DS 7 PLUG-IN HYBRID

DS 7 PLUG-IN HYBRID

FROM £52,270

SAVOUR THE DELIGHT OF DRIVING THE **PLUG-IN HYBRID**

A new generation of mobility

Enjoy a remarkable driving experience with our PLUG-IN HYBRID technology. Uniting flexibility with dynamism, the combination of electric and petrol delivers thrills as well as comfort. With its PLUG-IN HYBRID powertrains, DS 7's CO₂ emissions are from 27g/km.

PLUG-IN HYBRID models enjoy lower road fund licence charges and Benefit in Kind taxation charges for company car drivers.

DS 7 E-TENSE

CHARGING SOLUTIONS

CHARGE DAILY, DRIVE 100% ELECTRIC

Charging is a necessity to make the most of your electric or plug-in hybrid car. When you're not using your car, it only takes a few seconds to plug it in and charge it. We recommend you charge your plug-in hybrid car every day to take full advantage of driving electric.

01

FORMULA E

DS AUTOMOBILES DOUBLE WORLD CHAMPIONS IN FORMULA E

Formula E is a 100% electric single-seater championship recognised by the International Automobile Federation, the first race of which took place in 2014. Engaged in Formula E since 2015, DS Automobiles made its mark on the history of the sport with two double titles (Teams and Drivers) in 2019 and 2020 with an impressive number of victories and podiums. Today, DS still stands out as the most rewarded brand with a record number of points scored since the creation of the championship.

This season, DS is associated with Penske Autosport within the DS PENSKE FORMULA E TEAM.

Why is DS Automobiles involved in Formula E?

“From Track to Road”

Motorsport is a real laboratory for DS Automobiles. It makes it possible to test in extreme conditions technologies that could be used in the development of our road cars. The competition allows technology transfer from our single-seater race cars to our electric and plug-in hybrid models.

Furthermore, having a DS Automobiles team in Formula E aligns perfectly with the brand strategy of launching vehicles of electric propulsion exclusively from 2024.

* From January 2019 all models are Type Approved according to Worldwide Harmonised Light-Duty Vehicles Test Procedure (WLTP). WLTP is the new official test regime and replaces the New European Driving Cycle (NEDC). The CO₂ data has been converted from WLTP back to NEDC-equivalent values in accordance with current vehicle tax and Company Car Tax (CCT) legislation. Two values for CO₂ are shown per version, these are the 'Vehicle High' (1) value and the 'Vehicle Low' (2) value. For transparency and clarity, the 'Vehicle High' value has been used to calculate the first year taxation in the prices shown above. The actual CO₂ value of a version may vary according to optional equipment fitted but, other than in exceptional circumstances, will be between 'Vehicle High' and 'Vehicle Low'.

For full information, including WLTP fuel consumption data, please see technical specification pages, or refer to your nearest DS retailer.

(1) Vehicle High = High specifications vehicle fitted with maximum available options.

(2) Vehicle Low = Standard specifications vehicle fitted with minimal options.

Please note: an additional annual tax rate applies in years 2 to 6 for vehicles with a list price (which includes basic price, VAT, delivery cost and additional options) in excess of £40,000.
