VENOM GT

World's Fastest Hypercar from 0 - 300 km/h and 0 - 200 mph

Dear Venom GT Enthusiast,

Thank you for your interest in our special hypercar. The Venom GT was designed to offer a level of performance and a driving sensation that cannot be experienced in any other road car. Maximum useable power combined with minimal weight combine 1244 horsepower with 1244 kilograms of curb weight to deliver the quickest and fastest hypercar for sale in the world.

In January, 2013 the Venom GT set the Guinness World record as the world's fastest hypercar from 0-300 km/h (186 mph). During the same test, we also set a world record for fastest 0-200 mph by clocking the double century mark in just 14.51 seconds - which is nearly 7 seconds quicker than the Bugatti Veyron Super Sport.

And most recently, TopGear magazine was on hand as we tested the Venom GT to a speed of 265.7 mph in just 2 miles before running out of runway. This is far from our top speed which we estimate at well over 270 mph.

Only 29 Venom GTs will be produced and our production run is nearly half sold out. Thus, making our special car not only the quickest and fastest hypercar available in the world, but also one of the most exclusive. Please take a look at our brochure and let us know if we can be of any further help.

Thanks for your interest and Never Lift!

John Hennessey

Inside, the Venom GT merges high-tech materials with supple luxury. Machined metal meets carbon fiber - all surrounded by sumptuous leather - to produce an unforgettable cockpit.

Hold on tight to the sport steering wheel as the Venom GT is capable of accelerating from zero to 60 mph in just 2.5 seconds.

World's Fastest Hypercar from 0 - 300 km/h

On January 10, 2013 John Kiewicz drove the Hennessey Venom GT to a new Guinness WORLD RECORD for a two-seat hypercar from 0 - 300 km/h in 13.63 seconds at Ellington Airport in Houston, Texas, USA.

Combined with a super-light curb weight of just 2,743 lbs (1,244 kilograms), the Venom GT offers an unmatched power-to-weight ratio.

"The Venom GT is a purposebuilt thrill ride designed to dominate the competition" says John Hennessey. "This car is for a very select client who demands ultimate performance, but with absolute exclusivity."

"I've driven pretty much every supercar on sale over the past 25 years, but not one of them has accelerated anything like the Venom GT."

-TopGear

**"A performance of an entirely different
intensity to any other hypercar"**
- EVO Magazine

Hennessey
VENOM GT

“When you drive the Venom GT not only do you feel connected to the car, you’re left free to concentrate on enjoying it and exploring its performance.”

- EVO Magazine

F1 meets road car. To maximize the power-to-weight ratio, the Venom GT utilizes some of the most hightech racing components available today. This includes the use of carbon fiber body panels and hybrid wheels constructed of both carbon fiber and forged-aluminum.

Massive Brembo 6-piston alloy brake calipers combine with lightweight carbon-ceramic rotors to give the Venom GT world-class stopping power while simultaneously minimizing curb weight and rotational mass.

The Venom GT has an active suspension system that adjusts ride height according to varying conditions. The system allows a range of adjustment up to 2.4 inches (6 cm), enabling the driver to raise the Venom GT in order to navigate items such as a driveway or a parking garage.

Hennessey
VENOM GT

"Once you've tasted the Venom GT's full-throttle through-the-gears acceleration, it expands your mind and opens a window to performance that no end of on-boost, in-gear roll-ons can replicate."

"When you scrunch up the courage to wind the Venom GT out through as many gears as you dare, the acceleration and sensation of speed is biblical. Samuel L. Jackson spittle-flected tirade in Pulp Fiction biblical!"

-EVO Magazine

VENOM GT

All components aboard the Venom GT are built for purpose, not flash. Lightweight carbon fiber surrounds an alloy shifter that actuates a Ricardo 6-speed manual gearbox.

With lateral acceleration well exceeding 1 g-Force, body support for occupants comes in the form of race-spec, deep-side bucket seats that are constructed of carbon fiber and covered in fine leather.

VENOM GT

Powering the Venom GT is a 7.0L Twin Turbo V-8 engine producing an amazing 1,244 bhp and 1,155 lb-ft of torque.

The Venom GT is able to put all of its power to the ground with the help of an adjustable traction control system. The Venom GT redefines supercar performance while being able to go from zero to 200 mph in under 15 seconds - nearly 9 seconds quicker than the Bugatti Veyron 16.4.

Vehicle Specifications

Performance

0 – 60 mph: 2.5 sec.
0 – 300 km/h: 13.6 sec.
0 – 200 mph: 14.5 sec.
Top Speed: 272 mph

Power

Horsepower: 1244 bhp @ 6600 rpm
(Cockpit adjustable from 800 bhp, 1000 bhp & 1244 bhp)

Torque: 1155 lb-ft @ 4,400 rpm

Engine

Twin Turbo 7.0L Aluminum V8
Mid Longitudinal Position

Transmission

Ricardo 6-Speed Manual

Brakes

Brembo 6 Piston Calipers
15-inch Carbon Ceramic Rotors

Suspension

Penske Adjustable Coilover (all four corners)
Adjustable by 2.4 inches (60 mm) Ride Height

Weight

2,743 lbs (1,244 kilograms) Curb Weight

Wheels & Tires

Tire – Front: 265/30/20 Michelin Pilot Super Sport
Tire – Rear: 345/30/20 Michelin Pilot Super Sport
Wheels: Front 9.5 x 20 in. | Rear 12.5 x 20 in.

Options

- Michelin Pilot Sport Cup ZP Tires
- Bare Carbon Fiber Finish
- Right-Hand Drive
- Stefano Ricci Bespoke Interior
- Stereo System Designed by Steven Tyler of Aerosmith

Pricing

- Venom GT Hardtop, 1000 hp: \$895,000
- Venom GT Hardtop, 1244 hp: \$1,100,000
- Venom GT Spyder Removable Hardtop Roof Option, Add \$100,000

Contact

How To Order

For more information about the Venom GT or to place an order, please contact John Hennessey by telephone at 1.979.885.1300 or by email at info@venomgt.com

Dealer Inquiries

For more information regarding dealer opportunities, please contact us by email at info@venomgt.com or by calling +1.979.885.1300 for consideration.

Delivery

Allow 6 months for normal build time. Allow additional time for vehicle personalization and optional upgrades.
