

JAGUAR E-TYPE ZERO

JAGUAR

- CLASSIC -

AN ICON REDEFINED

We're delighted to introduce Jaguar E-type Zero, a fully factory restored and converted original E-type featuring an all-electric powertrain. Engineered by Jaguar Classic, its performance is just like the original - now with zero tailpipe emissions.

The epitome of glamour in the 60s, Jaguar E-type was described as "the most beautiful car in the world" by Enzo Ferrari. Today, E-type Zero captivates audiences around the globe as it pioneers the future of classic car ownership. The fully reversible conversion preserves the authenticity of the base vehicle, while state-of-the-art technology strikes the perfect balance of traditional craftsmanship and modernity.

BESPOKE ELECTRIC POWERTRAIN

The 40kWh lithium-ion battery pack is in the same location as the original engine with the electric motor just behind it, in place of E-type's gearbox. The car's structure, including suspension and brakes, has not changed. A new prop shaft sends power to a carry-over differential and final drive.

The all-electric conversion has similar weight and dimensions to the outgoing petrol engine and transmission, meaning E-type Zero drives, handles, rides and brakes like an original.

TIMELESS STYLE MEETS FUTURISTIC TECHNOLOGY

E-type Zero offers drivers the unique opportunity to complement the original '60s model with modernised instrumentation and efficient LED headlights.

Maintain the authenticity of your E-type with an original look dashboard incorporating digital capability along with the Classic Infotainment System - featuring DAB Radio, smartphone integration and Satellite Navigation. Alternatively, fully embrace the future and choose the optional digital dashboard and Touchscreen Infotainment System.

INTERESTED IN OWNING THE MOST BEAUTIFUL ELECTRIC CAR IN THE WORLD?

To find out how to purchase a Jaguar E-type Zero or convert your existing E-type to an electric powertrain through our Classic Works facility, please contact a member of our specialist team at:

CLASSIC WORKS EXPANDS TO NORTH AMERICA

Jaguar Land Rover Classic is extending its commitment to classic owners and enthusiasts in North America by establishing a new restoration, sales and servicing centre in Savannah, Georgia.

Set to open in summer 2019, the new 75,000 ft² facility will give access to a range of authentic classic cars, services, parts and experiences across both British marques. A state-of-the-art 42-bay workshop will be capable of providing the full range of Works Services from vehicle health checks to full restorations.
