

**MINI COOPER CLUBMAN.  
MINI COOPER S CLUBMAN.**

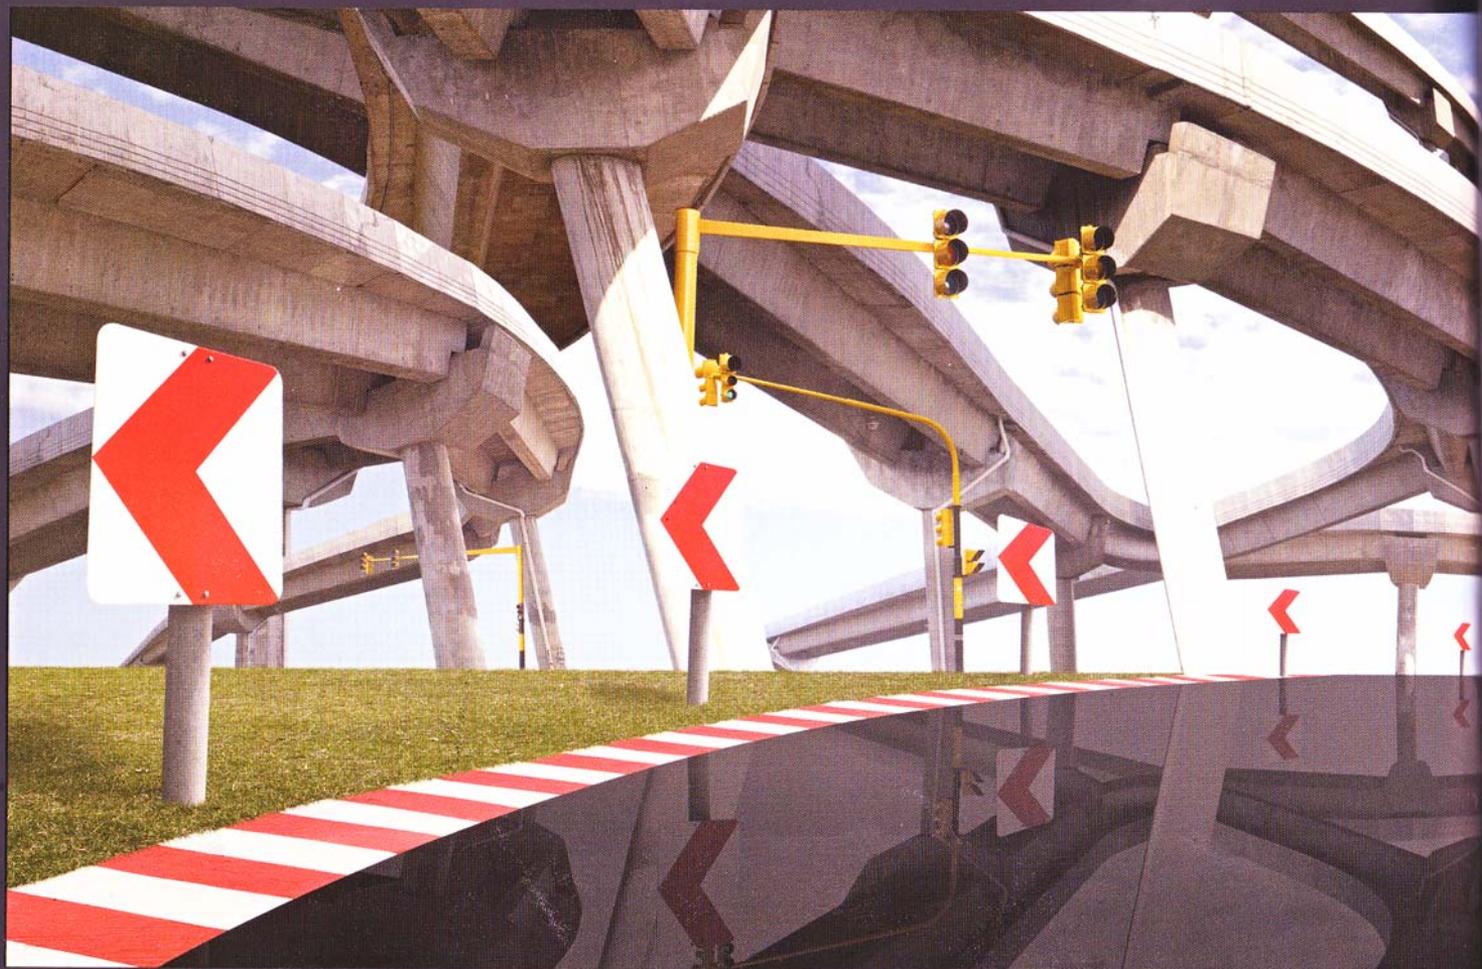

**A NEW BREED HITS THE STREETS.  
MINI CLUBMAN. THE OTHER MINI.**

The MINI Clubman is here. Its shooting-brake design combines extraordinary looks and outstanding performance with something not many cars possess these days: character.

Welcome to unadulterated go-kart feeling. The long wheel-base, short overhangs, wide track and low centre of gravity ensure you stay glued to the tarmac, and turn every corner into an experience to savour.

**A STRAIGHT IS JUST A WAY OF  
GETTING TO THE NEXT CORNER.**

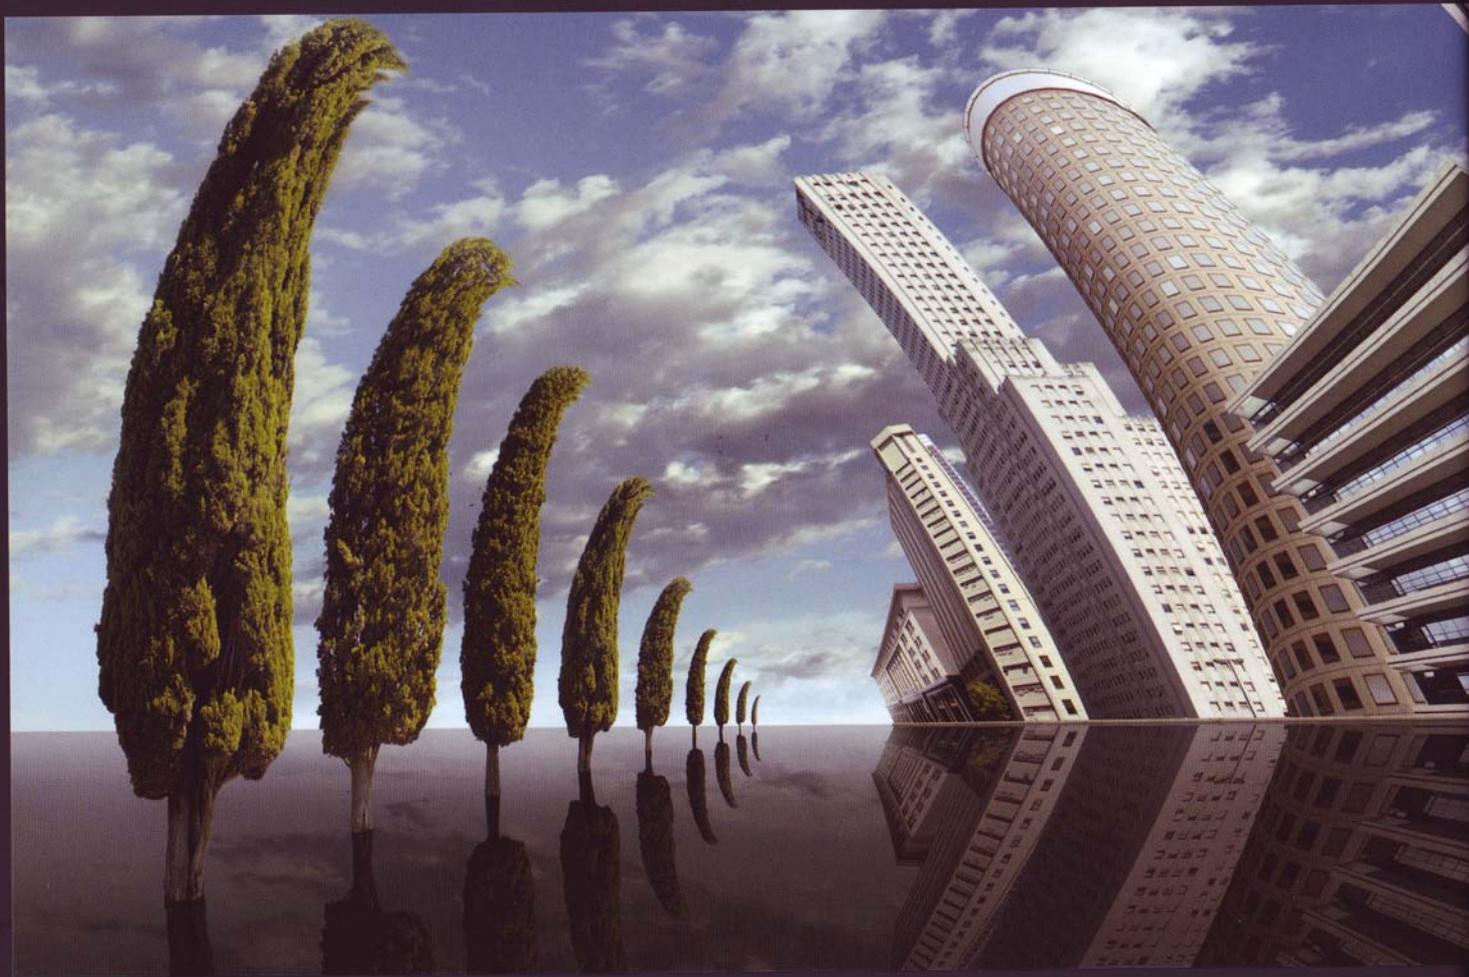

The MINI Clubman features active safety systems that kick in at the first sign of trouble. Fitted as standard, Dynamic Stability Control (DSC) counteracts vehicle instability, such as that caused by front-axle wheelspin. It does so by intervening in the engine management, and applying braking force to individual wheels at front and rear as necessary to ensure that power is transferred to the tarmac with maximum efficiency at all times.

**SAFETY MEANS THAT DRIVING DRAMAS  
NEEDN'T END IN TRAGEDY.**

Impressive performance, invigorating acceleration and no end of fun: with its turbocharged 175-horsepower (128 kW) engine, the MINI Cooper S Clubman offers racetrack thrills in a car you can take anywhere.

**A 175-HORSEPOWER MOBILE URBAN LIVING  
SPACE.**

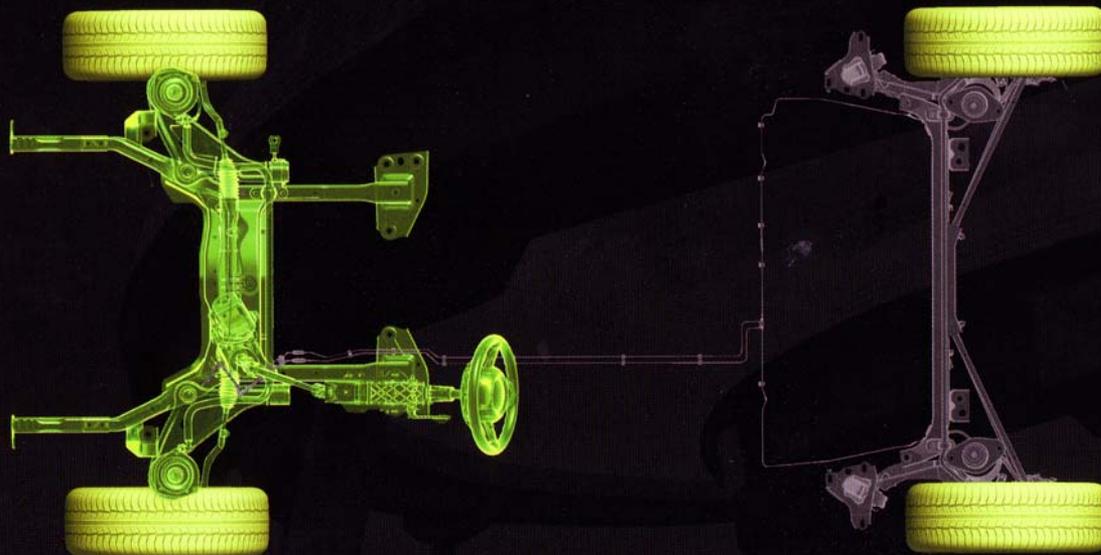

## THE TECHNOLOGY BEHIND THE FEELING.

**SINGLE-JOINT SPRING-STRUT FRONT AXLE.** Where the fun begins. Two drive shafts of equal length in the front suspension minimize the extent to which the drive train interferes with the steering, and optimize the car's cornering, acceleration and braking.

**MULTIPLE-CONTROL-ARM REAR AXLE.** Unique in a car of this class, ensuring optimum contact between the wheels and the road, for the best possible traction. Aluminium construction keeps weight to a minimum and increases agility.

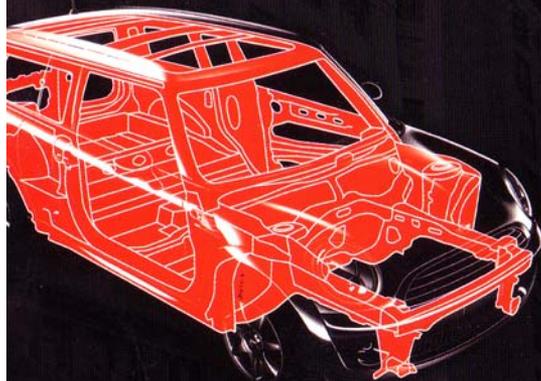

**RACK-AND-PINION STEERING.** A turn for the better. Electronic power assist ensures outstanding steering response, with the driver receiving precise and involving feedback. The stiffness of the steering wheel adjusts to the speed of the car, for easier steering at low and high speeds alike. For maximum comfort, it is only 2.4 turns from full lock to full lock.

## SAFETY IS NOT AN OPTIONAL EXTRA.

**BODY.** The body of the MINI Clubman has been reinforced at strategic points, guaranteeing extreme torsional rigidity for an exceedingly robust passenger compartment. The aim is to deliver the perfect combination of comfort, acoustics and protection.

**SUSPENSION.** The combination of a single-joint spring-strut front axle and a multiple-control-arm rear axle with wide track and a low centre of gravity results in the unmistakable MINI feeling: stable, agile, with excellent cornering ability at all speeds, plus superb traction and outstanding safety.

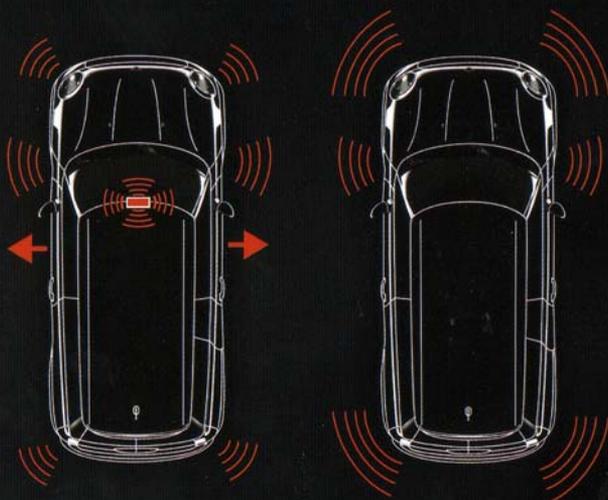

**CRASH SENSOR.** The crash sensor automatically deploys the airbags in the event of an impact, and unlocks the doors, ensuring the occupants of the car can get out in a hurry. Interior and hazard lights are also automatically switched on.

**ALARM SYSTEM** (optional). Where this optional system is fitted, a siren sounds and the hazard lights are switched on if anyone attempts to move or break into the vehicle.

**RSC TYRES WITH RUNFLAT PROPERTIES.** The runflat tyres (available for 16-inch rims and above) are designed in such a way that the car can keep driving in the event of a sudden loss of tyre pressure. Even with a completely flat tyre, it can continue for up to 150 kilometres at speeds as high as 80 km/h.

**RUNFLAT INDICATOR (RFI).** A warning light in the cockpit alerts the driver in the event of any loss of tyre pressure.

## DESIGN THAT'S STREETS AHEAD.

A triumph from top to bottom. The roof of the MINI Clubman features raised dune lines at the sides, which provide dynamic tension when seen from the rear, and an elegant sweeping curvature from the side. The sporty looks are further enhanced by a wide selection of light-alloy wheels, including a MINI Clubman exclusive, the 5-Star Pace Spoke design in the 7 J x 17-inch size with 205/45 R17 tyres.

Open wide! The MINI Clubman features a unique door design that is as practical as it is distinctive. The Clubdoor on the right-hand side opens backwards, giving a bigger opening for passengers to get in and out, while the two halves of the Splitdoor at the rear open separately, one after the other, for easy access to the luggage compartment.

# LET YOUR SENSE OF STYLE BE YOUR GUIDE.

The MINI Clubman is available in a wide choice of exterior colours, including the new and exclusive Hot Chocolate Metallic. And there are many different ways you can combine these with the roof and C-pillar colours on the different models. The mirror caps, by the way, are always the same colour as the roof unless the optional chrome finish is specified. So what will it be: a body-colour roof with C-pillars in Black or Silver? Or roof and C-pillars all in Black? Or both in Silver? Take your time...

## CHOICES? YES PLEASE. COMPROMISES? NO THANKS.

Why share when everyone can have their own? The elliptical door trim also features in the back of the MINI Clubman, where the built-in loudspeakers, storage compartment and armrest enhance comfort, and help create a lounge ambience.

The optional flat luggage-compartment floor and the angle adjustment of the rear seat bench also make loading and unloading easier. Individual pieces of luggage can be secured to the four lashing eyelets.

The MINI navigation system features a 16:9 monitor built into the central round instrument, which also includes the Radio Boost CD, on-board computer and a speedometer running round the outside. It guides you to your destination using voice instructions, directional arrows and/or on-screen maps.

The automatic transmission in the MINI Clubman is set up for maximum driver comfort.

# STEP INTO YOUR OWN PERSONAL COMFORT ZONE.

Make yourself at home. You can put a personal stamp on your MINI Clubman, by choosing from the enormous variety of upholstery, interior surfaces and Colour Line colours on offer.

<sup>1</sup> All figures relate to vehicles with the standard 6-speed manual transmission. Figures in square brackets relate to vehicles with the 6-speed automatic transmission.

<sup>2</sup> All MINI models comply with the EU4 exhaust emissions standard. Fuel consumption is determined in accordance with the EU driving cycle, made up of approximately one third urban and two thirds extra-urban driving (based on the distance covered). CO<sub>2</sub> emissions are measured in addition to fuel consumption as such.

<sup>3</sup> With overboost function.

<sup>4</sup> The figure quoted includes a 90% tank filling, 68 kg for the driver and 7 kg for luggage. Unladen weight applies to vehicles with standard equipment. Optional equipment may increase this figure.

## **WARRANTY.**

Every MINI is supplied with a 2-year unlimited mileage dealer warranty. (This excludes wear-and-tear parts.)

Every MINI also comes with a 12-year anti-corrosion warranty, which covers the vehicle against rusting of the body panels. This warranty is dependent on any previous damage to the vehicle body or under-body (e.g. stone impact damage, scratches, dents, accident damage or other damage caused by environmental factors) having been correctly repaired in accordance with current MINI guidelines.

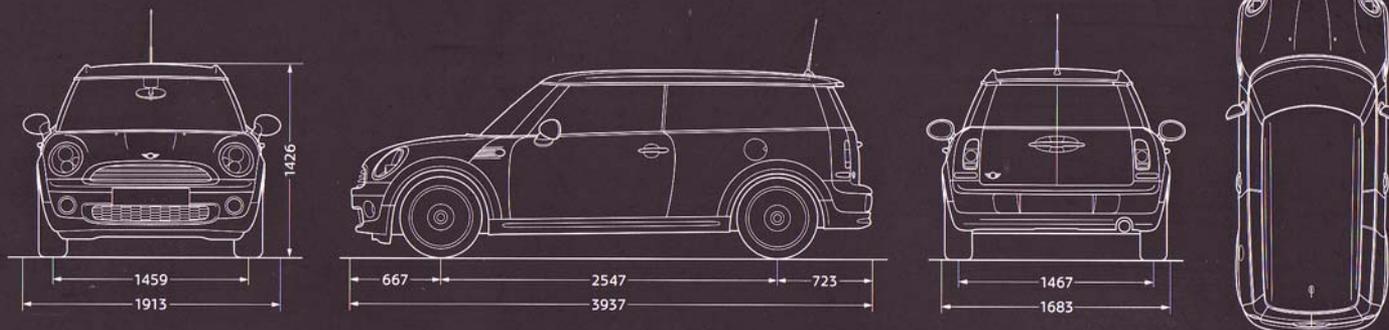

The painted surfaces of the car are covered by a 3-year warranty. This excludes any damage to painted surfaces caused by external or environmental factors.

## **RECYCLING.**

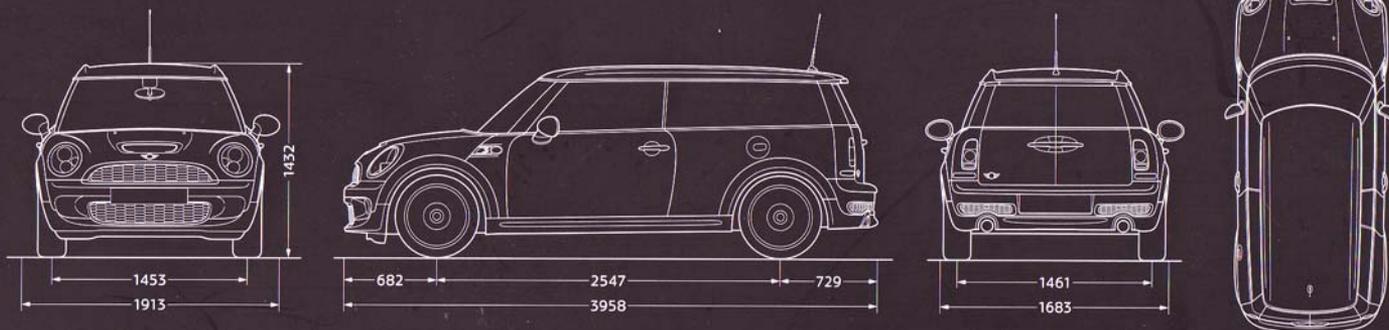

At every stage, from design to disassembly, recycling is central to the MINI philosophy. For example, all the materials used in its manufacture were selected because they can be used in a sustainable and environmentally friendly way. And every MINI is built to be easily and economically recycled when its driving days are finally done. We have been working on this approach since 1994 at the BMW Group Recycling and Disassembly Centre in Munich, the only facility of its kind.

Your authorized MINI dealer will also be pleased to advise you on the disposal of your old vehicle.
