural dark brown

| Lights |
|--------|
|--------|

Xenon plus
The headlights with durable gas discharge technology for dipped and high beam ensure intensive illumination of the road and provide good uniformity and range both close up and in the distance; including all-weather light. The automatic dynamic headlight beam control reduces dazzle for oncoming traffic; including homogeneous rear light and daytime running light strip, indicators and brake lights as light strips, all in LED technology with low power consumption; including headlight cleaning system.

adaptive light including variable headlight range control

consisting of dynamic cornering light, static turning light and variable headlight range control; the dynamic cornering light infers the course of the road from the movement of the steering wheel and variably illuminates the bend by pivoting the xenon headlights; operational between speeds of approximately 10 km/h and 110 km/h. The static turning light automatically switches on if the indicators have been engaged for a while at a low vehicle speed and illuminates the new direction in which the vehicle is travelling. The variable headlight range control features a camera on the interior mirror which registers sources of light from other road users. The range and width of the headlight beam are continuously varied between dipped and high beam to suit ambient conditions, ensuring that the headlights provide good visibility without dazzling other road users. The headlights also have 3 different light distribution modes which are activated according to the vehicle speed: town light, motorway light and country light. In addition, Audi connect enables controlling of these 3 light distribution modes and the intersection light by the vehicle support based on navigation data, and with the aid of stored route data from the MMI navigation plus with MMI touch. The convenient functions of the lighting assistant are supplemented by the travel mode, with GPS-assisted switching between right and left-hand drive modes. Including headlight cleaning system

LED headlights
featuring LED dipped beam, high beam, daytime running lights, indicators and static turning light as well as all-weather light and motorway light function with LED technology; darkened headlight masks; includes high-beam assist for automatic switching between high and dipped beams, an all-weather light function to reduce the risk of the driver being dazzled when visibility is poor (in fog, rain or snow) and an additional motorway light which automatically increases headlight range from a speed of approximately 110 km/h. LED technology allows near daylight illumination of the road for increased safety and comfort. Minimum energy requirements, long service life and excellent recognition by other road users; including headlight cleaning system

High-beam assist
working within system limits, automatically detects the headlights of oncoming traffic, the rear lights of other road users and built-up areas. Depending on the traffic situation, the high beam automatically adjusts to dipped beam and vice versa.

LED rear lights
with darkened masks; LED brake lights, rear fog lights, indicators and rear number plate lights; faster activation means earlier recognition by the driver behind; reversing lights in white, 3rd brake light integrated in the RS roof edge spoiler

Adaptive brake light
brake light flashes during an emergency stop to warn following traffic, automatically activates the hazard warning light if the vehicle comes to a standstill

Light/rain sensor
to control the automatic lights-on function, the automatic windscreen wiper function, including coming home/leaving home function: delayed switching-off/ automatic switching-on of the main headlights, LED daytime running lights, rear and number plate lights when parking/opening the vehicle

Ambient lighting
including integrated eyewear compartment in the roof module; with delayed switch-off and contact switches on all doors, glove compartment and luggage compartment light as well as courtesy lighting in the tailgate, active door reflectors; LED technology for courtesy lighting on the underside of the door handles and door handle lighting to facilitate entry and exit in the dark as well as entrance light at the front and rear; anti-glare lighting for the passenger compartment in LED technology:

- 2 reading lamps each at the front and rear
- Ilumination of door pockets, inside door handles, vanity mirrors and the footwell
- Ambient reflected lighting for the centre console and insides of the doors for better orientation in the vehicle
- Surround lighting for the centre console

Ambient lighting can be configured using the MMI

| Mirrors |
|---|
| Exterior mirrors with integrated LED indicator electrically adjustable and heated; convex, flat or aspherical mirror glass |
| also optionally: |

electrically adjustable and heated
with memory function including automatic kerb-side function for the exterior mirror on the passenger side

electrically adjustable, heated and folding
with memory function including automatic kerb-side function for the exterior mirror on the passenger side

electrically adjustable, heated and folding, automatically dimming
with memory function including automatic kerb-side function for the exterior mirror on the passenger side

The automatic kerb-side function tilts the exterior mirror on the passenger side downwards when reverse gear is engaged, giving the driver a better view of the kerb.

| Exterior mirror housing |
|-------------------------------|
| choice of: |
| in matt aluminium look |
| painted in body colour |
| in carbon |

| Interior mirror |
|--|
| choice of: |
| dimming |
| automatically dimming recognises with the aid of a photocell when the headlights behind are too bright and dims automatically |

| Roof systems |
|--|
| Panoramic glass sunroof 2 sections, electrical activation to raise and open the front glass section, tinted glass insert; including an electrically operated sunblind for the front and rear passengers, convenient closing/opening from the outside via remote control key; ensures a comfortable interior that is flooded with light; improved interior climate by means of efficient ventilation |
| Roof rails in matt aluminium look one piece, no joints, sturdy, aerodynamic shape |

| Closing systems |
|---|
| Remote control key opens and locks doors, luggage compartment lid and tank flap; includes convenient closing/opening of the windows; with RS emblem |
| Engine start-stop button The engine is started and switched off via the engine start-stop button in the centre console; the key only needs to be carried with you. |

| Convenience key |
|---|
| access and drive-away authorisation system, the key only needs to be carried with you; the vehicle is locked and unlocked from outside via sensors on all handles. The luggage compartment lid can also be opened separately when the vehicle is locked. |
| Power-assisted closing for the doors automatically pulls the doors into the locks when not fully closed |
| Garage door opener (HomeLink) programmable radio-operated remote control, operating buttons integrated into the front roof module; can be used to open many garage doors and exterior gates; allows control of security and lighting systems; step-by-step programming assistance provided by the MMI, code identification guidance and set-up assistance from appropriate logbook information on the screen. User-friendly thanks to highly integrated networking with MMI. For information on compatible hand-held transmitters, please contact your Audi partner or visit www.eurohomelink.com. |

| Luggage compartment lid with electric opening and closing function |
|---|
| opens via a button on the remote control, the button in the driver’s door panel, the soft-touch button on the luggage compartment lid handle recess or a foot gesture (kicking movement) in conjunction with the optional comfort key including sensor-controlled release of the luggage compartment lid; closed by a button on the inside of the luggage compartment lid, the button on the driver’s door panel or via the optional comfort key (long press); including power assisted closing and programmable luggage compartment lid opening angle, and an electrically opening and closing luggage space cover, also manually operated |
| Convenience key including sensor-controlled release of the luggage compartment lid access authorisation system: The key only needs to be carried with you; the vehicle is locked and unlocked from outside via sensors on all 4 door handles; including opening and closing function for the luggage compartment lid. Upon detection of a specific foot gesture (kicking motion), a sensor in the rear bumper initiates a convenience key search in the area to the rear of the vehicle. When the key is detected, this opens the luggage compartment lid. For extra comfortable loading of the luggage compartment. |

| Anti-theft alarm |
|--|
| with tow-away protection via angle of inclination sensors (can be switched off); including interior monitoring system which can be switched off; signal horn for monitoring doors, bonnet and luggage compartment lid independent of vehicle electrical system |
| Preparation for tracking system preparation for connecting a tracking system (available from Audi Genuine Accessories) that enables a stolen vehicle to be located |

| Glazing |
|---|
| Heat-insulating glass tinted green; windscreen in laminated glass; heated rear window, with timer switch |
| Insulating/acoustic glass 2 panes of glass bonded together by a plastic film; improves exterior noise insulation and theft protection; with additional reflective coating to reduce the build-up of heat in the interior; windscreen with viewing window for toll collection devices |
| Dark-tinted windows (privacy glazing) dark-tinted rear window, rear door windows and rear side windows |

| Insulating/acoustic glass and dark-tinted windows (privacy glazing) |
|--|
| windscreen and front door windows in insulating/acoustic glass; dark-tinted rear window, rear door and rear side windows; windscreen with viewing window for toll collection devices |
| Sun visors for the driver and front-passenger side; can be folded and swivelled; with covered, illuminated vanity mirror |

| Manually operated sunblind |
|---|
| for the rear window and the rear door windows |

| Further exterior equipment |
|--|
| Provision for trailer towing hitch includes fitting for the control units and reinforced engine cooling |

| Trailer towing hitch |
|--|
| bar and ball head made from forged steel, mechanically swivelling; operated via draw-button in the luggage compartment, with control light on the draw-button and display in instrument cluster to monitor secure attachment of trailer towing hitch; includes trailer stabilisation system via the Electronic Stabilisation Control (ESC) |

| Trim strips |
|--|
| window slot and roof frame trims in matt aluminium look, B-pillar trim and triangular panels on the rear doors in high-gloss black |

| Audi Singleframe |
|--|

| Engine cover |
| with carbon application |

| |
|---|
| Seats/seating comfort |
| 4-way lumbar support for the front seats electric, with horizontal and vertical adjustment |

| |
|--|
| Front seats, electrically adjustable with memory function for the driver seat |
| with electric adjustment of seat height, fore/aft position, seat and backrest angle; includes electric 4-way lumbar support; 2 pre-sets for the electrically adjustable driver seat, the electric steering wheel adjustment and the exterior mirrors |

| |
|--|
| RS sport seats in the rear |
| 2 single seats in the rear with shaped side bolsters and integrated head restraints, visually matched to the front seats; rear seat backrest can be split-folded 40 : 60 or fully; with remote backrest release in luggage compartment; rear seat bench with integrated storage compartment in the centre |

| |
|--|
| ISOFIX child seat mounting for the outer rear seats |
| standard bracket for the practical fastening of child seats in accordance with ISO standards; compatible child seats can be obtained from your Audi partner. |

| |
|--|
| ISOFIX child seat mounting for the front-passenger seat |
| with passenger airbag deactivation switch, includes separate electric child-proof lock on rear doors |

| |
|--|
| Rear seat system with 3 seats |
| visually matched to the front seats; 3 head restraints in L-shape, height manually adjustable; backrest can be split and folded 40 : 60 or fully; with remote backrest release in luggage compartment; including fold-out centre armrest with storage compartment |

| |
|---|
| Massage function, front |
| massages the muscles using 10 pneumatic cushions; 5 different programs (Wave, Tapping, Stretch, Lumbar, Shoulder), each offering 5 levels of intensity; can be selected via multifunction switches on the seat or via MMI |

| |
|--|
| Seat ventilation, front |
| active seat ventilation of the seat and backrest centre panel, as well as thigh support for the driver and front-passenger seats; the system ensures a pleasant seating climate can be enjoyed even at high ambient temperatures; adjustable in 3 stages directly from the air conditioning control; if front-seat ventilation is fitted, the leather on the front and outer rear seats is perforated. |

| |
|--|
| Seat heating, front |
| heats the seat and backrest centre panels, and seat side bolsters; can be individually adjusted in 3 stages for the driver and front-passenger side via a direct selection button on the air conditioning controls |

| |
|--|
| Seat heating, front and rear |
| functions same as for front-seat heating, also for the outer rear seats, can be regulated separately |

| |
|--|
| Centre armrest, front |
| for driver and front passenger, adjustable angle, with fold-open storage compartment |

| |
|--|
| ISOFIX child seat mounting for the outer rear seats |
| standard bracket for the practical fastening of child seats in accordance with ISO standards; compatible child seats can be obtained from your Audi partner. |

| |
|--|
| ISOFIX child seat mounting for the front-passenger seat |
| with passenger airbag deactivation switch, includes separate electric child-proof lock on rear doors |

| |
|---|
| Steering wheels/selector levers/controls |
| RS multifunction sport leather steering wheel in 3-spoke design, flattened at the bottom with shift paddles in aluminium look and RS 6 emblem; full-size airbag, upholstery in perforated leather with decorative stitching in rock grey, adjustable in height and reach; for operating the provided infotainment features |

| |
|---|
| RS multifunction sport leather steering wheel in 3-spoke design |
| with shift paddles in aluminium look and RS 6 emblem; full-size airbag, upholstery in perforated leather with decorative stitching in rock grey, adjustable in height and reach; for operating the provided infotainment features |

|--|
| Driver information system with 7-inch colour display |
| high resolution TFT colour display directly in the driver's field of vision; displays information from the MMI system, infotainment systems and driver assistance systems; display of trip computer with long and short term memory, digital speedometer, display of gears, external temperature and door and luggage compartment lid control; RS menu with gear changing light, charging pressure and oil temperature display, as well as lap timer; operation via multifunction sport leather steering wheel; including attention assist |

| |
|---|
| Attention assist |
| part of the driver information system; the attention assist analyses driving behaviour using a range of sensors. Steering movements and pedal actuation, for example, are recorded and compared with the individual driving patterns of the respective driver. If the evaluation indicates that the driver's attention is lapsing, the system recommends a break by means of a display in the driver information system and an acoustic signal. The system is active between 65 km/h and 200 km/h and can be deactivated at any time. |

| |
|---|
| Radio and TV systems |
| Digital Audio Broadcasting In addition to the range of analogue stations, programmes from digitally broadcast radio stations with better sound quality can be received according to DAB standard, including DAB+ and DMB audio. Display of additional information accompanying the programme (e.g. artist, title, cover) in the form of a slide show and other programme-independent data services (e.g. weather, traffic, news). A second DAB tuner continuously searches for alternative reception frequencies of the set station, and the station list is updated at the same time. Please note: reception depends on local digital network availability; contents and scope of the additional information depend on provision by the respective radio station. |

Digital TV reception

reception of digitally-broadcast (DVB-T), uncoded television stations (MPEG-2 or MPEG-4 standard), DVB-T audio stations, teletext and Electronic Programme Guide (EPG); external AV-IN connection via adapter cable (available through Audi Genuine Accessories). Please note: TV reception depends on digital network availability; no picture possible when the vehicle is moving

Audi sound system

10 speakers including centre speaker in the dashboard and subwoofer in the spare wheel well, 6-channel amplifier with a total output of 180 watts

BOSE surround sound

surround sound reproduction with 14 speakers including centre speaker in the dashboard and subwoofer in the spare wheel well; 12-channel amplifier with over 600 watts of total output; powerful and accurate bass reproduction, lifelike sound with natural tone and a feeling of space for an impressive sound experience; sound system very well matched to the interior acoustics of the vehicle; AudioPilot® for noise-dependent volume adjustment; 2 surround sound speakers in the D-pillar; 5:1 surround sound reproduction is possible

Bang & Olufsen Advanced Sound System

surround sound reproduction with 15 loudspeakers including subwoofer and centre speaker, each with its own amplifier channel; polished loudspeaker covers in aluminium; automatically extending acoustic lenses for excellent sound performance and perspective from every seat; 10-channel DSP all-digital amplifier; all-digital highly efficient 5-channel ICE-Power amplifier for woofers and subwoofers; with total output of over 1,200 watts; 5.1 surround sound reproduction possible; privacy function: encapsulated loudspeaker casings minimise escape of sound to the outside of the vehicle and provide privacy, for example when making telephone calls in hands-free mode; a precisely defined loudspeaker effect has also been achieved; noise-dependent volume adjustment

CD changer

in the glove compartment, for 6 CDs (MP3 and WMA capable), shock resistant, CDs can be loaded and changed individually. Music files with digital rights management (DRM) cannot be played.

DVD/CD Changer

in glove compartment, for 6 DVDs or CDs, supports e.g. audio CDs, video DVDs and MP3, WMA, AAC, MPEG4 and playlists; shock-resistant; DVDs and CDs can be changed individually, supports up to 4,000 tracks per medium. Music files with digital rights management (DRM) cannot be played.

Audi music interface

for the connection of portable media players such as Apple iPod, Apple iPhone (music functionality) as well as USB storage media and MP3 players. The Audi music interface is housed in the centre console; it is operated via the MMI or an RS multifunction sport leather steering wheel.

Note: can only be used in conjunction with a special adapter cable (available from Audi Genuine Accessories). Please contact your Audi partner or visit www.audi.com/mp3 for information on compatible media players. If Audi music interface is ordered the separate AUX-IN connection is omitted.

Adapter cable set for Audi music interface

consisting of 2 connection cables for the connection of iPod/iPhone or data carrier/media player with USB connection (Type A); further adapter cables available from Audi Genuine Accessories. Please contact your Audi partner and visit www.audi.com/mp3 for information on compatibility.

Adapter cable set plus for Audi music interface

in addition to the adapter cable set for Audi music interface: support for the representation of cover arts and video function, depends on the iPod used; can only be used in conjunction with more recent iPod generations, for information on compatibility visit www.audi.com/mp3

Preparation for Rear Seat Entertainment

includes pre-installed wiring and mounts for the holders in the driver and front-passenger seat backrests. The appropriate Audi Entertainment mobile (9-inch screen with integrated DVD player) and the holder or an iPad™ adapter are available as a plug-and-play unit from Audi Genuine Accessories.

Telephone and communication

Bluetooth interface

Bluetooth-capable mobile phones can be connected to the vehicle via the interface; hands-free calls are possible in the vehicle via the microphone; including Bluetooth audio streaming (depending on mobile phone compatibility). Please contact your Audi partner or visit www.audi.com/bluetooth for information on compatible mobile phones.

Preparation for mobile phone (Bluetooth)

comprises a hands-free facility and voice control for telephone functions as well as a fitting for optional mobile-specific charger in the front centre console; including connection to the vehicle aerial for reduced SAR radiation inside the vehicle and better reception quality; operation via the MMI navigation plus with MMI touch or an RS multifunction sport leather steering wheel. Please contact your Audi partner or visit www.audi.com/bluetooth for adapters and information on compatible mobile phones.

Bluetooth car phone

Your Bluetooth-capable mobile phone can be conveniently connected to the vehicle’s internal UMTS module (provided the mobile telephone has a SIM Access Profile); additional SIM card reader located in the surround of the MMI navigation plus with MMI touch; transfer of phone book entries to the vehicle and management of call lists; operation is via the MMI navigation system or an RS multifunction sport leather steering wheel; for information on compatible mobile phones please contact your Audi partner or visit www.audi.com/bluetooth.

Audi connect including car phone

Convenient connection of your vehicle to the internet. Use of the services supported by Audi connect is possible only with the **MMI navigation plus with MMI touch** and with the data module integrated in Audi connect including car phone. You also require a SIM card with data option – with car phone a SIM card with phone and data option or a Bluetooth-capable smartphone with remote SIM Access Profile (rSAP). There is a reader for your SIM card in the surround of the MMI navigation plus with MMI touch.

The following **services supported** by **Audi connect** are available in your model:

Mobility & navigation

- Point-of-interest search (POI) with voice control
- Traffic information online
- Navigation with Google Earth™ and Google Street View™*
- Destination entry via myAudi or Google Maps™*
- Fuel prices
- Parking information
- Country information

Communication

- Wi-Fi hotspot

Infotainment

- Weather
- Audi music stream
- News online
- City events
- Travel information

The services are available only with an existing or separate mobile phone contract and only within the range of the respective mobile phone network. Additional costs may be incurred when receiving data packets from the internet, depending on the terms of your mobile phone contract, particularly when used abroad. Because of the high data volumes involved, a data flat rate is strongly recommended.

The availability of the services supported by Audi connect varies from country to country. The services are provided for at least one year from vehicle delivery. The traffic information online service requires initial activation in the vehicle. From that point onwards, this service is subject to a 36-month usage limit (in as far as activation takes place within 6 months of vehicle delivery; otherwise corresponding shortening of the usage rights). Your Audi partner will be happy to inform you about how to extend the service and the costs this incurs.

Please visit www.audi.com/connect or contact your Audi partner for more detailed information about Audi connect; contact your mobile services provider for information about contract conditions.

Handset in the front for car phone

wireless handset with colour display and integrated SIM card reader, for making private phone calls; easy writing of text messages thanks to automatic word recognition; handset is stored in the front centre armrest

Assistance systems

Audi pre sense basic

Networking the different vehicle systems enables driving situations to be categorised and, where necessary, actions to be implemented for preventive occupant protection. These include: belt tightening, activating the hazard warning system and closing the windows as well as the panoramic glass sunroof (can be ordered as an option).

adaptive cruise control with Stop&Go function including Audi pre sense front
automatic distance control (control range 0–250 km/h); working within system limits, it uses two radar sensors and a camera to detect vehicles ahead and maintains the distance by automatic braking and accelerating; independent braking to a stop, automated restart at driver’s request; 4 distance levels and 3 driving modes (comfort, auto and dynamic) can be selected individually. The use of Audi connect services is possible: due to route data stored in the navigation system such as the sweep of bends and corners or road classifications a comfortable distance control is possible, for example if you drive again on the same winding roads. In addition to the functions of Audi pre sense basic, Audi pre sense front implements preventive occupant protection measures when threatened with an imminent frontal collision; includes Audi braking guard with driver warning through an extended brake assist feature and with preventive occupant protection. Working within system limits, Audi pre sense front utilises the front sensors of adaptive cruise control with Stop&Go function to carry out its detection tasks; extended by the function of maximum deceleration: this is initiated at speeds below 30 km/h if there is a danger of collision with a stationary or moving vehicle in order to reduce the severity of the collision or to avoid this collision if possible.

Audi active lane assist

lane compliance assistant; helps drivers comfortably keep in their respective lanes, within system limits (operating range from approx. 60 to 250 km/h maximum); if the system is activated and ready and the driver did not indicate, the Audi active lane assist will guide the vehicle within recognised lane boundary lines by means of gentle, corrective steering intervention; the driver can choose whether to be supported continuously or just shortly before crossing the road marking (choice of earlier or later steering time); additional steering wheel vibration can be adjusted if the driver wishes; additional display in the head-up display (can be ordered as an option)

Audi side assist including Audi pre sense rear
lane change assistant; working within system limits, it assists the driver when changing lanes (operating range 30–250 km/h). Displays are integrated into both exterior mirrors. Audi side assist uses 2 radar sensors to measure the vehicle’s distance from other vehicles it has detected as well as the speed difference between them. If Audi side assist classifies the speed difference and distance as being critical in the event of a lane change, a display will appear in the respective exterior mirror. In addition to the functions of Audi pre sense basic, Audi pre sense rear uses the rear sensors of Audi side assist, while working within the system limits, to detect a possible rear-end collision.

Assistance package including Audi pre sense plus

The assistance package contains the functions of the following assistance systems:

- adaptive cruise control with Stop&Go function
- Audi active lane assist
- Audi side assist
- Audi pre sense front
- Audi pre sense rear

The features of Audi pre sense basic, Audi pre sense front and Audi pre sense rear are extended by the function of a maximum deceleration to Audi pre sense plus: In addition to the functions of Audi pre sense front, Audi pre sense plus activates the Audi braking guard in certain situations in which a collision is unavoidable and initiates a maximum deceleration action to minimise the impact speed of the crash by up to 40 km/h.

Night vision assistant with highlighting of detected pedestrians

with integrated thermal imaging camera; when driving at night, this system extends the driver’s range of visibility beyond the light provided by the dipped beam; records thermal images; an image processing algorithm then evaluates the camera’s data and marks any persons it has detected in yellow in the driver information system’s colour display; the marking changes to red and a warning tone is emitted if the system, by analysing the movement and position of the person it has detected, considers that there is a possible risk. In conjunction with one of the following lighting systems, the person is also illuminated with 3 successive brief flashes of the headlights (marking light): xenon plus in conjunction with high-beam assist, adaptive light including variable headlight range control or LED headlights. Additional warning symbol in the head-up display (available as an option); image quality is affected by poor ambient conditions

Head-up display

projects as required information relevant to the driver from the assistance systems, navigation or the RS menu of the driver information system, as well as warning symbols onto the windscreen in the driver’s direct field of vision; height adjustable; provides multicoloured display with good contrast and minimal distraction from the road

Cruise control

at speeds of 30 km/h to 250 km/h and above, the system keeps the set speed constant, provided that engine power and engine braking effect permit it; operated via separate steering column stalk, set speed displayed in driver information system

Camera-based speed limit display

camera-based recognition and display of speed limits, including temporary speed limit displays (e.g. above motorways). Additionally, working within system limits, there is an evaluation of the particular situation in wet conditions, and speed limits displayed depending on the time of the day, road works and when using a trailer. If a sign has not been recognised by the camera, the speed limit displayed can be taken from the navigation data (where available) thanks to Audi connect. Additional display in the head-up display (can be ordered as an option)

The model-specific standard and optional equipment can be found in the index from page 58 onwards.

| Efficiency class | E | |
| Emission standard | EU5 | |

Explanatory notes

¹ The figure given was calculated using the specified measuring procedure (current version of Directive 80/1269/EEC).

² You will find specifications on the technical characteristics of tyres on page 63.

³ Unladen vehicle weight includes driver (68 kg), luggage (7 kg) and fuel tank 90 % full, calculated in accordance with the current version of EC Directive 92/21/EEC. Optional equipment may increase the car's unladen weight and drag coefficient, whereupon the possible payload limit and the top speed will be reduced accordingly.

⁴ The engine's power output always decreases with increasing altitude. At 1,000 m above sea level, and for every additional 1,000 m, deduct 10 % from the weight of the outfit (trailer load limit + gross weight of the towing vehicle). Figure for trailer load limit applies to factory-fitted trailer towing hitch. If using the vehicle with a trailer towing hitch for commercial purposes, a digital tachograph may be required under certain conditions.

⁵ A vehicle's fuel consumption and CO₂ emissions do not just depend on how efficiently the vehicle uses the fuel, but are also influenced by driving behaviour and other non-technical factors. CO₂ is the greenhouse gas primarily responsible for global warming.

⁶ Regulated.

⁷ We recommend using sulphur-free SuperPlus unleaded fuel (RON 98) complying with DIN EN 228. If this is not available, use sulphur-free super unleaded RON 95 complying with DIN EN 228; power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10 % (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel complying with 692/2008/EC.

⁸ The figures given were calculated using the specified measuring procedures. The figures do not refer to one individual vehicle and do not form part of any offer, but rather should be used purely for purposes of comparison between the different vehicle models.

Important note

Inspections are due as shown by the service display.

Audi RS 6 Avant**Dimensions in millimetres.**

Dimensions were measured with vehicle at unladen weight.

Luggage compartment volume 565/1,680 l (measured by the VDA method using 200 x 100 x 50 mm blocks; second value is with the rear seat backrest folded down and the vehicle loaded up to roof height). Turning circle approx. 11.9 m.

*With roof aerial the height of the vehicle is 1482 mm. **Maximum headroom. ***Shoulder room width.

****Elbow room width.

Equipment for the Audi RS 6 Avant illustrated (p. 4–21):

Paint finish: Daytona grey, pearl effect

Wheels: cast aluminium wheels in 5-twin-spoke design

Seats/seat upholstery: RS sport seats, front, in Valcona leather, black with honeycomb pattern in rock grey

Inlays: carbon

Classifications of tyre parameters

The table shows the range of fuel efficiency classes, wet grip and exterior noise emission for the different tyre sizes of the Audi RS 6 Avant.

| | Tyre size | Fuel efficiency class | Wet grip class | Exterior noise emission class |
|--------------|------------------|------------------------------|-----------------------|---|
| Summer tyres | 275/35 R 20 | E | C–A | 73–72  |
| | 285/30 R 21 | F–E | C–A | 75–71  –  |
| Winter tyres | 245/40 R 20 | E | C | 73  |
| | 285/30 R 21 | C | C | 73  |

It is not possible to order a specific tyre. Please ask your Audi partner which tyres are available in your country.

Responsibility

Living up to our responsibilities is a principle that is firmly anchored in Audi strategy. Alongside commercial success and international competitiveness, our responsibility toward company employees and society as a whole is a key consideration, as is protecting the environment and conserving resources. And what is true in the details – our catalogues are printed on FSC-certified paper – also holds in general: Audi develops cars that are not only sporty and emotive but also ever more efficient. In the long run, Audi wants its products to allow

CO₂-neutral mobility. Seeing to it that production in Audi plants gradually becomes CO₂-neutral is another aspect of our comprehensive approach. Audi is also committed to society – particularly in the fields of education, technology and social projects. At Audi, sustainability is closely linked with how we see the future: the Audi Urban Future Initiative sees Audi working with international experts to get to the root of future urban challenges and trends in mobility.

Discover the world of Audi.

Choosing an Audi means choosing a brand that offers more. More individuality. More exclusivity. More fascination.

The Audi experience

The fascination of Audi can be experienced in many different ways. Audi City in London, for example, gives you digital access to all models at their actual size and in real time. And of course it is always worth visiting one of the major motor shows. This is where Audi always presents its new models and invites you to take a look at how the future is being shaped with "Vorsprung durch Technik". Anyone interested in seeing how Audi is already putting this into practice will find fascinating insight in the "Vorsprung durch Technik" online special at www.audi.com.

But a look back can also be rewarding: at the Audi mobile museum in Ingolstadt, history and high-tech go hand in hand. A total of 130 historic exhibits and state-of-the-art forms of presentation make for a thrilling symbiosis. Plus, Audi driving experience allows you to live the excitement and countless possibilities of current Audi models. Here, pure driving enjoyment is combined with valuable learning effects. This is ensured by a team of specially trained and highly qualified instructors who provide practical tips to help you optimise your driving skills.

Team spirit

Motorsport is a driving force behind the brand. For years Audi has been among the champions in various racing series, for instance the 24 Hours of Le Mans or the DTM German Touring Car Masters. The values that are crucial in many different areas of sport are also central ones for Audi: precision, passion and technology. No coincidence then that Audi has been sponsoring sporting events for

many years. In the world of winter sports, for example, Audi has been the main sponsor of the German Ski Association (DSV) for almost three decades and has also partnered 14 other national alpine teams. In football, we support national and international teams. And Audi is also a partner for the German Olympic Sports Confederation.
