

CITROËN DS4

Citroën DS4 ————— ————— Innovation First

Like every car in the DS line, the new Citroën DS4 starts with a spark of innovation. Uniquely non conformist, it mixes urban presence with coupé grace, luxurious quality with smart flexibility.

So while the new Citroën DS4 is not an SUV or a hatchback, it distills what's best about all of these genres and creates something genuinely fresh. It's a striking, sophisticated 5-door coupé that has the balance and fine-tuned engineering to inspire keen drivers with quick responses and nimble handling. It's a luxurious way to travel for five and it's a creative design statement. This is what happens when you begin with innovation.

Defying Definitions

The new Citroën DS4 proves that there's no contradiction between sporty and purposeful, elegant and curvaceous. The established definitions simply don't count. Walk around the outside and you'll find sweeping lines, exciting details and a profile that is both compact and bold. Step inside and you'll discover a welcoming combination: stylish space, light, intuitive technology and high quality materials. Now, five people can travel comfortably in coupé style, while high profile road presence and sleek efficiency go hand in hand. Rear door handles are smoothly integrated into the window surround, leaving the side profile's organic curves uninterrupted. The ultra-stylish, body-coloured rear bumper, beautifully formed lights, steeply raked tailgate and roof spoiler surround a luggage area of real versatility. Compromise is not included. The new Citroën DS4 is a genuine 5-door coupé. It just looks and drives like something far more stimulating.

Habana (watchstrap) 'Club' leather – optional.

Citroën DS4 — Advanced Luxury

In every sense, the new Citroën DS4's interior is a special place. Naturally light and roomy, it is made with meticulous care, combining craftsmanship with high levels of technology.

Beginning with the fundamentals, the whole interior is thoroughly soundproofed, using carefully selected materials that absorb noise and vibration. This restful space is then shaped for five people, bringing them an environment that can be fine-tuned in numerous ways. Backlighting can be changed from white to blue, automatic digital air conditioning, standard on DStyle and DSport, has a special 'rest' function that maintains its temperature setting for a few minutes after the engine stops. Front sports seats with lumbar adjustment even include a massage function from DStyle upwards and sumptuous leather touches create an all encompassing feel of refinement and quality.

Citroën DS4

Power and Poise

Beneath new Citroën DS4's sculpted bonnet you can specify one of three advanced engines. But a great driving car needs more than power ...

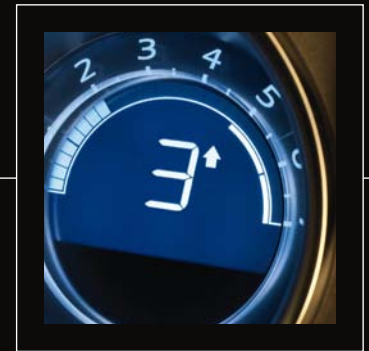

Citroën engineers have used their imagination and experience to create a car that handles, rides and responds with balance and fluidity. Dynamically, the new Citroën DS4 offers both inspiration and surefooted safety – it's a perfect platform for adding your chosen euro 5 engine. There is the euro 5 super efficient e-HDi diesel and there are two petrol engines to choose from, the incredibly torquy 1.6L 115kW turbo petrol or the all new 1.6L 147kW turbo petrol for ultimate performance. Agility and stability, power and efficiency ... the new Citroën DS4 leaves nothing out. Powerful fog lamps and daytime-running LEDs provide a broad, clear confidence-inspiring picture of the road ahead – perfect for enjoying the new Citroën DS4's power and poise.

Guilt-free Pleasure

Driving pleasure and environmental efficiency blend happily in the new Citroën DS4. It's the balance that makes it such an inspiring car and a genuine pioneer. The extraordinary micro-hybrid technology of e-HDi reduces both fuel consumption and CO₂ emissions by up to 15% around town, thanks to a combination of efficient HDi engineering and ingenious advances. Regenerative braking recovers energy used during deceleration and second generation stop and start cuts the engine as you roll to a halt. When you release the brake pedal and move off, it seamlessly restarts, so you can say goodbye to pointless idling in traffic.

The new Citroën DS4 incorporates a Gear Efficiency Indicator, on manual models which helps you to shift at just the right moment for optimum fuel consumption. The ideal gear ratio appears in the centre of the rev counter, for instant legibility.

Citroën DS4 — Pioneering Protection

Pioneering protection is engineered into every part of new Citroën DS4. It's where creative design and new technology play a vital role.

Out on the road, when you need to change lanes, the blind spot monitoring system is looking out for you. It gives a visible warning in your door mirror if it detects a hidden vehicle. Cruise control and a programmable speed limiter maintain hassle-free and safe progress.

› GOODBYE TO BUMPS

For safe manoeuvres without bumps and scuffs, new Citroën DS4 has rear parking sensors, standard on DStyle and DSport models. For further, pinpoint accuracy, front parking sensors are standard on DSport and DStyle models.

› YOUR PARKING PARTNER

When you see what looks like a space with your name on it, the parking space 'gap' measurement system standard on DSport and DStyle models will measure it and let you know if there's room – it takes the guesswork and the hassle out of urban parking.

› SUREFOOTED EVERYWHERE

New Citroën DS4 has intelligent traction control that continuously monitors grip levels at each driven wheel. If it detects slip, it fine-tunes power delivery to ensure complete stability. Integrated with this system is an automatic electric parking brake, standard on DStyle and DSport. Also the Hill Start Assist, standard on EGS and manual models, holds you securely in place on steep inclines without rolling backwards.
