

XF SPORTBRAKE

LIFE.

XF Sportbrake is the new Jaguar XF model. It joins the XF saloon by introducing a new level of practicality to the dynamic performance that is at the heart of every Jaguar. XF Sportbrake presents the spirit of the award-winning XF in a new, more functional form. Deliberately different, individual, expertly crafted. An exceptional driving

MODEL SHOWN FEATURES AERODYNAMIC PACK

BALANCED

experience complemented with overarching versatility. With its sleek extended roofline giving it an assertive silhouette, XF Sportbrake is unmistakably a sporting estate. Perfectly executed to carry more and to take bulky loads in its stride, XF Sportbrake's proportions taper as the flanks meet the new rear glass area with its continuous wrap-around curve. Adding even more individuality and assertiveness, the XF Sportbrake Diesel S model is enhanced with aerodynamic features that increase its aesthetic appeal even further with a unique front bumper treatment and unique rear valance, side sills and a larger tailgate spoiler. XF Sportbrake is the car you need as well as the car you want.

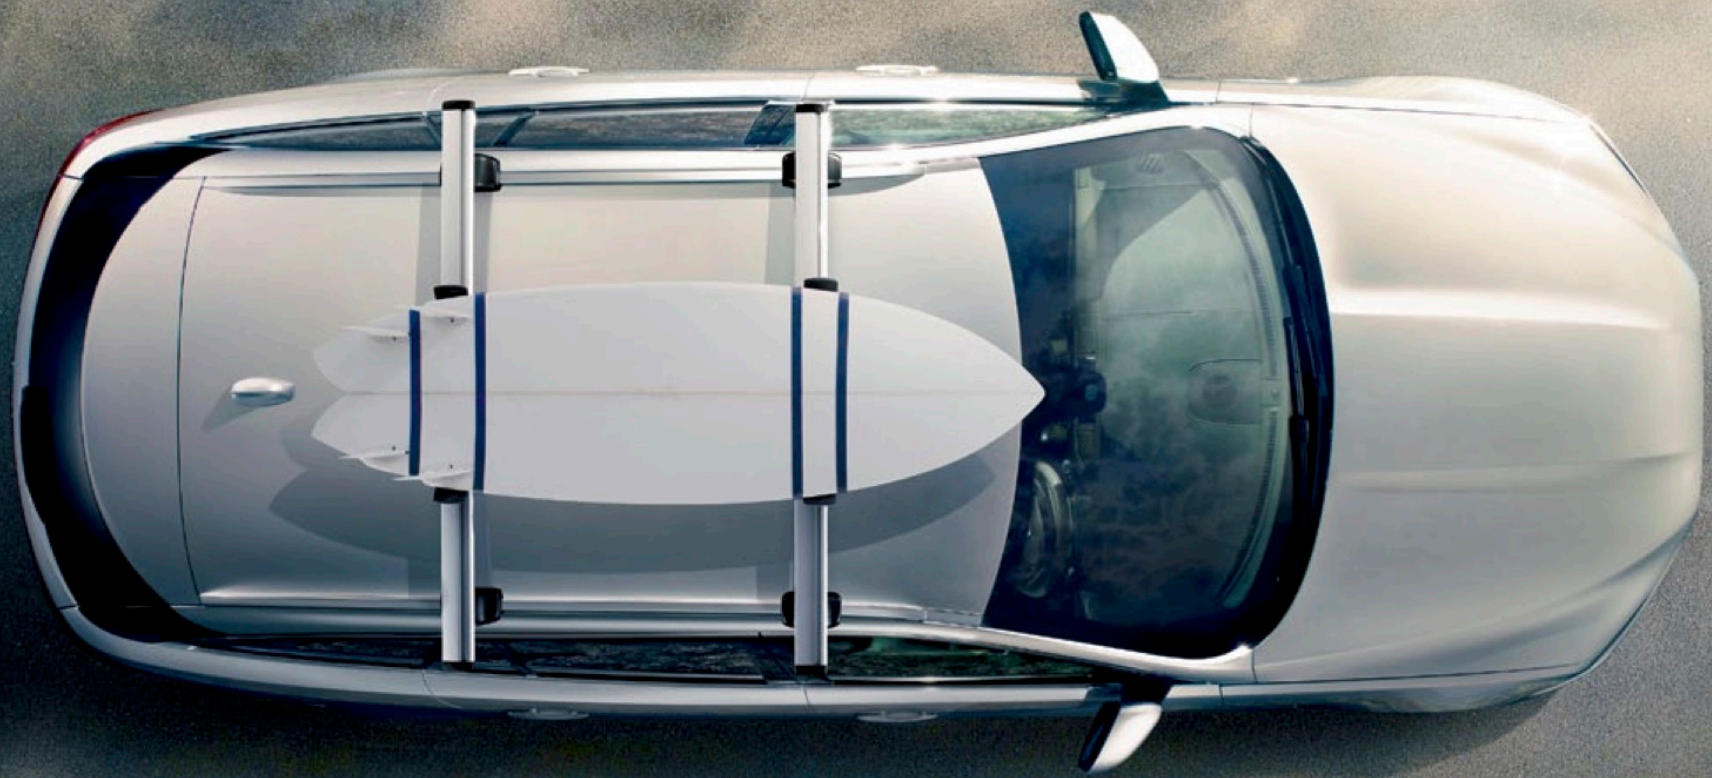

LIFE IN AN XF SPORTBRAKE

XF Sportbrake possesses the capacity. And satisfies the desire. Wherever the occasion and whatever the task, it helps to make life a little easier, a little better and definitely more exciting. The 'start' button dramatically pulsates in red, ready for the driver to engage the engine and awaken the car. Bathed in a cool Phosphor blue light the JaguarDrive Selector™ dramatically rises from the centre console and the air vents roll open. There is an unmistakable purity and beauty to the design of XF Sportbrake's interior. Comfort and quality reign supreme with the choice of supple Bond grain leather, soft grain leather or Suedecloth and even extend beyond the cabin to XF Sportbrake's loadspace, reprising the interior theme and featuring polished stainless steel finishers and a luxurious carpet.

AN XF. AN XF SPORTBRAKE

Sporting luxury. Loadspace versatility. All-purpose capacity. The 60:40 split, remote folding-flat rear seat offers multiple configurations to give the loadspace increased depth. Ease of use is a priority too. The premium loadspace roller blind offers two deployable positions for easy access. Remote Open & Close is also available and a track system, integrated into the floor, works alongside a range of available accessories to enhance the stowage, safety and security of heavy or large items. On occasions when even more capacity is required a range of accessories is available, fitting to the roof rails without fuss, that can accommodate the most awkward loads outside the car.

INTELLIGENT POWER

Performance and drivability. Refinement and effortless power.

A choice of three exceptional diesel engines: 2.2 Diesel, Jaguar's most fuel-efficient engine ever; 3.0 V6 Diesel, for low speed power and fuel efficiency; 3.0 V6 Diesel S, which gives a more involving drive. And a smart 8-speed transmission for almost imperceptible, superfast gear shifts with the ability to multi-downshift, or block-shift, so avoiding the loss of power associated with sequential changes. It knows when it's time to stop. It knows when it's time to start. The 2.2 Diesel comes with Intelligent Stop/Start technology. Minimising engine idle time, reducing CO₂ emissions and boosting fuel economy, engine management shuts down the system when it is appropriate - Eco Stop - and then restarts the engine as soon as the driver releases the brake pedal - Eco Start. It drives like an XF because it is an XF. XF Sportbrake is sporting luxury reinterpreted, from an entirely fresh perspective. Tuned chassis for taut body control inspiring driver confidence. Precise feedback and enhanced ride and handling.

IMPORTANT NOTICE

Jaguar Cars Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and dealers are not agents of Jaguar Cars Limited and have absolutely no authority to bind Jaguar Cars Limited by any express or implied undertaking or representation. Illustrations in this brochure may include optional extras.

Comparisons are based on manufacturer's own data and testing.

ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its engines and designs, Jaguar is committed to operating as a more sustainable business and reducing its overall environmental impact.

Jaguar's flagship XJ model was the first in the company to achieve ISO 14040, the international standard for vehicle 'whole life cycle' assessment. This certification measures the environmental impact of XJ from component material sourcing and manufacturing process, through its driven life time, to final disposal. But that's not all. Every new Jaguar vehicle is designed to be 85% recyclable and reusable, in addition to 95% recoverable and reusable with 10% for energy generation.

Jaguar is committed to reducing dependency on fossil fuels, using fewer resources and creating less waste. Already the manufacturing assembly CO₂ emissions of each Jaguar built in the UK since 2009 is offset. For every tonne of CO₂ emitted in the assembly process, Jaguar invests in carbon reduction projects that reduce an equivalent tonne of CO₂ elsewhere. Offsetting allows Jaguar to take action now, to reduce its impact on the environment, as part of an integrated carbon management plan. This company plan includes targets to reduce operating CO₂ emissions and waste to landfill by 25% by 2012, water consumption by 10% by 2012 and fleet average tailpipe CO₂ emissions by 25% by 2015, based on 2007 levels.

But it doesn't stop there. World class manufacturing facilities certified to ISO 14001 since 1998, transport miles have been cut from delivery routes and new ways are being introduced to produce energy from food waste at our headquarters in the UK. That's Environmental Innovation at Jaguar.

This brochure is produced using certified FSC® mixed sources material from well managed sources and is manufactured under a strict ISO 14001 environment system. 10% of this material is recovered fibre, diverting waste from landfill.
