XUV500

JAW-LIKE FRONT GRILLE

POUNCING CHEETAH-INSPIRED BODY LINES

PAW-STYLED DOOR HANDLES

DANGER DOESN'T ALWAYS COME HEAD-ON.

The XUV500 is well equipped to keep you out of harm's way. Six airbags reinforce the safety of the vehicle. Driver & passenger airbags, side airbags and curtain airbags cocoon you. As if that wasn't enough, the vehicle's body also comes with side impact beams and thoughtfully located crumple zones. They don't just absorb crash energy, but redirect it around the passenger compartment as well.

- 6 airbags (front, side and curtain)
- Impact absorbing, crash protection and crumple zones
- Side impact beams
- Electronic Stability Program (ESP) with Rollover Mitigation
- Anti-lock Braking System (ABS) with EBD
- Hill Hold and Hill Descent control
- Disc brakes on all wheels
- Tubeless tyres

**ONE PART
SANCTUARY.
ONE PART
FORTRESS.**

Few vehicles are as fortified as the XUV500. And at the heart of this fortification is the Electronic Stability Program (ESP). Think of it as the commander of an arsenal of safety features like Anti-lock Braking System (ABS), Electronic Brake-force Distribution (EBD), Rollover Mitigation and Traction Control.

The ESP is always on high alert and constantly monitors the movement and direction of the car. When it detects loss of control, brakes are automatically applied and torque to the relevant wheel is reduced till vehicle stability is restored. Rest assured, the only thing that will go out of control is your heartbeat.

ROLLOVER MITIGATION

Rollover mitigation, too, performs similar duties. It closely monitors a range of parameters and identifies potentially dangerous driving conditions that could lead to the vehicle rolling over. Well before the situation becomes threatening, it causes the ESP system to intervene and control the vehicle speed, thereby restoring stability.

HILL DESCENT & HILL HOLD CONTROL

Amongst the swarm of features, these are two very useful ones. Hill Descent Control identifies steep inclines and engages itself to assist the vehicle down the slope with caution. While Hill Hold Control prevents the vehicle from rolling backwards when starting from standstill on an incline.

**POISED TO
POUNCE.**

The design is unmistakable. With bold, glorious lines that trace the world's most agile animal in action. Muscular wheel arches that accentuate its impressive, broad stance. And the distinct, paw-styled door handles that you can't tear your eyes off. But the fierce, assertive look is most apparent head on. One glance at the intimidating, jaw-like honeycomb grille and you'll notice the vehicle's innate desire to pounce at anything that stands before it.

THE CHEETAH-INSPIRED XUV500.

**THE NEW
NORM IN FORM.**

**ONE HALF STEERING WHEEL.
ONE HALF REMOTE CONTROL.**

The steering wheel has been designed with an enhanced capacity to control. Its tilt and telescopic adjustment allows personalisation to suit your needs. A plethora of controls surmount the wheel. Controls to toggle music. Controls to activate voice commands. Controls for phone calls. And finally the cruise control button to put your vehicle into 'auto-pilot' mode. Push it to maintain a preset speed without having to keep your foot on the accelerator.

SUNGLASSES HOLDER AND CONVERSATION MIRROR

LAPTOP HOLDER IN GLOVE BOX

A DASHBOARD WITH A DASH OF ELEGANCE.

Elegance is sewn into every detail of the XUV500. Notice the texture and finish of the dashboard. The exquisite waterfall-style centre bezel that flows down right to the first row. The high-caliber, twin-pod instrument cluster too, is seriously sporty with 3D dials.

The XUV500 is a pioneer, even in design. Walk around the vehicle and you'll discover how every single element has been masterfully sculpted. A chiseled, aerodynamic body that ruthlessly cuts through the air to provide limitless exhilaration. Racing-inspired twin exhausts. Even uniquely designed tail lamps that look worthy of being followed. Clearly, the only thing lacking in design is a compromise.

- 1 Intimidating, jaw-like honeycomb grille
- 2 Unique, paw-styled vertical door handles
- 3 Elegant tail lamps
- 4 Racing-inspired twin exhausts
- 5 Stylish alloy wheels
- 6 Streamlined roof rails
- 7 Static-bending Projection Headlamps
- 8 Powerful fog lamps
- 9 Impressive LED parking lights
- 10 Power-foldable and adjustable ORVMs

STATIC BENDING PROJECTOR HEADLAMPS

These headlamps don't just fetch daylight at the flip of a switch. They even put daylight between the XUV500 and its competition. Their unique 'bending' ability allows them to light up curves when you turn the steering to tackle one. So there will never be a surprise around the corner. Unlike standard halogen bulbs, you'll find high-intensity projection bulbs here. With a row of distinct LED parking lamps that underline the entire cluster. And your presence.

PHYSICS-DEFYING AGILITY. THE MHAWK 140.

The XUV500's authoritative exterior promises unbridled excitement. And its mHawk engine lives up to the promise. This 2.2 ltr powerplant delivers an output of 140 bhp and an impressive torque of 330 Nm. Step on the pedal and the scenery begins to blur. The 5th generation variable geometry turbocharger ensures instantaneous acceleration, taking the XUV500 from 0-60 kmph in a mere 5.4 seconds.

Despite all this unadulterated power, the XUV500 gives you up to 15.1 kms per litre (ARAI-certified). A high torque at low engine revs allows the vehicle to handle city traffic with ease. While the Dual Mass Flywheel ensures a rattle-free driving pleasure.

DRINKS LESS. SMOKES LESS. WITH MICRO HYBRID TECHNOLOGY.

The advanced Micro Hybrid technology helps conserve both fuel and nature. It automatically puts the engine into standby mode 2.5 seconds after you shift into neutral at a signal, or in bumper-to-bumper traffic. When you step on the clutch, the vehicle automatically comes to life again. Giving you higher fuel efficiency and lower CO₂ emissions.

- Powerful, 2.2 ltr, mHawk diesel engine
- 140 bhp (103 kW), 330 Nm torque
- All Wheel Drive
- Monocoque construction
- Independent suspension with McPherson struts
- Micro Hybrid technology
- Lightweight body with high-strength steel

LEATHER-WRAPPED LOUNGE.

COMFY SEATS. PACKED WITH MORE THAN JUST COMFORT.

A tailor-made throne awaits you on the inside. But there's more to it than just the supple leather that meets the eye. The front seats are bolstered to keep you in place during high-speed cornering. The driver's seat is adjustable in 8 different ways including height and complete lumbar support adjustment. Another useful feature is the ability of the last two rows to completely fold away and transform the XUV500 into the perfect vacation vehicle.

ELEGANCE IN FORM. ELEGANCE IN FUNCTION.

Step in. Take the wheel. And find around you all you need for that incomparable feeling. Seats, steering wheel and several other contact points wrapped in pure leather. Intuitive and intelligently placed storage and controls. Individual climate-control vents for each of the occupants. All coming together to create an atmosphere of sheer exclusivity.

Perhaps one of the most unique features of the XUV500 is the lounge lighting. Push a button and concealed lights transform the cabin into a lounge. Making you feel relaxed and invigorated at the same time. It's the kind of feeling no other car can come close to satisfying.

- 1 Elegantly crafted two-tone interiors
- 2 Concealed lounge lighting
- 3 8-way adjustable leather seats including lumbar support
- 4 Voice command-activated audio and cruise controls
- 5 Conveniently placed cool box
- 6 Sporty twin-pod instrument cluster
- 7 Waterfall-style central bezel

**HELL-BENT ON STABILITY.
EVEN IN HELLISH CONDITIONS.**

Here's another unique feature that doesn't feature in most vehicles - an intelligent All Wheel Drive system that lets you tackle even the off-roads with ease. When stuck in mud or on a slippery surface, the Interactive Torque Management system automatically redistributes the torque

between the front and rear wheels to manoeuvre the XUV500 out of trouble. This seamless transition from 2WD to AWD without any driver intervention gives you a level of handling prowess unmatched by conventional vehicles.

SPORTY SUSPENSION. FOR RACE-TRACK LIKE DRIVES.

The sporty suspension of the XUV500 gives a lot of room for fun. In fact, the McPherson struts up front and the independent multi-link suspension in the rear have been tuned in collaboration with Lotus, a world renowned name in motorsport. This race-bred suspension system takes full advantage of the rigid monocoque design, responding to driver input with minimal body roll.

**MONOCOQUE CONSTRUCTION.
FOR DREAM-LIKE HANDLING.**

This is the essence of the XUV500's uncompromised driving dynamics. The monocoque construct is found only in the most modern SUVs around the world. Here, the vehicle body and platform are integrated into a single unit. The result is an excellent power to weight ratio, unmatched handling and undiluted driving pleasure.

TECHNOLOGY. AT ITS LUXURIOUS BEST.

To create the next generation of SUVs, you have to advance past the status quo. Probably why the XUV500 lets you discover features that most other cars have yet to. Like a full-fledged Driver Information System that diligently reports to you with all the vital information about the car. It tells you how far the existing amount of fuel can take you. It monitors the air pressure and temperature of each tyre. It even controls the cabin temperature for you.

To express your desires, mere words are enough. Voice commands, together with Blue Sense technology let you take wireless, vocal control of a number of systems like music, navigation and mobile calls.

For more intelligent features like rain and light sensors, even words are unnecessary. The wipers and headlamps are activated automatically whenever external conditions demand.

INFOTAINMENT AT YOUR FINGERTIPS.

A first-in-class, 6-inch LCD touchscreen on the dash begs for your attention. The headquarters of your highly sophisticated touchscreen infotainment system, it houses all the controls you need: music controls, temperature controls, navigation controls and more.

GOOD MUSIC = GREAT DRIVE.

Great sound is essential for any rich experience. That's why a great deal of attention has been given to the acoustic details within the cabin. The visually stunning entertainment system plays everything from music to DVDs. Have your favourite music on your iPod™? Plug it in and get going. The impressive speakers with built-in tweeters will recreate the experience of the original studio recording, reminding you of your high-end home setup.

LOSE YOURSELF. WITHOUT GETTING LOST.

Feel like a local, no matter how far off the beaten path you go.

The fully-loaded navigation system covers over 1.5 million kilometers of road across 1200 cities. You get access to over 5 million points of interest including restaurants, ATMs and fuel pumps. Convenience is taken to all new levels with its turn-by-turn voice guidance in a choice of 8 different regional languages. A sincere request before we move on: do provide directions to any lost vehicles you might encounter along your adventure.

- Fully automatic climate control with dual HVAC
- Blue Sense technology
- Tyre-tronics (Tyre Pressure Monitoring System)
- Steering-mounted audio and cruise controls
- Smart rain & light sensors

- Intellipark (Reverse Parking Assist System)
- Crystal clear door speakers with built-in tweeters
- Mobile charging points in all rows
- Convenient remote keyless entry
