

Saab 93 SportWagon

Continuing the Saab heritage of sporty, versatile cars, the new SportWagon's powerful, turbocharged engines all move you effortlessly through city traffic and glide you along country roads. Smart design solutions demonstrate our innovative thinking and also mean the SportWagon easily adjusts to your lifestyle: strap a kayak or mountain bike on the roof rack, or put a surfboard in the boot. Then, when you're ready, put your foot down for an unforgettably exciting drive.

Saab 93 SportWagon

Move your mind

Built around the pilot

Our first vehicles were aircraft. The Saab 9-3 SportWagon range shares that exhilarating aeronautical spirit. With the engine and chassis tuned for rapid, instant response, the entire car is designed around the driver. So why not experience what aircraft-inspired design can do for you?

Driver control

V6 Turbo

The new 250 bhp Turbo engine is incredible. From idle to redline, it has massive amounts of torque and a huge 350 Nm to play with. Power delivery is instant and accompanied by an exhilarating sound from the sport-tuned exhaust system. Whether you prefer diesel or petrol power, the range of 9-3 SportWagon turbo engines are all EuroIV-compliant and all come with that same spirit: masses of torque, instantly available.

Engine & transmission

Turbocharging

Gives the engine tremendously increased torque delivery and results in rapid acceleration for fast overtaking.

Manual 6-speed

Smooth gear-shifting for fast acceleration always keeps you in total control.

High-performance turbodiesels

Equipped with second-generation common rail, multiple direct injection and VNT turbo.

Sentronic 6-speed

A new, automatic transmission that also allows manual gear shifting. (V6 and TiD)

VNT Turbo

Variable Nozzle Turbine on the TiD engines. Enables faster response across the rev range by adapting to current gas flow.

EuroIV-compliant

Cut down on CO₂. The entire range of 9-3 SportWagon engines are all EuroIV-compliant, including the new 250bhp V6.

Saab Trionic

For the 4-cylinder turbo engines. One of the world's most advanced management systems, developed by Saab.

Advanced V6 Technology

Features include variable inlet cam phasers, four-chain-driven overhead cam shafts, 24 valves, and roller cam followers.
