

MAZDA CX-3

---

We believe in the power of human potential;  
creativity, imagination and the amazing things  
we're all capable of when we're inspired.

We believe in taking the unconventional road  
and going the extra mile to do work that inspires.

We believe in artisans, designers, engineers and ambassadors  
who pour human energy into their work.

We believe in the power of cars to move human emotions.  
To awaken senses, heighten reflexes, make pulses race.

We believe the joy of being alive comes from  
what we discover on our journey,  
and the inspiration we find in every mile.

MAZDA MAKES YOU FEEL ALIVE.

## DIGNITY EMOTIONALLY EXPRESSED

Bursting with the vitality of a free-spirited being, the exquisite CX-3 is more compelling than ever.

Mazda's Kodo — Soul of Motion design language endows it with new aesthetics, dignity and tension.

A renewed focus on traditional Japanese design stripped away embellishment to reveal a beautifully honed form that inspires observers and strengthens the bond between car and owner.

In CX-3, we take beauty and radical edginess to new heights that resonate with those seeking a vibrant life.

## HUMAN-CENTRIC ENGINEERING: THE KEY TO SATISFACTION

At Mazda, driver satisfaction is always the driving force. So all our research and development is centred on you, the driver, to give you the confidence and peace of mind that comes with Mazda's trademark *Jinba-ittai* feeling of unity with the car. And to deliver soul-stirring driving along with superior safety and environmental performance, Mazda developed the innovative Skyactiv Technology suite of technological breakthroughs by re-evaluating and revising every aspect of automotive engineering from the ground up. The latest step in the evolution of Skyactiv Technology is Skyactiv-Vehicle Dynamics and G-Vectoring Control (GVC). Based on how you and your passengers physically experience CX-3's dynamic performance, GVC's human-centred innovations raise the bar in enjoyment of the road.

### THE BIRTH AND EVOLUTION OF SKYACTIV TECHNOLOGY

Exhilarating, fun driving combined with unprecedented environmental and safety performance — it seems like an impossible dream. And it required tearing up the rule book of conventional ideas plus a series of quantum leaps in technology to achieve. But this is what inspired the development of Skyactiv Technology, and what continues to drive its evolution along a path charted by human-centric engineering. From its very beginnings, Skyactiv Technology was squarely aimed at eliminating inefficiency and waste throughout the entire vehicle to deliver unheard-of levels of fuel efficiency along with cutting-edge safety and unmatched driving pleasure, helping to realize Mazda's future vision of 'Sustainable Zoom-Zoom'.

### SKYACTIV-VEHICLE DYNAMICS

*Jinba-ittai* is what makes every Mazda so special. The outcome of Mazda's human-centric design and development philosophy, *Jinba-ittai* lets the driver control the vehicle — whether turning, braking or just cruising — as simply and naturally as if it were an extension of his or her body. And Skyactiv-Vehicle Dynamics takes this concept to the next level. This branch of Skyactiv Technology provides integrated control of the engine, transmission, chassis and body to further enhance the *Jinba-ittai* feel of connectedness between car and driver. As opposed to conventional vehicles where these four key areas are controlled separately, Skyactiv-Vehicle Dynamics takes a holistic, human-centred approach with real-time feedback and dynamic interaction occurring between the driver and amongst these four pillars of vehicle control. The result is an involving, exhilarating drive as CX-3 responds to your every intention with crisp, confidence-inspiring linearity and predictability. This innovative, new-generation vehicle dynamics control system is

the fruit of a multi-year initiative undertaken in pursuit of the ideal in rewarding sensations for both driver and passengers, as well as the ultimate in vehicle dynamics. And it sets a new benchmark for driver satisfaction.

### SKYACTIV-VEHICLE ARCHITECTURE

As Skyactiv Technology has matured, new potential and possibilities have opened up. And Skyactiv-Vehicle Architecture is Mazda's response. By sharply focusing on fine-tuning and co-ordinating individual technologies to achieve comprehensive whole-vehicle optimization, Skyactiv-Vehicle Architecture helps driver and passengers comfortably and naturally maintain balance in a moving environment. For example, seats are specifically designed to hold the pelvis at the correct angle, control the body's centre of gravity and stabilize movement of the head. The result is minimized fatigue and an enhanced sense of comfort and well-being, even on long journeys.

## GVC CONCEPTUAL DIAGRAM

### Turn-in with GVC control vehicle

Fy: transverse force  
Fz: vertical load  
Gx: longitudinal G-force  
Cy: lateral G-force

### Turn-in with regular vehicle

## GVC OPERATION

## G-VECTORING CONTROL (GVC)

### ENHANCING CHASSIS PERFORMANCE VIA THE ENGINE

Smooth transitions between G-forces when braking, turning and accelerating are an essential element of *Jinba-ittai*, and have been a major development focus at Mazda for many years. This unified feel to braking, steering and acceleration, along with consistent feedback, allows the driver to control the vehicle easily and precisely. And G-Vectoring Control (GVC) — the debut technology of Skyactiv-Vehicle Dynamics — takes this dynamic, unified feel to an even higher level. It's a logical extension of Mazda's human-centric design and engineering philosophy that not only concentrates on mechanical efficiency but also considers how a vehicle should be in light of human characteristics. GVC is a new approach to controlling vehicle dynamics that uses the engine to enhance chassis performance, and it gives Mazda vehicles even smoother transitions between G-forces in all driving scenarios.

### NATURAL CONTROL GIVING GREATER RESPONSE AND STABILITY

Conventionally both lateral and fore-aft G-forces are controlled separately. In contrast, GVC adjusts engine torque according to the driver's steering inputs to give unified control of G-force in all directions and dynamically optimize the vertical load on each wheel. For example, the instant the driver begins to turn the wheel to enter a curve, GVC momentarily lowers engine torque to transfer weight to the front wheels and enhance the front tyres' grip. Then while a constant steering angle is maintained, GVC recovers engine torque to transfer load back to the rear wheels and heighten vehicle stability. This series of load transfers not only maximizes front and rear tyre grip to enhance response and stability in accordance with the driver's intentions, GVC does it so smoothly and naturally that neither the driver nor passengers feel any discomfort. And GVC demonstrates this effect over a wide range of situations from low-speed everyday driving to high-speed emergency manoeuvres,

and even on slippery road surfaces. Thanks to this dynamic load allocation, GVC greatly reduces the necessity for steering corrections, enabling the driver to maintain a chosen line with greater confidence and lower fatigue on long drives. What's more, by smoothing the transitions between G-forces, GVC suppresses the swaying of heads and bodies to give all occupants a smoother and more enjoyable ride.

## SKYACTIV-G 1.5

This high-efficiency direct-injection petrol engine realizes brisk performance and superb fuel efficiency via high 14.0:1 compression ratio. It features cavity pistons for high thermal efficiency, multi-hole injectors that produce a more uniform and combustible fuel-air mixture, a 4-2-1 exhaust system that further raises combustion efficiency and more. In addition, linear response to accelerator operation is refined to deliver comfortable, high-quality performance for smooth handling in any situation. An optimized piston shape is also adopted for higher efficiency, stronger torque at low- to mid-engine speeds and more practical fuel economy. In pursuit of an ideal engine condition, we refined the *Jinba-ittai* feeling of unity with the car while also achieving excellent environmental performance.

### Engine performance

Max. power: 85kW/6,000rpm

Max. torque: 149Nm/4,000rpm

\*Fuel Consumption(Combined): 5.8L/100km

Vehicle Emission Scheme (VES) Band: B

\*Figures are based on average of urban and highway driving

## SKYACTIV-DRIVE

This six-speed automatic transmission combines the smooth operation of a conventional automatic with the fast shifting of a twin-clutch gearbox. Lockup is extended to nearly 90% for the solid feel of a manual transmission, and there's also the choice of Sports and manual shift modes for sportier driving.

## SKYACTIV-BODY

Innovations in structure, construction and materials make CX-3 lighter, safer and more rigid. Straight structural members, a continuous framework and extensive use of high-tensile steel achieve the contradictory requirements of lighter weight and greater collision-resistance, particularly in the occupants' area.

## SKYACTIV-CHASSIS

To deliver sporty *Jinba-ittai* driving, CX-3 features strut geometry at the front and a torsion beam axle at the rear, specifically tuned for stability at high speeds and sharp, nimble response at low and mid-range speeds. Bushes on the front stabilizer and rear torsion beam mounts are refined to enhance stability, while revisions to the front and rear dampers add to the flat, comfortable ride. The Electric Power Assist Steering's characteristics are revised to provide natural, responsive operation with positive feedback, as well as pinpoint control through curves and during straight-line cruising.

## OTHER SAFETY MEASURES

### DYNAMIC STABILITY CONTROL (DSC) WITH TRACTION CONTROL SYSTEM (TCS)

DSC with TCS electronically controls braking force applied to each wheel to help prevent under- or oversteer and maintain vehicle stability when cornering on slippery roads or during sudden steering inputs.

### AIRBAGS

Front airbags are fitted as standard equipment to provide ample protection in a frontal collision. Optional side and curtain airbags mitigate the effects of side impacts within the relatively short occupant-to-door distances in a compact car, providing another layer of protection in depth against physical shock and injury in a collision.

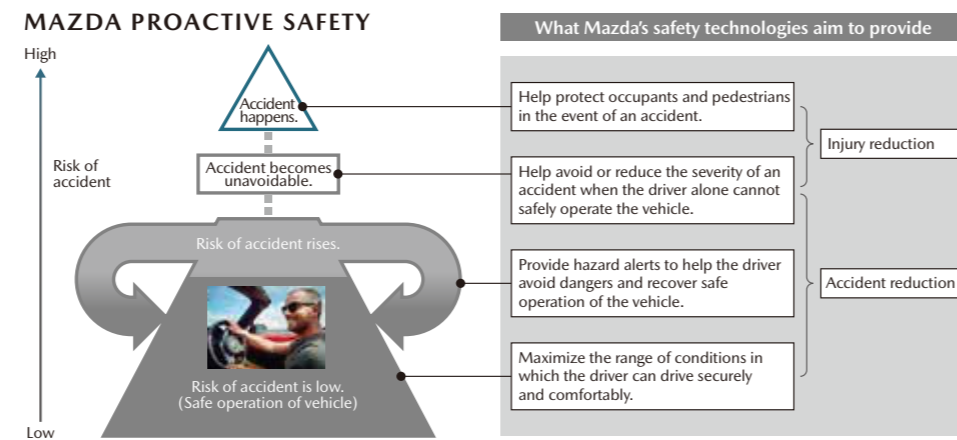

### BLIND SPOT MONITORING (BSM) AND REAR CROSS TRAFFIC ALERT (RCTA)

BSM uses 24GHz quasi-milliwave radar sensors to detect vehicles in the blind spots behind and to the side: using a turn signal while BSM detects a vehicle triggers visual and audio warnings. RCTA uses the same sensors to alert the driver when it detects vehicles approaching from either side when reversing.

## HUMAN-CENTRIC INNOVATION: THE KEY TO SAFER, MORE SECURED DRIVING

Mazda's Proactive Safety philosophy is firmly grounded in a belief in the driver's abilities, aiming to support safer driving while maintaining all the fun of the open road. Safer driving demands early recognition of potential hazards, good judgment and appropriate action, and Mazda works to support these essential functions so you can drive securely and with peace of mind despite changing driving conditions. First is an optimum driver environment with good visibility, well-positioned controls, easy-to-read instruments and minimal distractions. Next is i-Activsense, a portfolio of active safety measures to incrementally warn you when a potentially dangerous situation is developing. Finally there is passive safety, designed to help protect occupants and minimize injuries if an accident should occur.

### BACK-UP MONITOR SYSTEM

The back-up monitor system features a wide-angle camera to give you a clear and comprehensive view around the rear of Mazda CX-3 when reversing, further enhancing safety. Obstacles in the blind spots are displayed in the instrument panel's centre display.

### BODY STRUCTURE

The body provides excellent collision safety performance. Extensive use of ultra-high-tensile steel gives strength with low weight, while the framework absorbs and channels energy away from the cabin.

## HUMAN-CENTRIC DESIGN: THE KEY TO COMMUNICATION

Human-centric design is the key to complete and intuitive communication between you and CX-3. As well as real-time communication with the world when you're on the road. It's all thanks to Mazda's latest iteration of the Human-Machine Interface (HMI) and MZD Connect system. HMI and its human-centric design philosophy now include even your driving position to further enhance the *Jinba-ittai* experience with a panoramic view of the road and all instruments and controls ideally placed to support you in safer, enjoyable driving.

### HMI — CONTROL CENTRED ON YOU

Modern cars constantly present more and more information which can confuse, and even distract. So Mazda engineered its HMI entirely around you, to provide detailed information with minimal eye movements and stress. Controls, instruments, steering wheel and shift lever are all ideally placed in relation to the driver's seat, with the main instrument cluster and steering wheel — with ergonomic shape that optimizes grip comfort — directly centred on the driver, while the pedals are positioned symmetrically to fall naturally under the feet. Excellent visibility is assured thanks to A-pillars located rearward to offer a broader view of the road. CX-3 also features a full-colour Active Driving Display with enhanced definition, brightness and contrast. This head-up display shows key driving and navigation system information just above the instrument cluster and just below your horizontal line of sight to keep you fully informed without the need to take your eyes off the road. The large centre display on the dash shows entertainment-related items and functions as a touchscreen when the car is stationary. In motion, the rotary commander provides control. By rotating, pressing and

toggling this knob, you can operate entertainment functions while keeping your body and your eyes in the normal driving position. Unlike a touchscreen, there's no need to look at the commander when operating it, minimizing visual distraction. The commander is surrounded by five buttons giving shortcuts to four common screens plus a back button.

### MZD CONNECT KEEPS YOU IN TOUCH

MZD Connect gives you versatile internet connection while on the road. It offers an extremely wide range of infotainment options through Aha™ by HARMAN when connected to your smartphone via Bluetooth®. The system's Audio feature lets you access multiple audio sources including AM/FM radio and mobile audio players, and Aha Internet Radio. The Communication feature can read SMS messages aloud as well as other internet social network services such as Twitter and Facebook available via Aha. The Navigation feature shows your current position on a map along with a route to your specified destination. System software is easily updated to give you ongoing access to the latest services without swapping out any hardware.

Note: Available functions of MZD Connect may vary according to the type of connected smartphone and its operating environment. Please consult your local Mazda dealer for exact information.

# EXTERIOR AND INTERIOR COLOURS

## BODY COLOURS

Soul Red Crystal Metallic (46V)

Machine Grey Metallic (46G)

### TAKUMI-NURI

Mazda's unique painting technology Takumi-Nuri (*takumi*: master craftsman, *nuri*: painting), with its unprecedented combination of colour, highlights, shade and depth, further emphasizes the sheer beauty and quality of the dynamic body shape. The lineup includes two Takumi-Nuri body colours: Soul Red Crystal Metallic and Machine Grey Metallic.

### Paint-coat composition

Snowflake White Pearl Mica (25D)

Jet Black Mica (41W)

Deep Crystal Blue Mica (42M)

Ceramic Metallic (47A)

Polymetal Grey Metallic (47C)

Platinum Quartz Metallic (47S)

## SEAT MATERIALS

Leather, Black

# EQUIPMENT

Soft padding for the armrest and the use of soft surface coverings have increased quality and comfort to high levels for vehicles in this class. The cup holder was also repositioned to make it easier to reach and a console box under the armrest offers ample space for a drink or any number of small items.

Switching from a manual to an electric parking brake (EPB) ensures secure activation with just the flip of a switch. The EPB can be released by pressing the switch with a foot on the brake pedal or simply by stepping on the accelerator.

The centre console tray included a Qi wireless charger to enable charging of compatible smartphones and other devices placed on it when the engine is running.

\* Warning: Radio waves emitted by the wireless charger may affect implantable medical devices such as cardiac pacemakers and cardioverter defibrillators. Please consult your local Mazda dealer for exact information.

The steering wheel has narrow spokes and a rim with varying cross-section to better fit the hands and give a confident grip for sporty driving.

The powerful, sculpted design of the 16-inch aluminium wheels makes them look bigger than they really are. The multifaceted design of the spokes provides a sense of depth and speed, and the way they radiate from the centre of the wheel emphasizes the car's stance. The metallic sheen of the machined surfaces works with the chrome side-cladding moulding to enhance the overall impression of speed.

The full-colour Active Driving Display shows high-priority information as it changes from moment to moment, minimizing risks associated with looking away from the road and the time taken for the eyes to refocus.
