STYLE

The front is characterised by a new light signature. The very slim projector headlamps feature the DS MATRIX LED VISION system that combines matrix and directional lighting. They are complemented by Daytime Running Lights made up of two strips of LEDs on either side (150 LEDs in total).

The DS WINGS join the headlamps to the grille. Depending on the model, this is made up of two parts with diamond tip motifs, in graduated sizes, that stand out in a three-dimensional grille. Above it, the long bonnet gives movement to make the silhouette appear dynamic.

The rear wings have a healthy muscular appearance with curves and sharp edges on the bodywork.

DS 4 RIVOLI E-TENSE 225, Pearl Crystal, 20 inch SYDNEY alloy wheels

At the rear, the roof swoops down very low to a steeply sloping rear window with an enamel screen print, an exterior demonstration of a recognised expertise.

The silhouette is as stylish as it is aerodynamically efficient.

A new generation light signature features at the back with the laser etched scale effect.

INVISIBLE

BLE

INNOVATION

DS AIR

DS AIR invisible air vent is an innovative ventilation system with very compact central vents high up and fitted with invisible fins. A blast of air separated by a cone ensures it can be directed perfectly both up and down. The whole system works like classic ventilation with optimum efficiency. With its vertical compactness, it has an understated and integrated appearance which has enabled the design of the dashboard to be structured in a way that's free flowing and uncluttered.

Criollo Brown Leather covered steering wheel with Criollo Brown covered airbag cushion and a Gloss Black insert

For connectivity, the priority was to provide a solution so the driver no longer had to take their eyes off the road, an undeniable safety benefit.

DS EXTENDED HEAD-UP DISPLAY

Called DS EXTENDED HEAD-UP DISPLAY, this avant-garde visual experience is a first step towards augmented reality.

With a new immersive technology, vital driving information is projected directly onto the road. Using an optical illusion, data is displayed four metres ahead of the windscreen diagonally following the driver's gaze at 21-inches, never seen before in the segment.

Essential information such as speed, driver aids, navigation, warning messages or even the track they're listening to or the call they're taking will be projected onto the road.

DS SMART TOUCH

22

DS 4

DS IRIS SYSTEM

This sensory and experiential technology is part of a wider offering, at the heart of a completely re-imagined 10-inch infotainment system, DS IRIS SYSTEM.

The new interface takes the usability of a smartphone with a tactile, seamless and responsive interface based around the idea of profiles that can be completely personalised with icons.

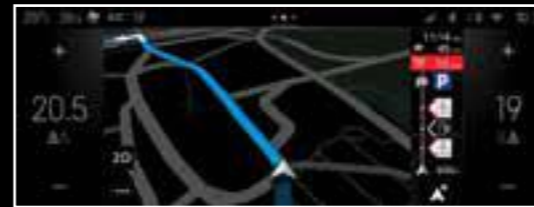

The settings and display load automatically on start-up. The idea behind personalisation is to enable everyone to adjust

the content to their requirements.

Controlled by voice and gesture, DS IRIS SYSTEM incorporates a personal assistant capable of recognising what's said to it so that the system can carry out requests.

To ensure the system and its mapping are always working as well as possible, updates will be done instantly via the cloud.

Example of central screen 'HOME' pages that can be completely personalised

REFINEMENT ENGINEERED

23

DS SMART TOUCH

This is supported by a unique gesture control system, DS SMART TOUCH, located on the centre console. This is a screen you can use with your fingertips. The user making a gesture towards one of the pre-entered favourite functions is enough. The screen also identifies normal movements such as zooming in, zooming out and has handwriting recognition.

DS E-TOGGLE

DS E-TOGGLE is a compact control for the automatic gearbox, located on the centre console. Gearchanges can also be done manually with paddles fixed behind the steering wheel.

DS DRIVE ASSIST 2.0*

Already offered on DS 3 CROSSBACK, DS 7 CROSSBACK and DS 9, DS DRIVE ASSIST level 2 semi-autonomous driving** also features on DS 4.

The cruise control adapts speed depending on the traffic flow with the ability to stop and restart in traffic jams. The system also ensures precise car positioning in the lane of the driver's choice.

For DS 4, operation is improved with three new features:

- semi-automatic overtaking,
- speed adjustment for corners,
- and recommended speed adjustment from signposts.

The steering wheel features a grip sensor that continually checks if the driver is active because they should always be in control.

The new "Radar Corners" enable other functions such as long-distance blind spot monitoring (with a range of 75m) and rear cross traffic alert to avoid a collision with a hazard in the blind spot.

DS NIGHT VISION

By helping you to see more in the dark, DS NIGHT VISION enables you to read the road ahead and all its hazards better. An infra-red camera in the grille detects pedestrians and animals in the road up to 200m in front. You'll see the road ahead in the digital instrument display with potential threats highlighted in yellow and then red supplemented by an audible alert depending on how close these are. This enables you to anticipate danger and react accordingly.

DS ACTIVE SCAN SUSPENSION

DS Automobiles is also about the concept of dynamic serenity. With DS 4, it translates into class-leading ride. One of the strong points is the DS ACTIVE SCAN SUSPENSION controlled damping, exclusive to the segment through its use of a camera. This is positioned at the top of the windscreen, views and anticipates irregularities in the road surface and transmits the data to a computer. With the four attitude sensors and three accelerometers, the system controls each of the wheels independently. Using the information it receives, it makes the suspension harder or softer depending on what's required. The result is heightened comfort whatever the state of the road.

FLUSH FITTING DOOR HANDLES

You'll be amazed by magic FLUSH FITTING DOOR HANDLES that only appear when you need them. The rest of the time they're concealed, fitting neatly into the bodywork to enhance the smooth and refined silhouette of your DS 4.

PROXIMITY KEYLESS ENTRY & START

With PROXIMITY KEYLESS ENTRY & START, your DS 4 recognises you from a distance, transforming locking and unlocking into moments of magic. When you are less than 3 metres away, the car automatically turns its lights on. At 1.5 metres the car unlocks itself and the flush fitting door handles – invisible up to that point – appear automatically. When you walk away, it's a similar principle: at 2 metres the door handles disappear and the car locks itself without you doing anything.

MAGNETIC

DS MATRIX LED VISION

With a new generation of DS MATRIX LED VISION headlamps that are slimmer and more modern, the Matrix Beam and Dynamic Bending Light technology has been combined in the same system to give a distinctive and unique identity.

The DS MATRIX LED VISION headlamps are still made up of three LED modules which are the DS Automobiles signature:

- The inner module of the headlight is used for the dipped function.
- The moving central module can turn to an angle of 33.5°. It illuminates the sides of the carriageway and follows where you're looking in corners. It is also a nod to the directional headlamps of the 1967 DS.
- The outside Matrix Beam module illuminates for driving, split into fifteen segments which turn on and off independently, depending on the driving conditions it senses.

These projector headlamps adapt to traffic conditions, steering wheel angle, speed and weather conditions with five pre-set modes: city, country, motorway, bad weather and fog.

They enable you to drive constantly on main beam without ever dazzling other road users. Using the camera located in the top part of the windscreen, these intelligent headlamps adapt their light beam automatically with a range of 300 metres, depending on traffic conditions, without ever dazzling others.

THE JOY OF DRIVING

DS 4 was first offered with an E-TENSE 225 plug-in hybrid power unit comprising a PureTech turbo petrol engine and an electric motor with a combined maximum 225 horsepower and 360Nm of torque, capable of covering up to 34 miles (WLTP) in zero emissions mode courtesy of a 12.4kWh battery.

The electric motor, connected to an eight-speed automatic gearbox, has a maximum power of 81kW (110 horsepower) and 320Nm. This is used to get the car moving, to boost the car's acceleration and to drive in zero emissions mode at up to 84mph.

DS 4 uses an energy recovery system that replenishes the battery on the move as you coast and brake. In addition, an E-Save function enables you to save battery charge to do part of your journey in Electric mode, for example when you know that you'll be driving into an urban centre. The 7.4kW on-board charger enables you to charge the battery in 1hr 55 at a charging point with the accelerated charging cable.

DRIVING MODES

Our E-TENSE models have multiple driving modes:

ELECTRIC MODE

Electric mode, always selected by default, enables you to reduce petrol consumption to a minimum. With up to 34 miles without using any petrol it's perfect for commuting. What's more, it's a new driving experience combining serenity inside with remarkable responsiveness.

HYBRID MODE

Automatically switching between 100% electric and 100% petrol or combining the two if need be, Hybrid mode adapts to all driving conditions for the best possible use of electric power.

SPORT MODE

Make the most of DS 4 E-TENSE's driving dynamics for intense driving pleasure, by activating Sport mode and enjoying the combined power of the internal combustion engine and electric motor whenever you want, with optimised mapping of the accelerator, gear changing, steering and adaptive suspension.

COMFORT MODE

Based on Hybrid mode, this activates DS ACTIVE SCAN SUSPENSION to adjust instantly how hard or soft the suspension is depending on the road, thereby guaranteeing you maximum comfort.

ONLY YOU

A WEALTH OF ATTENTIONS

Inspired by you, created for you; Only You is a bespoke programme that makes owning a DS unique.

ONLY YOU SERVICES ⁽¹⁾

MyDS App - THE KEY TO YOUR DS WORLD

Your essential everyday assistant, MyDS App lets you access the wide range of exclusive Only You services and keeps you permanently connected with your DS. Compatible with every DS ⁽²⁾, MyDS App is at your side before, during and after your trip ⁽³⁾.

DS ASSISTANCE - DRIVING WITH PEACE OF MIND FREE FOR LIFE ⁽⁴⁾, AVAILABLE 24/7 IN CASE OF BREAKDOWN OR ACCIDENT

So you can drive with complete peace of mind, DS has made every effort to make your life easier and keep you constantly on the move ⁽⁵⁾. Accident, breakdown, lost keys or misfuelling are all covered by DS ASSISTANCE with free 24/7 support in mainland France or abroad, available by pushing the 'DS' button in your car, via the MyDS App, or by calling 00 800 24 24 07 07 ⁽⁶⁾.

DS VALET - A VALET MAKES LIFE EASIER

As time is our most precious asset, DS has created the DS VALET experience for you ⁽⁷⁾. When you purchase your DS, you can have your car delivered to the address of your choice. When scheduling an appointment at our workshops, you can ask the DS VALET to collect and return your car.

DS RENT - SHORT TERM DS HIRE

To continue enjoying driving a DS and use your travels to try a new car from the DS range, book one from your smartphone using MyDS App or from your retailer.

DS CLUB PRIVILÈGE ⁽⁸⁾ - SPECIAL ACCESS TO UNIQUE EXPERIENCES

By driving a DS you've chosen to experience the best in French expertise and sophistication. To give you an unforgettable experience, we've created DS CLUB PRIVILEGE. To become a member for five years you simply apply via MyDS App. Available straight from your smartphone, this world of privilege has been designed to put what you want at the heart of everything.

DISCOVER THE WORLD OF DS THROUGH UNIQUE EVENTS AND ENJOY EXCLUSIVE BENEFITS: private events, exhibition previews, cookery courses with a celebrity chef, or even meeting experts in French savoir-faire... Private sales of gourmet foods, getaways, shopping and other special activities.

Calls free from a landline. With a mobile, tariffs may vary according to network provider (most customers have unlimited calls).

⁽¹⁾ Depending on availability in the authorised DS network

⁽²⁾ Models equipped with Bluetooth that's compatible with journey feedback enables you to enjoy all the driving functionality (journeys, consumption, distance, range)

⁽³⁾ From your smartphone with a working internet connection and navigation

⁽⁴⁾ For all brands of car up to 20 years old. The offer is valid for incidents occurring within 12 months of regular maintenance, a technical procedure or

bodywork attention within the authorised DS network, carried out after 1st January 2019.

⁽⁵⁾ For conditions go to DSautomobiles.fr

⁽⁶⁾ Free calls from a landline in Europe

⁽⁷⁾ The physical boundaries for the DS VALET service are specified by each DS retailer and this is a chargeable service

⁽⁸⁾ In the six months after the purchase of your vehicle

CONNECTED SERVICES

SOS & ASSISTANCE

With SOS & Assistance pack, travel with peace of mind. If you have an accident, the emergency call system pinpoints your location automatically (if it feels a heavy impact) or you can operate it manually (by pressing the SOS button for three seconds), and the appropriate rescue service will be contacted immediately.

TELEMAINTENANCE

The Telemaintenance service can recognise the due date for a service or the need for work to be carried out on your DS. As soon as one of these is identified, DS will contact you, tell you the condition of your car and suggest an appointment that suits you at the retailer of your choice where the necessary work will be prepared for and carried out thanks to the information that's already been received. This service is free and without a contract***.

NAVIGATION

DS Connect Nav is a 3D connected navigation system with voice recognition in partnership with TomTom. It guides you to your destination with a pack that includes real-time traffic reports by TomTom services (with features such as real-time traffic updates, the location of fuel stations, car parks, weather and Points Of Interest) as well as Danger Zones by TomTom Services that sends you audible and visual warnings where extra vigilance is required and alerts for all types of speed control* (fixed and mobile). To give more peace of mind, the electric charging station service instantly tells you the availability of charging stations in the vicinity**** that are compatible with your car.

MIRROR SCREEN**

Once your smartphone is connected, Mirror Screen reproduces compatible apps. To give you a wider range of compatible smartphones, Mirror Screen works with Android Auto™ and Apple CarPlay™ (Apple).

SCAN MYDS

Access your user manual digitally. Scan MyDS is a free app, designed to be used when the car is stationary.

* This service is available depending on the traffic laws of the country

** Depending on the model

*** Contract valid for 10 years

**** Only available on hybrid models, displays information of partner charging stations

DS DELIVERY VALET

YOUR TIME IS OUR PRIORITY

DS DELIVERY VALET allows you to benefit from the delivery of your new or used DS to the address of your choice and collection of your old vehicle.

PRICE: £195 inc. VAT

Insurance groups (1-50) are an indication only, please consult your insurance company for further details.

CO₂ figures, P11D values, BIK% and MRRP pricing shown above are for a standard vehicle without any additional optional equipment. CO₂ figures are used to calculate Vehicle Excise Duty (VED) for the first registration of the vehicle and BIK%. The addition of optional extras could increase the certified CO₂ emission output. This in turn may affect the amount of VED payable upon registration, and, for company car drivers, the amount of Benefit in Kind (BIK) tax payable.

For further information on CO₂ and pricing for vehicles with optional equipment, please visit <https://www.dsautomobiles.co.uk/ds-store/configurator>

* Figures shown are for comparison purposes and should only be compared to the fuel consumption and CO₂ values of other cars tested to the same technical standard. The fuel consumption achieved, and CO₂ produced, in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); variations in weather; driving styles and vehicle load.

The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption and CO₂ figures.

**'On the Road' MRRP includes registration plates and delivery to dealer (including VAT), 12 months' Vehicle Excise Duty and new vehicle registration fee of £55. Excludes fuel and insurance.

Please note: an additional annual tax rate applies in years 2 to 6 for vehicles with a list price (which includes basic price, VAT, delivery cost and additional options) in excess of £40,000.

TECHNOLOGY

DS MATRIX LED VISION HEADLIGHTS

DS 4 features the latest generation DS MATRIX LED VISION headlights, which adjust automatically to driving and road conditions. This intelligent lighting technology uses a camera mounted on the windscreen to monitor the road ahead and adjusts accordingly, for example switching automatically from full beam to dipped headlights to avoid dazzling other drivers. Three LED modules are used for dipped beam, supplemented with a MATRIX BEAM module for standard driving. This incorporates 15 identical but independent elements, illuminating and dimming progressively depending on road conditions.

The Matrix Beam module consists of independent segments, which come on and go out gradually, segment by segment, depending on the driving conditions detected by the camera at the top of the windscreen.

FOCUS ON THE ROAD CONDITIONS

When approaching a vehicle from behind that is travelling in the same direction, the light segments around the vehicle being followed will go out. This creates an unlit area so that the driver in front is not dazzled.

When overtaking a vehicle, the light segments around the vehicle in front will go out to prevent dazzle. The lights will return to standard levels as soon as the over-taken vehicle moves out of the lighting zone.

When entering an urban area, the light segments will gradually go out from the outside edge and move to dipped status.

When leaving an urban area, the light segments will come on gradually from the inside to the outside edge and move to main beam status.

When driving on a major road, Motorway mode will activate if the car travels at 68mph or faster for more than 5 seconds. This will create a cone of light with a raised beam and increased reach to improve visibility in higher speed situations. The function is active when lights are in automatic mode but can be turned off via the central screen.

LIGHTING

HIGH BEAM

This lighting mode can be activated at any time by the Automatic High Beam function, independently of the Adaptive Front System functions. It adapts automatically to the vehicle speed and angle of the steering wheel.

The power and range of the beam are set to maximum in order to effectively light up the length and breadth of the road. The modules are raised and positioned centrally, in line with the vehicle. At the same time, their range is increased. The beam range is 520m.

ADVERSE WEATHER

This lighting mode is activated automatically at any time, when the wipers are activated. The beam is wider. The power of the modules is increased to enable the driver to see the white lines on the road more easily.

The intensity of the main beam is reduced in order to improve the driver's vision, taking into account possible reflections from the wet road. The beam range is 330m.

WELCOME LIGHTING

LOCKING/UNLOCKING

When the driver unlocks the vehicle using the plip or keyless access function, the vehicle initiates a "Welcome" sequence. The headlights and modules give off a purple light, as if the car were waking up.

FOLLOW ME HOME

The automatic 'Follow me Home' lighting function leaves the headlights illuminated for a short time after the vehicle is locked, in order to light a path for passengers at night.

LOCATION

This lighting function allows you to activate the headlights and indicators to help you find your car, for instance in a crowded car park.

SCROLLING INDICATORS

These distinctive, high-tech features underline the expressive looks of DS 4's light signature. They comprise a line of LEDs scrolling in segments towards the outside, in the direction of travel. They also include a one-touch activation function.

E-TENSE 225

RANGE

183-232
MPG

weighted combined fuel
consumption (WLTP).

UP TO
38.5
MILES*

(WLTP) in full electric.

* The electric range you achieve in real life conditions will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load. Only compare fuel consumption and CO₂ figures with other cars tested to the same technical standard.

REGENERATIVE BRAKING

(B)

The Braking Mode can be selected with the push of a button, located on DS E-Toggle, meaning your vehicle will use a higher level of regenerative braking and slow-up faster when your foot is off the accelerator. Regenerative braking slows the vehicle while harnessing the kinetic energy back into the battery, thus helping to maximise range. Around town, the range can be increased up to 20% with regenerative braking.

WHAT AFFECTS THE RANGE?

Driving style, driving speed, use of heating & air conditioning, acceleration or load are several factors that will affect the range of your car. Limiting the impact of the above factors will maximise range.

The predicted range gauge on our vehicles utilises recent driving history, as well as remaining battery charge and current driving conditions to estimate the range available.

CHARGING

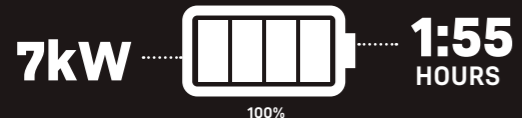

DOMESTIC CHARGING

DS 4 comes with a domestic charging cable as standard, allowing you to charge from a standard UK 3-pin socket.

ACCELERATED CHARGING

Install a home charging unit to access Accelerated charging at home. Accelerated charging cable comes as standard with DS 4 E-TENSE models.

To take advantage of Accelerated charging, and install a home charging unit at your home. Our approved charging partner Pod Point can assist with installation. They are fully approved under the government's Homecharge scheme, so if you have off-street parking, you could be eligible for a grant towards the cost of your charger. Speak to your DS Retailer about installing a home charging unit.

MyDS APP

E-TENSE EXCLUSIVE FEATURES.

CONTROL YOUR ELECTRIC CAR FROM YOUR SMARTPHONE WITH THE MyDS APP.

RANGE INFORMATION

With the MyDS smartphone app, you can see your car's current state of charge and approximate remaining range. When your car is plugged in, the speed and expected remaining charging time are also shown.

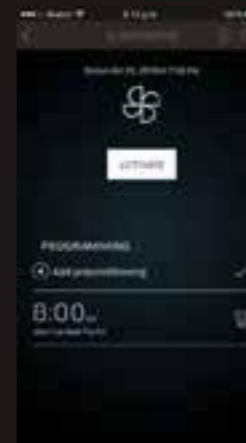

REMOTE CHARGING

With control of remote charging you can use the MyDS app to commence charging or initiate a programmed charge. A programmed charge enables you to use the most beneficial energy rates to replenish your battery.

REMOTE AIR CONDITIONING

This feature allows you to programme the heating or air conditioning of your car while it's still charging. Your car will be set to your preferred temperature when you get in, without diminishing the range available.

TECHNOLOGY

PROXIMITY KEYLESS ENTRY AND START

IN BRIEF

PROXIMITY KEYLESS ENTRY AND START accurately recognises your arrival at the car and conveniently deploys the FLUSH FITTING DOOR HANDLES to welcome you as you approach.

DETAILS

By keeping the vehicle key with you, you can enter the car and start/stop the engine with a simple push of the start/stop button on the dashboard.

When leaving the car, a simple touch on one of the front/rear door handles or on the rear tailgate's push button is enough to lock the vehicle.

Should you forget and leave the key inside, the car will prevent itself from being locked. Also, if you leave the vehicle while the engine is still running, a warning signal will ring to alert you.

The PROXIMITY KEYLESS ENTRY AND START gives you hands-free access through automated deployment of the FLUSH FITTING DOOR HANDLES and unlocking of the doors as you approach the car (in addition to the keyless entry and start function). Conversely, when you walk away from the car FLUSH FITTING DOOR HANDLES will retract and lock automatically.

HOW IT WORKS

At a distance of 3m, your DS 4 detects the key, unfolds the door mirrors and illuminates the headlights in anticipation of your arrival.

When you are within 1.5m of the car, the FLUSH FITTING DOOR HANDLES deploy to reveal themselves and unlock your DS 4 automatically.

When leaving the car the door handles will retract at a distance of 2m away from the car, accompanied by an audible and visual confirmation that your DS 4 is locked.

DS DRIVE ASSIST

IN BRIEF

Travel long distances with peace of mind thanks to DS DRIVE ASSIST, the advanced driving aid that brings you a step closer to autonomous driving. This system combines the new Active Cruise Control Stop and Go and Lane Keeping Assist to manage driving in semi-autonomous mode, in specific conditions. DS DRIVE ASSIST helps manage steering and speed and is active at speeds between 40mph and 110mph.

DETAILS

A reference speed is entered into the Active Cruise Control Stop and Go (from 20 mph). At the same time Lane Keeping Assist is activated using a button on the right of the dashboard (from 40 mph).

The system then registers your DS 4's position on the road (in the centre, on the left or on the right, in line with your driving habits). From this point on, your DS 4 will help control speed and steering.

This system is particularly well suited to major roads and motorways, provided that the white lines are clearly visible. The system will help to drive the car but does not replace the driver who must remain focused, vigilant and in control of the car at all times.

NOTES

To remain active, DS DRIVE ASSIST requires you to keep your hands on the steering wheel at all times even if you are not actively steering the car.

You can take back control at any time by:

- Applying torque to the steering wheel (to cancel Lane Keeping Assist).
- Braking (to cancel Active Cruise Control Stop and Go).
- Pressing the button to deactivate the function.

This feature does not reduce the need for absolute driver vigilance.

DS CARE FOR CAR AND DRIVER

*The delivery charge includes all miscellaneous charges, including the supply and fitment of registration plates etc.

COMPREHENSIVE WARRANTY

Every new DS car offers the benefit of a three year¹ warranty package, plus a 12 year anti-perforation² warranty and a three year paint warranty. The E-Tense versions come with 8 years' or 100,000 miles battery warranty, whichever comes first, if the charging capacity of the batteries fall below 70%.

¹ Two years' unlimited mileage manufacturer's warranty. No-fee customer option of one year's Retailer provided warranty, only on cars sourced from DS AUTOMOBILES. Note: Retailer provided warranty is limited to 60,000 miles for cars and 100,000 miles for light commercial vehicles (excluding motorhomes and other converted vehicles).

² Against all internal to external perforation to bodywork or underbody on condition the car undergoes an inspection by a DS franchised Retailer every two years from its fourth anniversary.

DS ASSISTANCE

In response to a free telephone call in the UK, DS Assistance brings rapid expert roadside assistance to you in an emergency. It comes free of charge for three years, from date of vehicle registration, and operates 24 hours a day in all parts of the UK and Europe. Services include nationwide recovery for both car and passengers, a home call service, replacement vehicle, hotel accommodation and vehicle storage if required. You can also purchase additional DS Assistance via your local DS dealer at any time. DS Assistance applies to incidents covered by the new vehicle warranty, and non-vehicle faults, such as running out of fuel or mis-fuelling, instances where keys have been locked inside the vehicle or lost/stolen, road traffic accidents and punctures / wheel changes.

The On the Road MRRP featured includes the following:
