

# The Audi Coupé S2

# Power is only one of its s

## The Concept

The Audi Coupé S2, Audi's fastest ever full production car, continues a sporting legend which has inspired both road and rally drivers for over a decade. It is an extraordinary car, combining electrifying performance with superb versatility, high levels of active and passive safety and genuine environmental concern.

It looks, which radiate power and elegance reflect its sporting pedigree and spring from Audi's unique design philosophy. This centres around the concept that only advanced technology and innovative engineering can meet both the demands of our environment and the requirements of our customers. Performance is effortlessly provided by a 220 bhp 2.2 litre five cylinder turbo charged 20 valve engine which powers the S2 from rest to 60 mph in just 5.7 seconds and then accelerates effortlessly through the gears to its maximum speed of over 150 mph where legally permitted. Comfort and safety levels are

of a very high standard, ensuring that both driver and passengers remain relaxed and at ease.

The more you learn about the Audi Coupé S2 the more enthralling this sporting car becomes.

**A TRUE SPORTS CAR  
IN THE COUPÉ CLASS.**

If you can judge character by outward appearances then the Audi Coupé S2 is a true sports car. Its purposeful shape,

# trengths.

its advanced dynamics and sleek outline mark it as an outstanding design which will immediately attract the enthusiast looking for a thoroughbred sporting coupé.

## REFINED TECHNOLOGY AND UNMISTAKABLY AUDI

The Audi Coupé S2 incorporates all the qualities for which the marque is known, from its fully galvanised bodywork to the quattro permanent

four wheel drive system with anti-lock braking (ABS).

As you enter the car you are surrounded by evidence of Audi's philosophy that pioneering design can only be achieved with first class technology.

This philosophy of excellence extends all the way from the factory to the Audi dealer network who, from the day you take delivery, will endeavour to provide you with the best possible support and after sales service.

## AUDI— THE INTELLIGENT DECISION

The fact that you are considering buying an Audi Coupé S2 is evidence of a degree of forward thinking and suggests you are likely to have high expectations of the car you choose.

Responding, year after year, to such high expectations has made Audi what it is today, the choice for the connoisseur. The Audi Coupé S2 balances the needs of today's true motoring enthusiast with a more responsible attitude towards the environment and to future generations.

# Sport is a matter of style

## Audi Coupé S2

### The interior

Audi's motor sports experience and the results and successes of numerous rallies can be clearly seen in the total concept of

Externally, the high technology body work, colour coded bumpers, aerodynamic rear spoiler and wide alloy wheels with low profile tyres illustrate at a glance the sporting pedigree of the car. Look inside and this view is confirmed. The cockpit reveals to the discerning driver that the Audi Coupé S2 is equipped to handle the

the Audi Coupé S2. This is a car where the drive train is as important as the external appearance, where engine technology is as important as driving comfort. Every aspect of the car has received the highest attention to detail and it is this which makes the Audi Coupé S2 so attractive to the sporting driver.

*The interior in high grade Jacquard satin with woven "quattro" markings.*

highest demands that may be asked of it.

The front sports seats, upholstered in Jacquard satin with woven quattro markings, are both height adjustable and equipped with adjustable lumbar support.

# with the

*The light grey dials of the analog instruments are easy to read.*

If you prefer, a full leather interior can be specified as a cost option.

The three-spoke sports steering wheel with its S2 emblem is leather covered as standard, as are the gear lever knob and casing. The analog instruments set behind non reflective glass have clear light grey backgrounds for ease of reading. The read outs from the on-board computer and the dashboard clock are digital.

The heating and ventilation system has four fan speeds and operates mainly independent of engine or road speed. Switches for rear screen heating, ABS, which is standard on the S2, hazard lights and fog lights are housed, together with secondary dials and the switch for the rear differential lock, in the centre console.

The cabin, equipped to luxury saloon standards provides accommodation for the driver and four passengers. Interior noise levels are exceptionally low, thanks

to an almost total absence of wind noise. And not only is the Audi Coupé S2 extremely comfortable, but it is also very practical for a sporting car, as a variable luggage compartment with an asymmetrically split folding rear seat has been incorporated into its sleek form.

Options, which are available at extra cost, for the Audi Coupé S2 include an electric sunroof, heated front seats, electric seat adjustment and air conditioning. Please consult your Audi dealer who will be pleased to advise you in detail.

# The Audi Coupé S2

## Combining power with

### The engine

Using power intelligently is the secret of the Audi Coupé S2's incredible performance.

At its heart is the proven turbo-charged inter-cooled 2.2 litre, 20 valve engine which delivers an impressive 220 bhp.

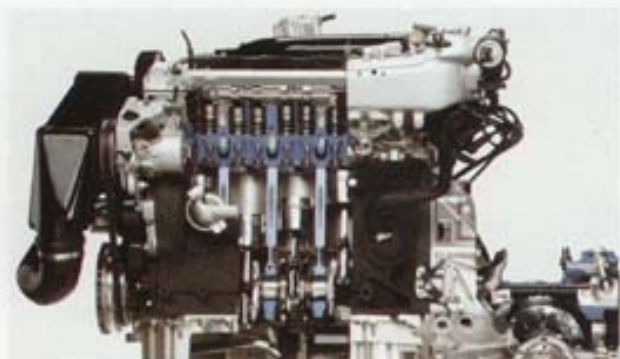

Its dominant characteristic is its torque delivery over the entire revs range, with maximum torque developed at 1950 rpm.

The result is exceptional flexibility in every gear at virtually any speed. The Audi Coupé S2 has a computerised

*The 2.2 litre five cylinder fuel injected engine with 4 valve technology develops a maximum output of 162kW(220bhp), at 5900 rpm.*

engine management system with a self-diagnostic function to control the fuel injection and ignition systems. In addition, two knock sensors ensure balanced

# intelligence

*Powerful acceleration is ensured with maximum torque of 309Nm already being delivered at 1950 rpm.*

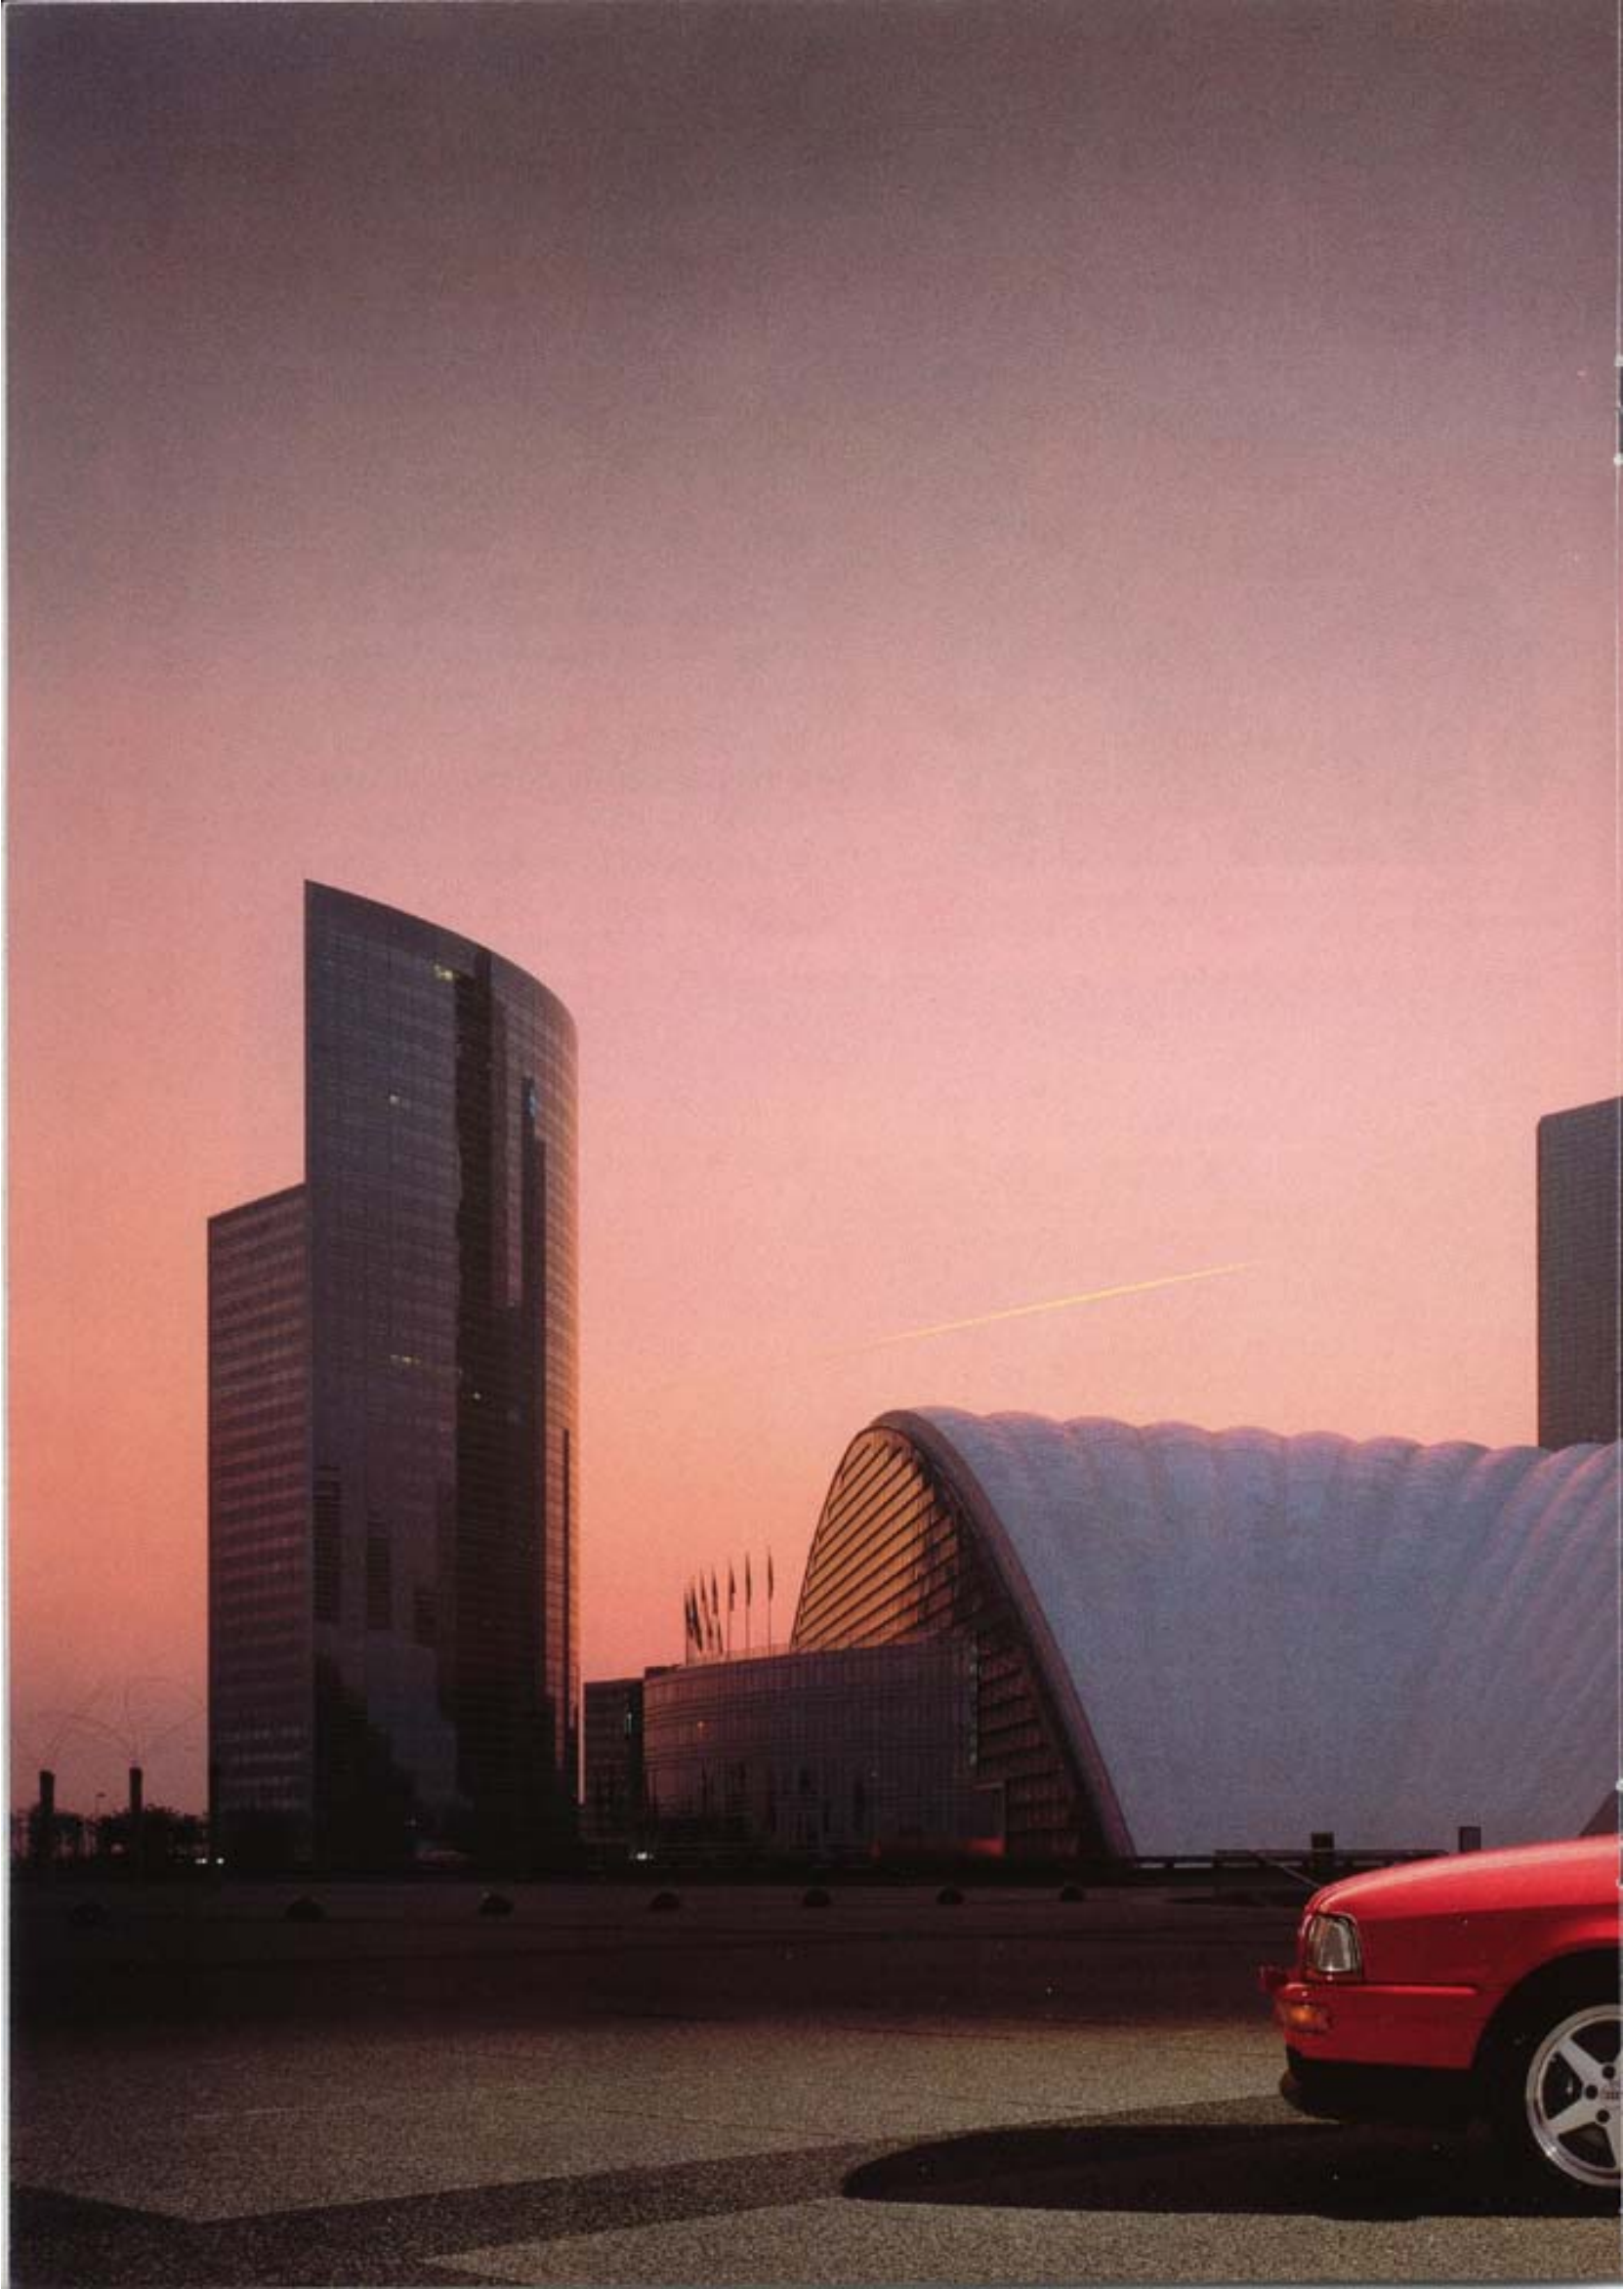

running and the result is exceptional power with superb smoothness even from cold starts.

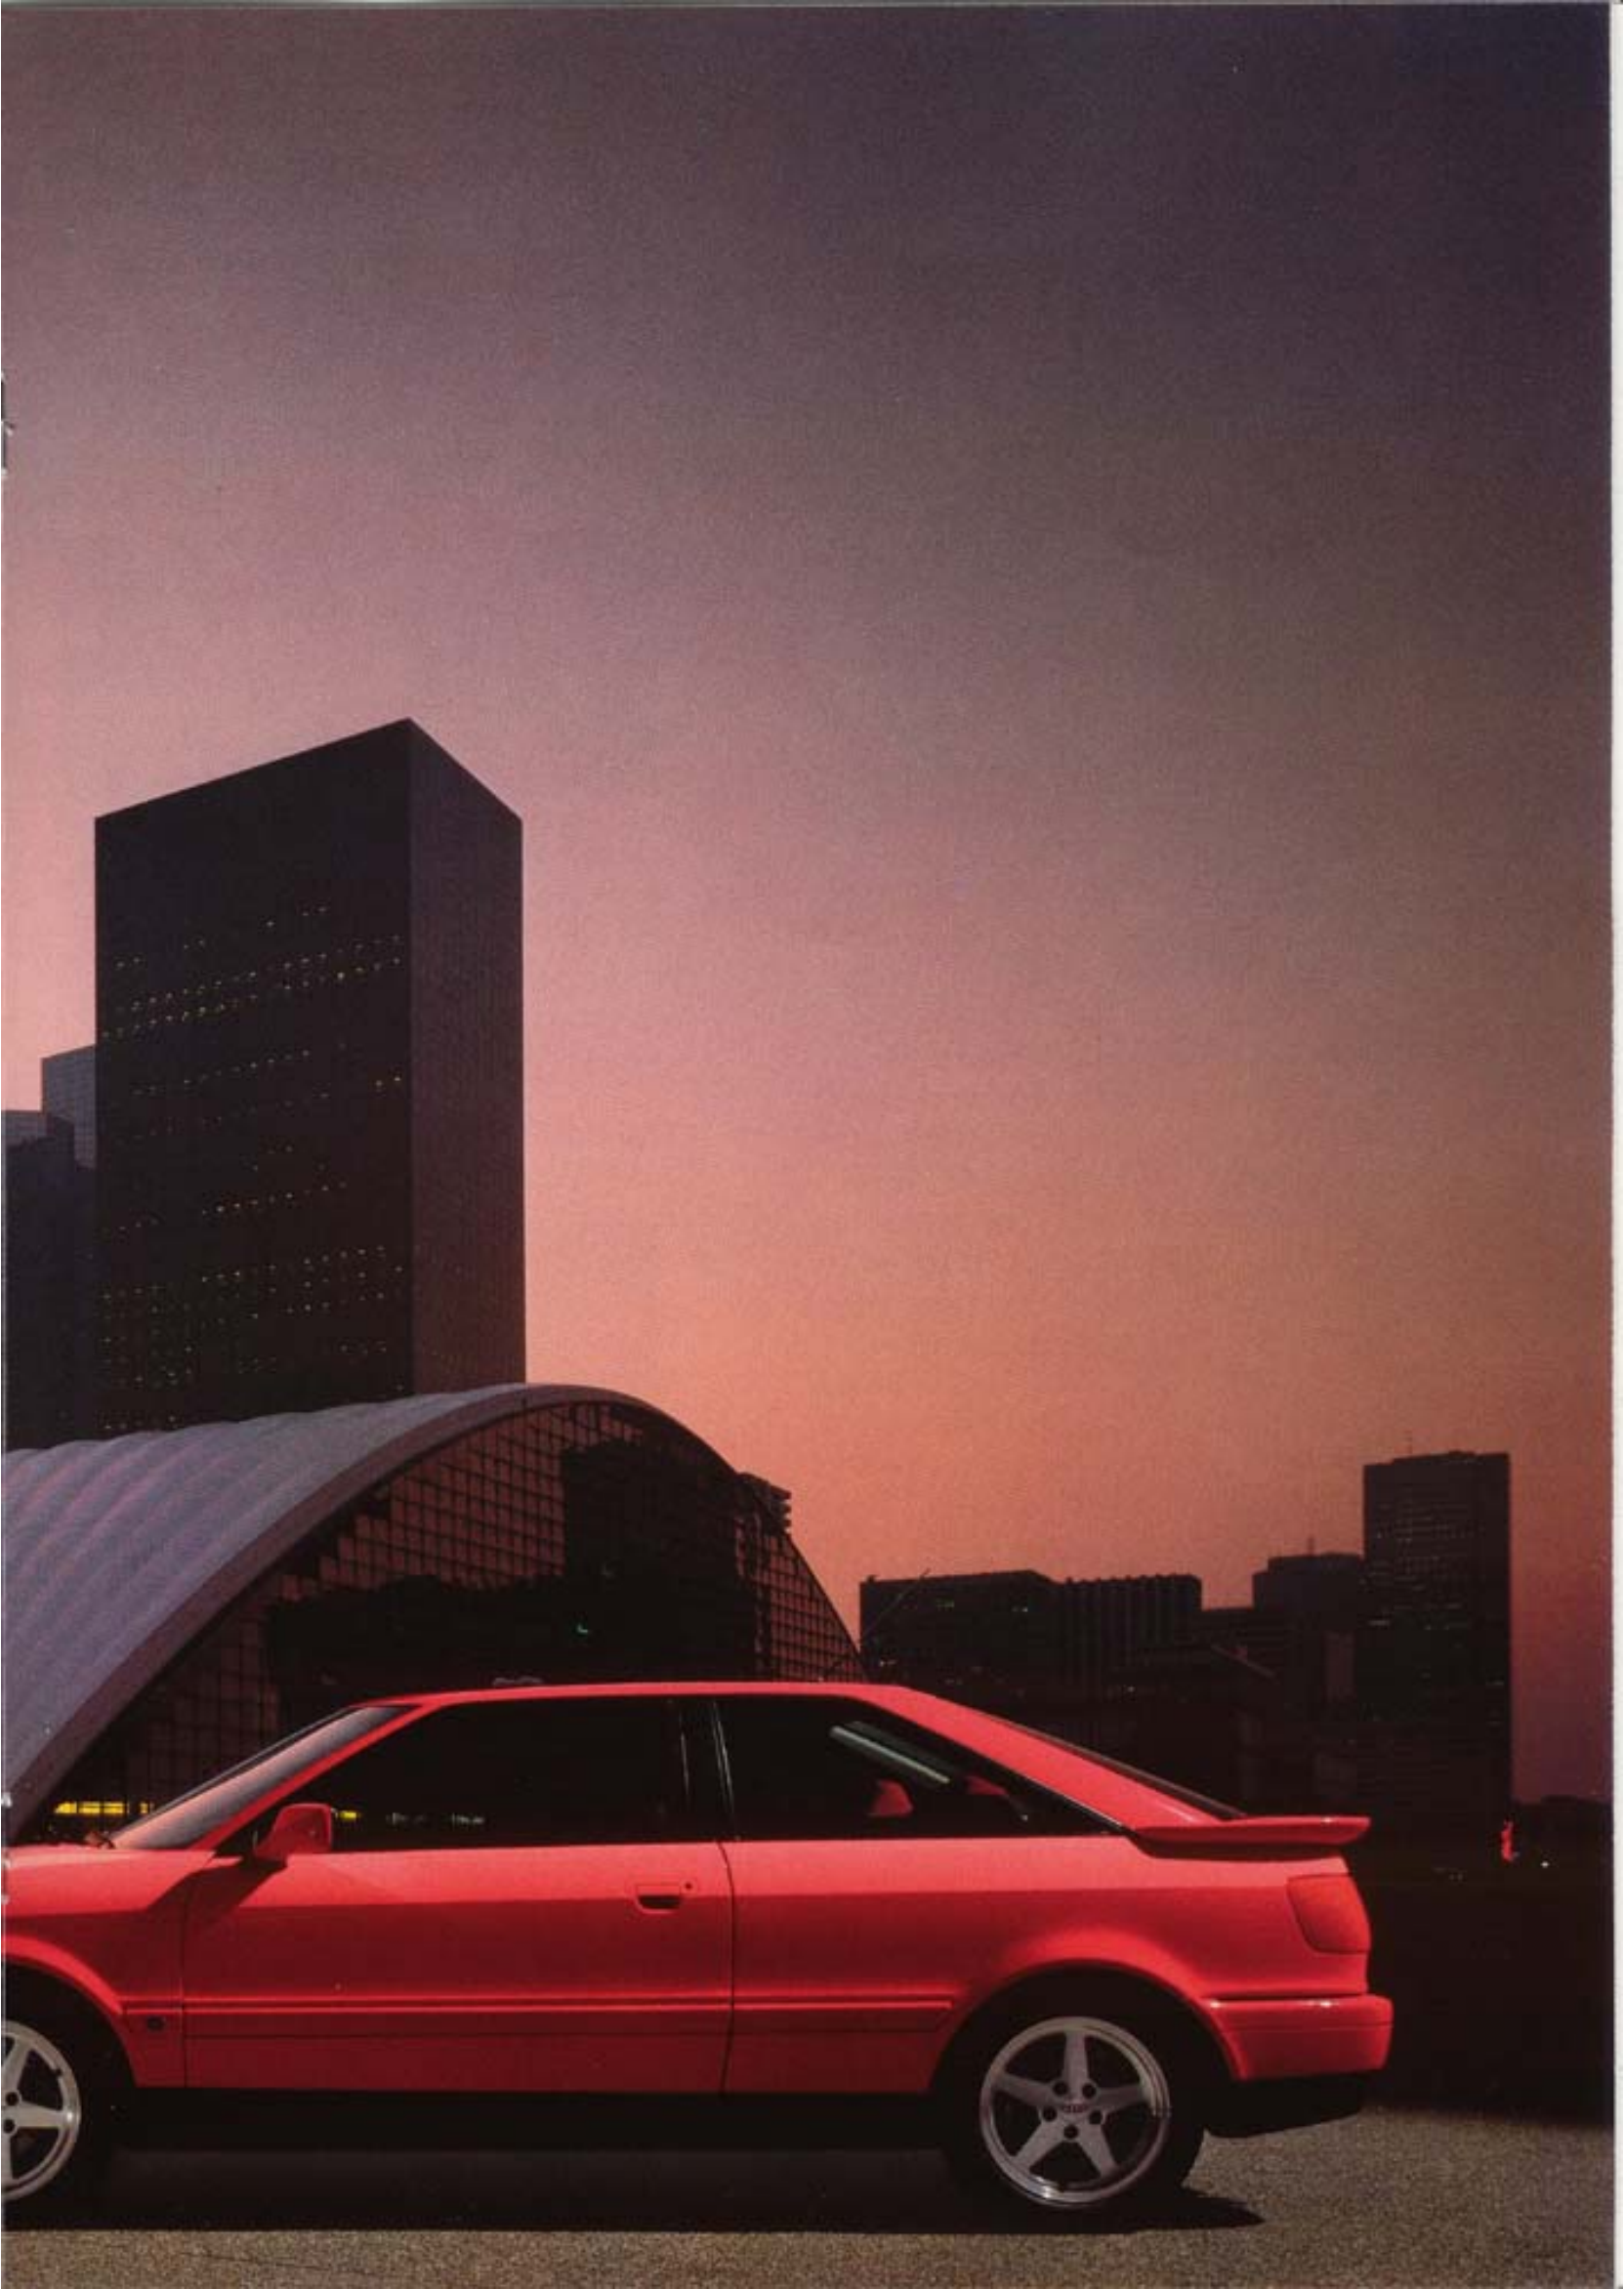

The positive and instantaneous way in which the engine's power translates into motion is a revelation. As well as having enormous straight-line potential, the Audi Coupé S2 provides tremendous grip and control. It also benefits from Audi's rally proven quattro permanent four wheel drive system. In normal driving conditions each wheel transmits 25% of the available power ensuring better directional stability and more predictable handling. In poor conditions, distribution between front and rear axles automatically varies between 75:25 and 25:75 via the self-locking Torsen centre differential, ensuring enhanced mobility in just about all situations.

Remarkably precise and responsive steering has been achieved with speed-

related servotronic power steering. The servotronic micro processor is programmed to vary the level of assistance. At low speed the steering is agreeably light. As speed increases so does resistance, to enable the driver to have a better feel for changes in road conditions, an important advantage when cruising at higher speeds.

No detail has been overlooked in ensuring that the Audi Coupé S2 provides the most intelligent balance between safety considerations and dynamic performance.

# The Audi Coupé S2 inco contribution to safety

## Safety

The Audi Coupé S2 has a high level of active safety built in. Its quattro drive system, the precisely set up chassis and anti-lock brakes are all active ways in which certain accidents can help to be avoided and because of this it is one of the safest cars you can drive.

However, given the density of traffic on today's roads, accidents and collisions cannot be ruled out, which is why we have taken care to build in a high degree of passive safety to protect the occupants from harm. Crumple zones, designed by computer and refined by extensive testing, are situated front and rear to absorb energy in the event of a collision. The rigid passenger safety cell has both the floor and the sides strengthened to provide added protection for driver and passengers.

Side protection is provided by aluminium side impact bars in the doors, large sills, a stable chassis cross member and a broad centre pillar.

The interior is fitted with energy absorbing padding and materials. The upper safety belt mounting points for the front seats are adjustable for height to help toward made-to-measure protection.

The large side door hinges are mounted at two different points, which greatly increases the ability to open the doors after a heavy collision.

Significant as these measures are, the Audi Coupé S2 offers much more. It is the first car in its class to be fitted with Audi's unique safety system Procon-Ten (Programmed Contraction/Tension). Procon-Ten functions in a remarkably simple way. Stainless steel cables lead, via guide pulleys, from the rear section of the engine block to the steering column and the automatic seatbelts. If the engine block is pushed backwards (which is the case if a relative speed of 15 mph or more is achieved on impact) then the stainless steel belts are tensioned and, as a result,

# orporates a unique

*The rear seat belt mounting.*

the steering wheel and upper part of the steering column are pulled forward and away from the driver. At the same time, they tension the front seat belts.

It is a major and unique contribution to the safety of the driver, using advanced technology, to protect him or her. This

*Stainless steel cables and guide pulleys.*

system is offered by no other car manufacturer in the world.

## Equipment Features.

### **Exterior equipment**

Wide body mouldings in body colour  
Front and rear aprons in body colour  
Large rear spoiler in body colour  
Door handles and door mirrors in body colour  
Reversing lights  
Rear fog light  
Heated rear window with quattro inscription  
Laminated windscreen  
Heated twin jet windscreen washers  
Twin tone horn  
Gas filled bonnet stay  
Halogen headlights  
Front fog lamps  
Hazard warning lights  
Side repeater indicators  
Heat insulating tinted glass  
Illuminated key  
Procon-Ten with side impact protection  
7J x 16" alloy wheels  
205/55 ZR 16 tyres  
Anti-locking brake system (ABS)  
Engine compartment light  
3 way catalytic converter with  
Lambda probe  
Headlamp washers

### **Interior equipment**

Jacquard-satin upholstery  
Sport seats  
Leather sports steering wheel  
Leather bound gear lever  
Rear differential lock switch  
Instruments with light grey faces  
On board computer  
Auto check  
Oil temperature gauge  
Oil pressure gauge  
Battery voltage gauge  
Quartz clock  
Trip mileage recorder  
Tachometer  
Ashtray front/rear  
4 speed ventilation  
Intermittent wipers – with two speed control – with wash/wipe action  
Parking light  
Interior light delay  
Cigar lighter/front ashtray illumination  
Front courtesy light  
Driver/passenger sun visors  
Illuminated vanity mirror  
Lockable glovebox, illuminated  
Day/night safety rear view mirror  
Head restraints front & rear

- Passenger grab handle front/rear
- Electric headlamp adjustment
- Velour carpeting
- Felt carpeting in boot
- Centre armrest at rear
- Centre console
- Reclining front seats
- Height adjustment on front seats
- Height adjustable front seat belts
- Rear seat belts with centre lap belt
- Folding rear seat backrest, 1/3, 2/3
- First aid kit
- Warning triangle
- Servotronic steering
- Electric windows
- Electric mirrors
- Central locking
- Sport suspension

### **Optional equipment**

- Pearl white metallic paint finish
- Air conditioning
- Detachable tow bar
- Heated front seats
- Electric sunroof
- Anti-theft device
- Leather upholstery
- Thru-load facility
- Electric rear vent windows

# With us the service does not end with the sale.

## **The advanced 1-year warranty. Unlimited mileage.**

A manufacturer who gives this kind of warranty must be absolutely convinced of the quality of his cars. However, with this warranty we believe we give you more than just a proof of quality. We give you the assurance that you made the right choice. The 1-year warranty has worldwide validity.

## **10 year body protection warranty.**

Audi bodywork carries a 10 year warranty against corrosion. Special rust-proofing treatment of internal body section and panels, applied at the time of manufacture, guards against through-rusting from the inside. Should this occur during the warranty period rectification will be made free of charge and is not subject to compulsory inspections as with other "anti-corrosion" guarantees. Full details of this warranty system are available from your Audi dealer.

## **3 year paintwork warranty.**

This warranty, which is unmatched by any other major manufacturer, really provides you with the widest possible cover on any new car.

There are no special conditions attached and paintwork defects will be rectified under guarantee provided these are not caused by owner neglect or lack of care.

## **20,000 Mile Service Intervals.**

For a customer with under 10,000 miles a year: An **Inspection Service** (which includes an oil change) is required every 12 months, and a **Major Service** is needed only at intervals of 20,000 miles. For higher mileage customers: In addition to the above, lubrication service will be required every 10,000 miles for petrol engined cars and 5,000 miles for diesel models.

## **"ON CALL" for six years.**

Every new Audi is registered in the Audi "On Call" emergency service for one year. This provides free vehicle recovery assistance in the unlikely event of a breakdown.

To extend cover beyond the first year all that is necessary is to have the vehicle serviced at an authorised dealer in keeping with the service schedule and have any necessary repairs found at that time corrected by the dealer. Each annual or 20,000 mile service will then attract re-registration within the scheme, valid until the next service is due. This facility is made available for the first six years of the vehicle's life. For full details please contact your dealer.

**Extended warranty option.**

A comprehensive extended warranty scheme protects against mechanical failure for one or two years beyond the manufacturer's warranty period. Separate brochures give full details.

**A wide service network.**

There is a wide network of Audi service stations around the globe. The Audi service includes the latest in high-efficiency equipment and special tools to provide maintenance and service for your car throughout its long life. All this ensures a long life and high resale value for your Audi.

**Trained personnel.**

The personnel of the Audi companies, service managers, mechanics, reception engineers, etc., receive regular training in our factory-approved training centre in Milton Keynes. At the factory there is a special department which carries out research into new servicing techniques in co-operation with Audi dealers. All this results in quicker, better quality service and lower maintenance costs.

**Spare parts and exchange units.**

The Audi service includes a well-organised Parts Service. Guaranteed, high-standard exchange units undergo stringent inspection at the factory.

**V.A.G. Finance and Insurance:**

Credit facilities may help you to acquire the model of your choice. From hire purchase to leasing, the right package is available. Payment protection plans can also be taken up if required, to take care of payments in the event of sickness, accident or redundancy.

Special motor insurance policies for Audi owners are available with special terms. For a quotation without obligation ring 0800 581185.

**Fleet Services:**

As the name implies Audi operates a full back-up service to registered fleet owners. Support programmes such as special purchase schemes, contract hire and computerised fleet management plans are geared to match the needs of today's fleet user.

**Tax Free Sales.**

The Audi service also includes the Personal Export facility which arranges for Overseas, Military and Diplomatic sales of Audi vehicles.

For information on this service the Tax Free Sales P.O. Box 1000, Blakelands, Milton Keynes, MK14 5NS. (Telephone 0908 601111).
